MONTHLY REVIEW
OF
CANADIAN FISHERIES STATISTICS
AUGUST 1950

184,167,000 lb. of fish with an initial value of \$10,821,000 -- this was the catch taken by the sea-fishermen of CANADA (other than NEWFOUNDLAND) in August. These are by far the highest figures for any month since the inauguration of this Review four years ago. Including the reported value of supplementary landings, the grand total for August is \$10,945,464.

On the PACIFIC COAST landings and landed values of 67,506,000 lb. and \$7,200,000 are higher by 7.6 and 8.5 p.c. respectively than the corresponding totals for August, 1949. Increased landings of salmon -- particularly of chum, pink and sockeye -- more than offset declines in almost all the other fisheries. The tuna catch has again proved disappointing. Totals for the January-August period -- 313,507,000 lb. and \$20,779,000 -- are still much higher than the figures for the first eight months of 1949.

The ATLANTIC COAST landings and landed values -- 116,661,000 lb. and \$3,621,000 -- are higher by 33.0 and 17.4 p.c. respectively than the like figures for August, 1949. All the major species except mackerel were landed in greater quantities, the biggest increases being recorded in the herring and "sardine" fisheries, although the value of the latter declined appreciably. Landed values of the halibut and lobster catches showed marked increases. For the first eight months of the year the cumulative totals -- 544,701,000 lb. and \$23,016,000 -- are 12.1 and 14.6 p.c. higher than the amounts for the same period of last year.

Stocks of all frozen fish in CANADA (including NEWFOUNDLAND) amounted to 53,860,000 lb. on September 1, 1950, of which 50,086,000 lb. were frozen fresh and 3,774,000 lb. frozen smoked. These holdings are lower by 698,000 lb. frozen fresh and higher by 278,000 lb. frozen smoked than those at September 1, 1949. Compared with August 1, 1950 figures they are higher by 4,838,000 lb. frozen fresh and higher by 494,000 lb. frozen smoked. There was an "into-storage" movement for all classifications of 5.3 million pounds as compared with a similar movement of 1.7 million pounds during August, 1949.

The value of exports of fish and fish products in the first seven months of 1950 amounted to \$59.9 millions -- 13.2 p.c. higher than the total for the same period of last year. There still continue to be increased exports of all categories other than canned and pickled fish, and fish oils.

SEA FISHERIES
(NEWFOUNDLAND not yet included)

LANDINGS IN THE SEA FISHERIES OF CANADA

LANDINGS IN THE SEA FISHERIES OF CANADA

CONTINUED

PÊCHE FRUCTUEUSE EN AOÛT (1)

La pêche a été très fructueuse au cours du mois d'août, les résultats tant en eau salée qu'en eau douce dépassant de façon significative ceux de l'année précédente. Même si la migration du Sockeye ne s'est pas réalisée vers la rivière Adams en Colombie-Britannique, les résultats d'ensemble pour cette province et la pêche au saumon en particulier n'en furent pas moins satisfaisants.

Les mises à terre, en août, sur la côte de l'Atlantique, atteignirent 116.7 millions de livres, avec une valeur au pêcheur de \$3.6 millions. Comparativement au même mois de l'année précédente, c'était une augmentation de 33 pour cent dans les captures et de 17.4 pour cent dans la valeur. Pour un premier mois, au cours de la saison d'été, les prises de morue ont été supérieures à celles du mois correspondant de l'année précédente. Les captures de sardines atteignirent 18.2 millions de livres au cours du mois, contre 13.4 millions durant le même mois de 1949. L'abondance de cette espèce et les difficultés rencontrées dans la mise sur le marché des sardines en conserve ont toutefois causé un fléchissement des prix comparativement à 1949, fléchissement qui s'est accentué en août. La plupart des autres espèces ont aussi été capturées en plus grande quantité. Les prises de flétan dépassèrent d'un million de livres celles d'août 1949 et celles du homard furent supérieures par 0.6 million de livres. Les prix sont généralement plus élevés que l'année dernière sauf pour certaines espèces telles la morue, le hareng, etc.

Sur la côte du Pacifique l'absence de migration du Sockeye vers la rivière Adams a causé une grande déception et occasionné une perte importante pour l'industrie. Toutefois les résultats pour l'ensemble des pêcheries en août, se comparent très favorablement à ceux de 1949, les mises à terre et la valeur au pêcheur étant respectivement 7.6 pour cent et 8.5 pour cent supérieures pour le mois. Les prises totales de saumon atteignirent 64.2 millions de livres en août contre 55.6 millions de livres pour le même mois de 1949. Les mises à terre du saumon chum et du saumon rose furent particulièrement importantes.

La pêche en eau douce a été très bonne au cours du dernier mois. Les prises de corégone ont été très élevées au Manitoba, atteignant 430,000 livres contre 69,000 livres l'année précédente. En Ontario et au Grand Lac des Esclaves, deux autres centres importants de production, la pêche a fourni un très bon rendement.

Les inventaires de poisson frais-congelé sont généralement bas au premier septembre. La quantité de poisson de mer et d'eau douce en entrepôts est légèrement inférieure à celle de l'année précédente à la même date. Il convient pourtant de noter que les stocks de filets de morue de l'Atlantique sont de 6.1 millions de livres au premier septembre, contre 3.7 millions à la même date de 1949.

Les inventaires de poisson traité sont dans l'ensemble inférieurs à ceux de l'année précédente. Comparativement à 1949, il convient de noter une diminution importante des stocks de morue verte-salée et de maquereau de printemps, ces faits trouvant leur explication dans une production à échelle réduite.

Nos exportations des produits et sous-produits de la pêche atteignaient \$59.9 millions à la fin de juillet, soit une augmentation de 13.2 pour cent par rapport à 1949. Nos ventes de poisson frais ou congelé et de mollusques furent de beaucoup supérieures à celles des sept premiers mois de 1949. L'écoulement d'un surplus de poisson salé de Terre-Neuve, production de 1949, a aussi contribué à l'augmentation pour l'année courante.
