MONTHLY REVIEW
OF
CANADIAN FISHERIES STATISTICS
NOVEMBER 1950

In November landings and landed values in the sea-fisheries of CANADA (other than NEWFOUNDLAND) amounted to 149,574,000 lb. and \$4,741,000. These figures exceed the November, 1949, totals by 29.5 and 65.8 p.c. respectively. Inclusion of the reported value of supplementary landings brings the grand total for the month to \$4,807,570.

On the ATLANTIC COAST the catch -- 30,838,000 lb. -- was 30.8 p.c. higher, and the value to the fisherman -- \$1,448,000 -- 39.4 p.c. higher than the corresponding figures for the same month of 1949. For the first eleven months of the year the cumulative totals of 695,775,000 lb. and \$29,061,000 were higher by 8.4 and 12.8 p.c. respectively than those for the same period of last year. Increases in the value of the lobster, halibut and haddock fisheries more than offset declines in other species, notably cod and sardines.

On the PACIFIC COAST landings and landed values -- 118,736,000 lb. and \$3,293,000 -- were higher by 29.2 and 80.9 p.c. respectively than the comparable figures for November, 1949. The chum salmon and herring fisheries were the main contributors to these increases. For the eleven-month period under review the cumulative totals of 513,709,000 lb. and \$33,798,000 were higher by 9.8 and 37.9 p.c. than the amounts for the same period of last year. The species responsible for these increases were chum, sockeye and coho salmon, and halibut.

Stocks of all frozen fish in CANADA amounted to 54,723,000 lb. on December 1, 1950 of which 51,864,000 lb. were frozen fresh and 2,859,000 lb. frozen smoked. The holdings were higher by 5,360,000 lb. frozen fresh, and 395,000 lb. frozen smoked than those at December 1, 1949. Compared with November 1, 1950 figures they are lower by 6,347,000 lb. frozen fresh and by 380,000 lb. frozen smoked. There was an "out-of-storage" movement for all classifications of 6.7 million pounds as compared with a similar movement of 8.0 million pounds during November, 1949.

The value of exports of fish and fish products in the first ten months of 1950 amounted to \$94,729,824 -- 12.1 p.c. higher than the total for the like period of 1949.

Prepared in the Fisheries Section
of the Industry and Merchandising Division.

MANITOBA

Table 11 - Landings and Landed Values

Published through the kind co-operation of the Game and Fisheries Branch, Department of Mines and Natural Resources, Manitoba.

Winter fishing operations on most of the lakes of Manitoba did not begin until after the middle of the month. The amount and value of November production will be included in the December report.

MILLIONS OF POUNDS

CAPTURES ÉLEVÉES EN NOVEMBRE (1)

La pêche à l'éperlan et la récolte des huîtres, deux pêcheries caractéristiques d'automne sur la côte de l'Atlantique, ont été très satisfaisantes au cours de novembre. Les prises d'éperlan furent de 856,000 livres pour le mois, contre 514,000 livres en novembre 1949. La prise cumulative, depuis l'ouverture de la saison en septembre, atteint 2.1 millions de livres évaluées à \$205,000, comparativement à 1.2 millions de livres et \$160,000 en 1949. Le prix de l'éperlan a été généralement supérieur à celui de l'année précédente au début de la saison, mais l'abondance des approvisionnements a pourtant causé un certain déclin au cours des dernières semaines de novembre.

La récolte des huîtres fut de 3 millions de livres en novembre, comparativement à 2.5 millions au cours du même mois de l'année précédente. Les mises à terre depuis septembre sont pourtant inférieures à celles de 1949, en raison d'un rendement plutôt médiocre au cours des deux premiers mois de la saison. Ceci explique probablement les prix fermes qui ont prévalu à date en 1950.

Les autres pêcheries importantes de la côte de l'est, à l'exception de celle à la sardine et au maquereau, ont fourni des mises à terre supérieures à celles de 1949 au cours du dernier mois. Les prises de poissons de fonds, morue et ses apparentés, flétan et plie ont été élevées. Au total les captures de poissons, crustacés et mollusques pour la côte de l'est atteignaient 30.8 millions de livres pour le mois, évaluées au pêcheur à près de \$1.5 millions. C'était une augmentation de 30.8 pour cent en quantité et de 39.4 pour cent en valeur par rapport au même mois de l'année précédente.

En Colombie-Britannique les pêcheries importantes pour le mois étaient celles du hareng et du saumon chum. Les mises à terre du hareng furent de 105 millions de livres en novembre, contre 84 millions au cours du même mois de 1949. Celles du saumon chum doublèrent les captures de novembre de l'année précédente. Le total des prises de toutes les espèces pour le mois fut de 119 millions de livres évaluées aux pêcheurs à \$3.3 millions, soit une augmentation de 29.2 pour cent en quantité et de 80.9 pour cent en valeur par rapport à novembre 1949. L'accroissement en valeur est principalement attribuable au haut rendement de la pêche au saumon chum et au prix élevé obtenu pour cette espèce.

Les inventaires de poisson de mer frais-congelé étaient de 47.4 millions de livres au premier décembre comparativement à 41.2 millions à la même date de 1949. Les stocks de saumon chum et coho et ceux de filets de morue sont beaucoup plus élevés cette année. Pour le poisson d'eau douce et le poisson fumé congelés il y avait peu de variante par rapport à l'année précédente.

Les stocks de poisson salé, morue et ses apparentés, se situent dans l'ensemble près de la normale. Toutefois les stocks de colin et de morue séchée fortement salée sont supérieures à ceux de l'année précédente. Les stocks élevés de colin reflètent une production pratiquement trois plus grande qu'en 1949; les ventes de morue séchée fortement salée ont été lentes au cours des derniers mois.

Les exportations des produits et sous-produits de la pêche étaient de \$94.7 millions à la fin d'octobre, soit une augmentation de 12.1 pour cent comparativement à la même période de 1949. Nos ventes de produits frais et congelés aux États-Unis se maintiennent toujours à un haut niveau.
