MONTHLY REVIEW
OF
CANADIAN FISHERIES STATISTICS
MAY 1953

In MAY landings and landed values in the sea-fisheries of CANADA (not including Newfoundland) amounted to 131,235,000 lb. and \$7,968,000 -- the quantity being lower by 16.2 p.c., the value by 1.0 p.c. in comparison with the figures for May, 1952.

Total catch and catch values for the first five months of this year -- 270,402,000 lb. and \$15,406,000 -- were 43.7 and 7.8 p.c. lower than for the same period of last year.

The ATLANTIC COAST catch -- 115,964,000 lb. worth \$6,322,000 -- was 16.0 p.c. smaller, but 15.9 p.c. more valuable than that taken in May, 1952. Landings of cod, herring and sardines continue on a lower level than last year, but these losses are more than compensated for by the substantial increases shown in the lobster fishery in all four provinces.

The PACIFIC COAST catch -- 14,271,000 lb. valued at \$1,646,000 -- was 23.1 and 36.4 p.c. lower respectively than the May, 1952 catch. Landings in all the major fisheries were smaller, and the effect of these losses was intensified by the fact that most unit prices also were lower.

EXPORTS of fish and fish products during the first four months of this year amounted to \$33,211,000, a decline of \$5,458,000, or 14.1 p.c., from the comparable 1952 figure. In fact, the only bright spot in the export picture was to be found in the sales of Pacific canned salmon, which jumped to \$4,256,000 from \$1,592,000 in the same period of last year.

On June 1st STOCKS of frozen fish totalled 35,479,000 lb., of which 33,000,000 lb. were frozen fresh and 2,479,000 lb. frozen smoked. The frozen fresh holdings were higher by 2,781,000 lb. than at May 1st. There was an "into-storage" movement of 2.8 million pounds as compared to a similar movement of 5.7 million pounds during May, 1952.

Prepared in the Fisheries Section

of the Industry and Merchandising Division

LANDINGS IN THE SEA FISHERIES OF CANADA

CONTINUED

REVUE MENSUELLE
DE
LA STATISTIQUE DES PÊCHERIES CANADIENNES
MAI 1953

Au CANADA (sans Terre-Neuve), les débarquements de poissons de mer, en MAI, se sont établis à 131,235,000 livres d'une valeur de \$7,968,000. Ces chiffres sont respectivement inférieurs de 16.2 et de 1.0 p. 100 à ceux de mai 1952.

Au cours des cinq premiers mois de l'année, la prise totale et sa valeur ont atteint 270,402,000 libres et \$15,406,000, fléchissement de 43.7 et de 7.8 p. 100 au regard de la période correspondante de l'année dernière.

Sur la COTE DE L'ATLANTIQUE, la prise s'est chiffrée par 115,964,000 livres évaluées à \$6,322,000, soit un volume inférieur de 16.0 p. 100 et une valeur supérieure de 15.9 p. 100 comparativement à mai 1952. Les débarquements de morue, de hareng et de sardines ont diminué par rapport à l'an dernier, mais ces diminutions sont plus que compensées par l'augmentation marquée de la prise de homard dans les quatre provinces.

Sur la COTE DU PACIFIQUE, la prise et sa valeur, établies à 14,271,000 livres et à \$1,646,000, ont baissé respectivement de 23.1 et de 36.4 p. 100 en comparaison de mai 1952. Les débarquements de toutes les principales catégories de poissons ont diminué et la perte en est encore accrue par la baisse de la plupart des prix unitaires.

Les EXPORTATIONS de poisson et de produits du poisson, durant les quatre premiers mois de cette année, ont été évaluées à \$33,211,000, diminution de \$5,458,000 ou de 14.1 p. 100 sur le chiffre correspondant de 1952. En fait, le seul gain enregistré sous la rubrique "exportations" se rencontre dans le saumon en conserve du Pacifique, dont les ventes passent de \$1,592,000 à \$4,256,000.

Au premier juin, les STOCKS de poisson gelé étaient de 35,479,000 livres, dont 33 millions de poisson frais et 2,479,000 de poisson fumé. A la même date, les stocks de poisson gelé frais dépassaient de 2,781,000 livres ceux du 1^{er} mai. La mise en entrepôts a été de 2,800,000 livres contre 5,700,000 en mai 1952.
