SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- ... figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

ABBREVIATIONS

n.e.s.: Not elsewhere specified.

S.I.C.: Standard Industrial Classification.

SYMBOLS CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABRÉVIATIONS

n.c.a.: Non classé(e)s ailleurs.

C.T.I.: Classification type des industries (titre français du système de classification industrielle de 1960).

C.A.É.: Classification des activités économiques (titre français du système de classification industrielle de 1970).

NOTES TO USERS

1. "Explanatory Notes" on selected statistical terms may be found at the back of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.
2. Principal statistics of establishments classified by size group, based on total employed, were omitted from industry reports for the years 1968-1971 and principal statistics of establishments by type of organization were last published in the 1967 industry reports. However, this information is available on request from the Manufacturing and Primary Industries Division. In the case of an extensive request, involving a large number of industries or years, it may be necessary to levy a charge.
3. Users interested in obtaining the value of production (logging activity) can do so by adding cost of materials and supplies used (logging activity), cost of fuel and electricity, and value added (logging activity).

NOTES AU LECTEUR

1. On trouvera à la fin de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.
2. Les tableaux renfermant les statistiques principales des établissements par tranche de taille mesurée par les effectifs ont été supprimés des publications de 1968 à 1971. Les statistiques principales des établissements selon la forme juridique ont été données pour la dernière fois dans les publications de 1967. On peut toutefois obtenir ces renseignements en s'adressant à la Division des industries manufacturières et primaires. Les demandes élaborées visant un grand nombre d'industries ou d'années pourront entraîner la facturation des frais.
3. Il suffit au lecteur qui désire connaître la valeur de la production (activité de l'exploitation forestière) d'additionner le coût des matières et fournitures utilisées (activité de l'exploitation forestière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité de l'exploitation forestière).

SECTION 1

LOGGING S.I.C. 031

EXPLOITATION FORESTIÈRE C.A.F. 031

1974 "

The Logging Industry

The Logging Industry includes establishments primarily engaged in felling and bucking, bunching, yarding, forwarding, decking and loading of roundwood and establishments primarily engaged in the recovery of lost logs including sinkers. Establishments primarily engaged in transporting wood with specialized logging trucks and in driving, booming, sorting, refitting and towing of wood - if not licensed as public carriers - are included also, as are barking mills, engaged in producing barked or rossed pulpwood.

The Logging Industry is divided into two sub-industries, S.I.C. 0311 "Pulpwood Logging" and S.I.C. 0319 "Logging n.e.s.". Section 1 of this report gives the principal statistics at the 3-digit industry level, (the sum of Industries 0311 and 0319) Logging S.I.C. 031, Sections 2 and 3 deal with the sub-industries. Statistics at this level of aggregation (the 4-digit industry level) are not available prior to 1970. Users who wish to make year to year comparisons in detail on the old (3-digit industry level) basis would have to add the comparable statistics from Sections 2 and 3 together.

Estimates of Total Forest Production

The Estimates of Total Forest Production by Products and by Provinces are shown in Table 2 of this section. These data cannot be apportioned to the 4-digit industries. The category Logs and Holts in this Table includes considerable quantities of logs which will be used as pulpwood and as a consequence the category pulpwood appears to be smaller than it ought to be. This is due to the fact that many integrated operations in reporting production and deliveries do not distinguish between sawlogs, veneer logs and pulpwood. While this is most prevalent in British Columbia a similar practice is developing in some of the other provinces.

Unit of Measure

Prior to the 1970 issue several units of measure (M ft. b.m., cords, M cubic feet, number of pieces) were used in reporting quantities of roundwood. As the cunit (100 cubic feet of solid wood) is a more exact measure of volume it has gradually become the most common unit of measure. Therefore, in this issue, all estimates of roundwood production and roundwood shipments are shown in cunits. Conversion factors are given in Table 3 of this section. (A cunit equals 100 cubic feet of solid wood).

L'industrie de l'exploitation forestière

L'industrie de l'exploitation forestière comprend les établissements dont l'activité principale est l'abattage et le tronçonnage, l'emilage, le cubage, l'expédition et le chargement de grumes et les établissements dont l'activité principale est la récupération des billes perdues, y compris des billes immergées. Les établissements dont l'activité principale est le transport du bois par camions grumiers, ainsi que le flottage, le guidage, le tri, le flottage en traine et le remorquage du bois entrent également sous cette rubrique (sauf s'il s'agit d'établissements détenant une licence de transporteur public), de même que les entreprises d'écorçage qui s'occupent de la production de bois à pâte complètement ou partiellement écorcé.

L'industrie de l'exploitation forestière est divisée en deux industries: l'industrie 0311 de la C.A.F. intitulée "Exploitation forestière - Bois à pâte" et l'industrie 0319 de la C.A.F. "Exploitation forestière, n.c.a.". La première partie de cette publication nous donne les statistiques principales au niveau de l'industrie à trois chiffres (l'addition des industries 0311 et 0319) ce qui correspond à l'industrie de l'exploitation forestière sur la base de la C.A.F. 031. Les deuxième et troisième parties nous présentent les deux nouvelles industries. Au niveau des industries à quatre chiffres, on possède des statistiques à partir de l'année 1970, les années antérieures ne sont pas disponibles. Les usagers qui désirent comparer ces données aux données des années précédentes doivent additionner les chiffres des tableaux similaires des sections 2 et 3.

Estimations de la production forestière totale

Les estimations de la production forestière totale par produit et par province sont données au tableau 2. Une répartition de ces données au niveau des industries à quatre chiffres, n'est pas possible. Dans ce tableau de grandes quantités de bois à pâte sont incluses avec les billes et les billots. Ceci s'explique du fait que de nombreux établissements en Colombie-Britannique ont intégré les opérations de production de billes de sciage, de billes de déroulage et de bois à pâte, et ne tiennent pas de comptes séparés pour ces produits; ils les produisent et les expédient plutôt comme billes et billots, et le tri se fait aux usines de fabrication. Ceci se produit sur une moins vaste échelle, mais de plus en plus, dans d'autres provinces par suite du plus grand nombre d'exploitations où l'on apporte l'arbre sur toute sa longueur à l'usine, pour en extraire les billes de sciage et le bois à pâte.

Unité de mesure

Avant l'année 1970 on employait plusieurs unités de mesure (m.p.m.p., corde, millier de pieds cubes, nombre) pour déclarer les quantités de bois rond. Comme l'unité de 100 pi³ (100 pieds cubes de bois solide) représente une mesure plus exacte, il fut devenu graduellement l'unité de mesure la plus commune. Par conséquent, dans cette publication, toutes les estimations de la production de bois rond et des livraisons de bois rond sont rapportées en unités de 100 pi³. ~~Il est préférable de consulter le tableau 3 de cette partie pour obtenir les facteurs de conversion appropriés.~~

de bois solide.

TABLE 1. PRINCIPAL STATISTICS, 1964-1974

TABLEAU 1. STATISTIQUES PRINCIPALES, 1964-1974

Year and province — Année et province	Establishments — Établissements	Logging activity — Activité de l'exploitation forestière							Total activity — Activité totale

SECTION 2

PULPWOOD LOGGING
S.I.C. 0311

EXPLOITATION FORESTIÈRE - BOIS À PÂTE
C.A.É. 0311

1974 "

This industry resulted from the sub-division, beginning with 1970, of the three-digit industry "Logging" - S.I.C. 031. As its name implies, it includes establishments primarily engaged in pulpwood operations. British Columbia has no establishments coded in this industry, (see explanation in Section 3).

Production of pulpwood East of the Rockies increased from 14,966,000 cuunits in 1973 to 16,963,000 cuunits in 1974 or by 13.3%. This increase in production resulted from a demand by domestic pulp and paper mills for more pulpwood. A trend towards less exports of round-wood continued in 1974 with exports of pulpwood down by 24,000 cuunits from 1973 (448,000 cuunits in 1973 to 424,000 cuunits in 1974).

Imports of pulpwood increased from 120,000 cuunits in 1973 to 230,000 cuunits in 1974.

La création de cette industrie n'est en fait que le résultat d'une ségrégation effectuée, à partir de 1970, au niveau de l'industrie à trois chiffres 031 auparavant connue sous le titre "Exploitation forestière". Comme le nom l'indique, cette industrie comprend les établissements dont l'activité principale consiste dans l'exploitation forestière du bois à pâte. La Colombie-Britannique n'a pas d'établissements dans cette industrie. (Voir section 3 pour l'explication).

La production de bois à pâte à l'est des Rocheuses a augmenté de 14,966,000 unités de cent pieds cubes en 1973 à 16,963,000 unités de cent pieds cubes en 1974 ou par 13.3 %. On attribue cet accroissement de la production à une demande plus abondante de la part des usines de pâtes et papiers domestiques. La tendance des années antérieures vers une diminution des exportations de bois ronds continue de s'accentuer en 1974; les exportations de bois à pâte ont en effet baissé de 24,000 unités de cent pieds cubes en 1973 (448,000 unités de cent pieds cubes en 1973 par rapport à 424,000 unités de cent pieds cubes en 1974).

Les importations de bois à pâte ont augmenté de 120,000 unités de cent pieds cubes en 1973 par rapport à 230,000 unités de cent pieds cubes en 1974.

LOGGING, N.E.S.
S.I.C. 0319

EXPLOITATION FORESTIÈRE, N.C.A.
C.A.É. 0319

1974

The industry Logging, n.e.s. (S.I.C. 0319) resulted from the sub-division of Industry 031, Logging. Beginning with 1970 those establishments whose major activity was logging - other than pulpwood logging - have been assigned to this four-digit industry (S.I.C. 0319).

Due to the many integrated operations in British Columbia it is impossible to determine, at the primary level (Logging), whether the roundwood will be used as logs, veneer logs or pulpwood. Accordingly, all logging establishments in this province are coded to Industry 0319 - "Logging, n.e.s.".

In Table 7A, data for Saskatchewan and Alberta are combined due to the confidentiality of certain commodity data in each area. Statistics for British Columbia Coast and British Columbia Interior are published separately. Establishments in Newfoundland and Manitoba report on "short forms". Therefore no commodity data are available for these provinces. Prince Edward Island, Yukon and Northwest Territories had no establishments coded to this industry in 1973 and 1974.

The large decreases in quantities of logs and bolts produced and shipped in 1974 are due mainly to major cut-backs in British Columbia because of reduced lumber production. To a lesser extent, this is true of most of the other provinces.

L'industrie Exploitation forestière, n.c.a. (C.A.É. 0319) est une sous-division de l'industrie 031. Cette industrie de quatre chiffres comprend les établissements dont l'activité principale est l'exploitation forestière de bois rond à l'exception du bois à pâte.

En Colombie-Britannique, on inclut le bois à pâte avec les billes et les billots. Ceci s'explique du fait que dans cette province de nombreux établissements intégrés produisent du même coup des billes de sciage, des billes de déroulage et du bois à pâte, et ne peuvent pas en tenir compte séparément. Ces produits sont expédiés comme billes et billots et le tri se fait aux usines de fabrication. Par conséquent tous les établissements de la Colombie-Britannique sont inclus dans l'industrie 0319.

Les données sur les livraisons de bois rond de l'industrie de l'exploitation forestière, au tableau 7A, sont réunies pour la Saskatchewan et l'Alberta vu le caractère confidentiel de certaines données concernant les marchandises dans chaque région. Les statistiques pour la côte et pour l'intérieur de la Colombie-Britannique sont données séparément. Les établissements situés à Terre-Neuve et au Manitoba ont reçu des "questionnaires abrégés". C'est pourquoi aucune donnée en détail n'est disponible pour ces provinces. L'Île-du-Prince-Édouard, le Yukon et les Territoires du Nord-Ouest n'avaient pas d'établissements dans cette industrie, en 1973 et 1974.

Les diminutions des quantités de billes et billots abattus et livrés en 1974 sont dues au fait que la production de bois de sciage en Colombie-Britannique a subi une baisse importante. Les autres provinces par contre ont subi des diminutions moins prononcées.

TABLE I. PRINCIPAL STATISTICS, 1970-1974

EXPLANATORY NOTES

NOTES EXPLICATIVES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment

Smallest operating unit capable of reporting certain specified input and output data. The number of establishments represents the number of operating units that are principally engaged in logging activities. These units do not represent the total number engaged in logging operations. Numerous logging operations are conducted by establishments classified to other industries (e.g., the sawmill industry) and by farmers and other individuals.

Employees

(a) Production and related workers - Logging activity

In addition to those engaged in production, they include employees engaged in maintenance, repair, janitorial, cooking and watchman services and working foremen engaged in similar work to that of the employees they supervise. The average number of production and related workers engaged in logging is calculated by dividing the reported number of man-days paid during the year by 240 in British Columbia and 270 (250 after 1972) in the other provinces. The number of man-hours paid is calculated on the basis of 8 hours per day in British Columbia and 9 hours per day in other provinces. It should be noted that the division of hours paid into production and related workers payrolls results in average hourly earnings and does not represent hourly wage rates which are collected and published by the Department of Labour and which are based on selected occupations.

(b) Production and related workers - Non-logging activities

Such employees include those on logging establishments' payrolls engaged in activities such as construction undertaken for the use of those establishments and any other production workers who are not engaged in logging-type operations.

(c) Administrative and office employees

This category includes all executive and supervisory officials such as presidents, vice-presidents, comptrollers, secretaries, managers, etc., together with managers, professional, technical and research employees, superintendents, supervisors above the working foreman level, clerical staffs, scalers and employees in activities such as purchasing, personnel, legal, medical, etc.

(d) Total employees

The numbers of employees included under categories (a), (b) and (c) are reported in the form of annual averages and represent as closely as possible full time employment; adjustments are made when reported figures indicate the existence of part time or seasonal employment.

Working Owners or Partners

These are not included in the statistics of employees and salaries and wages. There is some duplication in numbers when a person owns more than one establishment and is reported as a working owner on each Census return.

Salaries and Wages

Salaries and wages refer to gross earnings of employees before deductions for income tax and employees' contributions to social services such as sickness, accident and unemployment insurance, pensions, etc. They include all salaries, wages, bonuses, profits shared with employees, the value of room and board where provided, commissions (paid to regular employees only) as well as any other allowance forming part of the worker's earnings. Payments for overtime are included.

Fuel and Electricity

Figures for fuel refer to amounts purchased (including fuel for cars, trucks, locomotives, etc.). Any fuel and electricity produced by establishments for internal consumption are not included in the total cost. Values represent laid down cost at the establishment (including freight, duty, etc.). Although fuel and electricity is considered part of logging activity statistics it would be misleading

Les notes abrégées ci-après traitent seulement de points saillants ou de certaines inclusions ou restrictions qui ne sont peut-être pas évidents. On peut se procurer sur demande les "Concepts et définitions" détaillés, voir "Notes au lecteur".

Établissement

La plus petite unité exploitante pouvant fournir certaines données sur les entrées et les sorties. Le nombre d'établissements représente le nombre d'unités d'exploitation engagées principalement dans les activités de l'exploitation forestière. Ces unités ne représentent pas toutes celles qui sont engagées dans les opérations d'exploitation forestière. Plusieurs exploitations forestières sont dirigées par des établissements classés dans d'autres industries (par ex., les scieries) et par des cultivateurs et autres individus.

Salariés

a) Ouvriers de la production et assimilés - Activité de l'exploitation forestière

En plus de ceux qui s'adonnent à la production, ce groupe comprend les ouvriers de l'entretien, des réparations, de la conciergerie, les marmiteurs, les gardiens et les contremaîtres actifs qui font le même travail que les employés qu'ils dirigent. Le nombre moyen des travailleurs de la production et assimilés qui s'adonnent à l'exploitation forestière est calculé en divisant le nombre de jours-hommes déclarés payés durant l'année par 240 en Colombie-Britannique et par 270 (250 après 1972) dans les autres provinces. Le nombre d'heures-hommes payées est calculé sur la base de huit heures par jour en Colombie-Britannique et de neuf heures par jour dans les autres provinces. À noter que, divisée par les heures-hommes rémunérées, la paie des travailleurs de la production et assimilés donne le gain horaire moyen et ne représente pas les salaires horsiers relevés et publiés par le Ministère du Travail et qui se fondent sur un choix de professions.

b) Travailleurs de la production et assimilés - Activité autre que l'exploitation forestière

Parmi ces employés sont ceux qui émergent à la feuille de paie des établissements de l'exploitation forestière et qui sont engagés dans des travaux de construction pour l'usage de ces établissements et tous autres ouvriers de la production qui ne sont pas engagés dans l'exploitation forestière proprement dite.

c) Employés de l'administration et du bureau

Cette catégorie comprend les membres du personnel de direction et de surveillance tels que les présidents, les vice-présidents, les contrôleur, les sacrificateurs, les trésoriers et autres de même que les administrateurs, les professionnels, les techniciens, les chercheurs, les surveillants et les employés de bureau, mesureurs et les employés préposés à l'achat, au personnel, au personnel juridique et médical, et autres.

d) Total des salariés

Le nombre d'employés des catégories a), b) et c) est donné sous forme de moyennes et représente d'autant près que possible un emploi de plein temps; des rectifications sont apportées lorsque les chiffres déclarés indiquent qu'il y a emploi à temps partiel ou saisonnier.

Propriétaires et associés actifs

La statistique des employés et des traitements et salaires s'étend à ces personnes. Il y a quelque double emploi numérique lorsqu'une personne est propriétaire de plus d'un établissement et s'inscrit comme propriétaire actif sur chaque rapport de recensement.

Traitements et salaires

Les traitements et salaires représentent le gain brut des employés avant les déductions d'impôt sur le revenu et les contributions des employés à des services sociaux tels que les assurances maladie, accident et chômage, pensions, etc. Ils comprennent tous les traitements, salaires, bonus, bénéfices partagés avec les employés, la valeur de la chambre et de la pension là où elles sont fournies, les commissions (versées aux employés réguliers seulement) de même que toute autre allocation faisant partie de la rémunération du travailleur. La rémunération pour temps supplémentaire est incluse.

Combustible et électricité

Les chiffres relatifs au combustible désignent les quantités achetées (y compris le combustible ou le carburant pour les voitures, les camions, les locomotives, etc.). Le combustible et l'électricité produits par les établissements pour consommation interne ne sont pas inclus dans le coût total. Les valeurs représentent le coût à l'établissement, y compris le transport, la livraison, etc. alors que le combustible et l'électricité doivent toutefois être

it also includes relatively small amounts used in non-logging activities since these cannot be reported separately.

Materials and Supplies - Logging activity

Figures represent quantities and laid down cost values, at the establishment, of materials and supplies purchased during the year for use in logging activities and related processes. This includes purchases of food, van supplies, etc., as well as payments for stumpage and royalties. These statistics represent only commodity items or physical goods (cost of services or overhead charges such as advertising, insurance, depreciation, etc., are not included) whether purchased from others or received as transfers from other establishments of the reporting company. Included are maintenance and repair supplies not chargeable to fixed assets accounts and any amounts paid to others for logging work done on a contract basis. Cost of repairs or maintenance done by outside contractors are not included.

Value of shipments

These figures represent deliveries of wood produced either by the reporting establishment or by contractors on the basis of a charge to the reporting establishment for work done as well as wood purchased from various sources. Included are revenue from repair work and amounts received in payment for work done on materials owned by other establishments.

All products shipped from the establishment are covered, including transfer shipments to other logging establishments or to log supply divisions, sawmills, shingle mills, veneer and plywood mills, pulp and paper mills, etc., of the reporting firm, when such units are treated as separate establishments. The value of shipments are net of allowances, sales tax, excise taxes and duties, and charges for outward transportation by common or contract carriers. Transportation or delivery expense incurred by the reporting establishment's own carriers are included.

Value Added

(a) By logging activities

Figures are compiled by deducting the cost of the purchases of logging materials, supplies, etc. and fuel and electricity from the value of shipments (adjusted for changes in the value of inventories).

(b) By total activities

Consists of (1) value added, logging activity and (2) value added, non-logging activity. The latter is calculated by subtracting relevant commodity inputs from non-logging revenues or output; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-logging revenues include depreciable fixed assets produced by own work force for own use, revenue from sale of purchased wood residue (wood chips, etc.) but exclude non-operating revenue such as real property rentals, dividends, interest.

Inventories

Values represent the book values of inventories owned in Canada. This may include wood in transit in Canada. Opening inventories may differ from the closing inventories of the previous year because of changes in classification, the receipt of revised data, the inclusion of new establishments and the removal of establishments which did not operate during the survey year.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for logging and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units - Included in the individual industry of the company's largest activity.

faisant partie de l'activité de l'exploitation forestière, il faut remarquer que certaines petites quantités qui ne peuvent être déclarées distinctement servent à des activités autres que l'exploitation forestière.

Matérielles et fournitures - Activité de l'exploitation forestière

Les chiffres représentent les quantités et le coût déclaré, à l'établissement, des matières et fournitures achetées durant l'année pour être utilisées dans l'abattage et les processus assimilés. Ceci comprend les achats de nourriture, les fournitures du magasin, etc., aussi bien que les montants versés pour les droits de coupe. Cette statistique ne représente que les articles ou biens matériels (le coût des services ou les frais généraux tels que la publicité, les assurances, l'amortissement, etc. ne sont pas inclus) qu'ils aient été achetés d'autrui ou reçus à titre de transferts d'autres établissements de la société déclarante. Sont inclus les fournitures d'entretien et de réparation non imputables sur le compte des biens fixes et tous montants versés à d'autres pour de l'exploitation forestière fait à contrat. Le coût des travaux de réparation et d'entretien exécutés par des entrepreneurs de l'extérieur n'est pas inclus.

Valeur des livraisons

Ces chiffres représentent les livraisons de bois produit par l'établissement déclarant, ou par des entrepreneurs contre paiement par cet établissement pour le travail exécuté aussi bien que le bois acheté d'autres sources. Sont incluses les recettes découlant des travaux de réparation et les sommes reçues contre le travail exécuté avec des matières appartenant à d'autres établissements.

Tous les produits livrés de l'établissement sont couverts, y compris les transferts à d'autres établissements d'abattage ou divisions d'approvisionnement en billes, scieries, moulins à bardeaux, usines de placages et contre-plaqués, usines de pâtes et papiers, etc. de la société déclarante, lorsque ces unités sont déclarées comme établissements distincts. La valeur des livraisons ne comprend pas, les laissées pour compte, la taxe de vente, les taxes et droits d'accise, et les frais de transport vers l'extérieur par des transporteurs publics ou à forfait. Les frais de transport ou de livraison des transporteurs de l'établissement sont compris.

Valeur ajoutée

a) Activité de l'exploitation forestière

Les chiffres sont obtenus par soustraction du coût des achats de matières servant à l'exploitation forestière, fournitures, etc. et combustible et électricité de la valeur des livraisons (ajustée pour tenir compte des variations de la valeur des stocks).

b) Activité totale

Réunit (1) la valeur ajoutée pour l'activité aux établissements forestiers et (2) la valeur ajoutée par l'activité autre que l'exploitation forestière. On calcule cette dernière en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité autre que l'exploitation forestière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité autre que l'exploitation forestière comprennent les éléments d'actif dépréciables produits par la main-d'œuvre de l'établissement pour l'usage de l'établissement, les recettes de vente des déchets de bois achetés (copeaux, etc.) mais non les recettes autres que les recettes d'exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Stocks

Les valeurs sont les valeurs comptables des stocks possédés au Canada. Ceci peut comprendre le bois en transit au Canada. Les stocks d'ouverture différeront peut-être de ceux de fermeture de l'année précédente en raison des modifications apportées à la classification, à la réception de chiffres révisés, à l'inclusion de nouveaux établissements et au retrait d'établissements qui n'ont pas été en activité durant l'année observée.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", "le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité de l'exploitation forestière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires - Classés avec l'industrie qui représente l'activité principale de la société.
