MONTHLY REVIEW
OF
CANADIAN FISHERIES STATISTICS
OCTOBER 1950

In October, in the sea-fisheries of CANADA (other than NEWFOUNDLAND), landings of 74,780,000 lb. with a landed value of \$6,326,000, were 39.6 p.c. lower and 53.5 p.c. higher respectively than the comparable figures for the same month of 1949. Including the reported value of supplementary landings, the grand total for October is \$6,372,000.

During the month PACIFIC COAST landings of 36,228,000 lb. were 49.0 p.c. lower, but the value of the catch -- \$4,554,000 -- was 101.4 p.c. higher than the corresponding figures for October, 1949. This state of affairs was caused almost entirely by a huge decline in the catch of one of the cheaper species, herring, and a big increase in the landings of one of the most valuable fisheries, that of chum salmon. However, latest reports would indicate that the herring season merely was later in starting this year. For the ten months ending with October, the cumulative totals of 394,973,000 lb. and \$30,505,000 are 5.1 and 34.4 p.c. higher respectively than the figures for the like period of 1949.

On the ATLANTIC COAST the catch and catch values -- 38,552,000 lb. and \$1,772,000 were lower by 27.0 and 4.7 p.c. than the amounts for October, 1949. Again the most notable decreases were registered in the sardine and cod fisheries. For the ten-month period under review the cumulative totals of 664,937,000 lb. and \$27,613,000 are higher by 7.6 and 11.6 p.c. respectively.

Stocks of all frozen fish in CANADA amounted to 61,213,000 lb. on November 1, 1950, of which 57,953,000 lb. were frozen fresh and 3,260,000 lb. frozen smoked. These holdings are higher by 4,000,000 lb. frozen fresh and higher by 255,000 lb. frozen smoked than those at November 1, 1949. Compared with October 1, 1950, figures they are higher by 4,277,-000 lb. frozen fresh and lower by 135,000 lb. frozen smoked. There was an "into-storage" movement for all classifications of 4.1 million pounds as compared with a similar movement of 4.8 million pounds during October, 1949.

Exports of fish and fish products continue at the same high level, the total for the first nine months of this year -- \$82,344,647 -- being 14.2 p.c. higher than the figure for the corresponding period of 1949.

JAN. FEB. MAR. APR. MAY JUNE JULY AUG. SEPT. OCT. NOV. DEC.

LA PÊCHE AU SAUMON MAINTIENT SON HAUT RENDEMENT (1)

La pêche au saumon sur la côte du Pacifique a été très fructueuse en octobre et a principalement contribué à l'augmentation de la valeur de nos pêcheries pour ce mois comparativement à l'année dernière. La valeur totale des pêcheries maritimes (à l'exclusion de Terre-Neuve) fut de \$6.3 millions pour le mois, contre \$4.1 millions en octobre 1949. Les prises ont pourtant diminué de beaucoup, enregistrant une diminution de 39.6 pour cent par rapport au même mois de l'année dernière. Cela s'explique surtout par le fait que la pêche au hareng n'a pas été poursuivie en Colombie Britannique au cours d'octobre, comme ce fut le cas en 1949.

Les débarquements de poissons et de crustacés sur la côte de l'Atlantique, en octobre, s'élevaient à 38.5 millions de livres avec une valeur de \$1,772,000. Par rapport au même mois de l'année précédente, c'était une diminution de 26.5% dans la quantité et de 4.7% dans la valeur. Un facteur principal dans la diminution des captures est le ralentissement dans la pêche à sardine.

La pêche à l'éperlan a débuté en septembre sur la côte de l'Est du Canada et a procuré de très bons résultats à date. Les prises totales pour septembre et octobre atteignirent 1.15 million de livres évaluées au pêcheur à \$155,000. Pour la même période 1949 les captures étaient de 0.67 million de livres avec une valeur de \$84,000. C'est donc une augmentation au cours de la présente saison de 71 pour cent en quantité et de 85 en valeur, les prix étant substantiellement plus élevés cette année.

Les prises d'huîtres - autre pêche d'automne - n'ont pas été aussi importantes au cours de la présente saison que l'année dernière. Pour le mois de septembre et octobre la récolte fut de 5.3 millions de livres, évaluée à \$284,000. Par rapport aux mêmes mois de l'année précédente, c'était une diminution de 32 pour cent quantité et de 21.5 pour cent en valeur, les prix étant supérieurs en 1950.

Les captures totales en Colombie-Britannique furent de 36.2 millions de livres en octobre comparativement à 71.0 millions au cours du même mois de 1949. Cet écart est dû au fait que la pêche au hareng ne fut ouverte qu'au premier novembre cette année alors que des opérations de pêche importantes pour ce poisson furent poursuivies au cours d'octobre 1949. La valeur des prises pour le dernier mois fut quand même supérieure cette année atteignant \$4.6 millions, contre \$2.2 millions au cours du même mois de 1949. Ce résultat tient principalement aux prises élevées de saumon lequel commande des prix très favorables au cours de la présente saison.

Pour un second mois consécutif les prises de saumon chum ont été très abondantes au cours d'octobre et le prix payé au pêcheur a été élevé. Les prises de cette espèce pour le mois atteignaient 30.9 millions de livres évaluées au pêcheur à \$3.7 millions, comparativement à 13.8 millions de livres et \$1.1 million en octobre 1949. Les captures de saumon coho furent également abondantes, les mises-à-terre pour octobre faisant plus que doubler celles du même mois de 1949.

Les exportations des produits et sous produits de la pêche s'évaluent à \$82.3 millions à la fin de septembre dernier, soit une augmentation de 14.2 pour cent par rapport à 1949. Comparativement à l'année dernière, nos ventes aux Etats-Unis ont augmenté de plus de \$10 millions au cours des neuf premiers mois, tandis que les expéditions aux autres pays se sont dans l'ensemble maintenues à un niveau identique en valeur. Les expéditions de poisson frais et congelé furent très élevées au cours de 1950 et la production de l'année courante est précisément caractérisée par une augmentation importante dans la préparation de ces catégories de produits.
