NOTES TO USERS

NOTES AU LECTEUR

1. Explanatory Notes

"Explanatory Notes" on selected statistical terms may be found on page 69 of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.

2. Deletion of Establishments without Employees

With relatively few exceptions, establishments which in previous censuses did not report payment of salaries and wages (and, by inference, had no employment) were not surveyed in the 1975 Census of forestry. Although this involved deleting a total of 155 establishments, they accounted for only 0.16% of the shipments of the logging industries in 1974. Except for the number of establishments, the effect of this change on historical comparability of census data is marginal.

3. Effect of Small-Establishment Reporting on Fuel and Electricity Statistics

Users should note that information on the cost of fuel and electricity is not collected separately for small establishments but is included in "cost of materials and supplies", beginning with 1970. Although this does not affect the calculation of "value added", it does underestimate the value of fuel and electricity, especially in those industries and provinces where small establishments account for a significant proportion of the total.

4. Changes in Data on Working Owners and Partners, and Withdrawals

Questions on the number of working owners and partners were dropped from the short form (for small establishments) in 1970. A study of past data showed that, for each establishment reporting withdrawals, it would be sufficiently accurate to impute one working owner for each establishment classified as an "individual ownership" and two working owners or partners for each establishment classified as a "partnership". (By definition, working owners and partners do not exist in the other types of business organization.) Due to difficulties in collecting consistent, reliable information on withdrawals, this question was deleted from both the long and short forms in 1975 (the data themselves were last published for 1973). Beginning with 1975, the imputation of numbers of working owners and partners for short-form respondents has been made solely on the basis of type of organization. This change results in an apparent increase in the number of working owners and partners as, in the past, not every establishment classified as an individual ownership or a partnership reported withdrawals every year. Numbers of working owners and partners for long-form respondents (sent to large establishments) have been taken as reported for all years.

5. Value of Production

Users interested in obtaining the value of production (logging activity) can do so by adding cost of materials and supplies used (logging activity), cost of fuel and electricity, and value added (logging activity).

1. Notes explicatives

On trouvera à la page 69 de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.

2. Suppression des établissements sans salariés

À quelques exceptions près, les établissements qui n'ont pas déclaré de traitements ni de salaires aux recensements précédents (donc aucun salarié), n'ont pas été pris en compte au recensement des forêts de 1975. Ces 155 établissements hors de l'enquête ne sont cependant intervenus que pour 0.16 % des livraisons des industries de l'exploitation forestière en 1974. Sauf pour ce qui est du nombre d'établissements, les répercussions de cette modification sur la comparabilité chronologique des données du recensement sont minimes.

3. Répercussions des déclarations des petits établissements sur les statistiques du combustible et de l'électricité

Le lecteur remarquera que les renseignements concernant le coût du combustible et de l'électricité ne sont pas recueillis à part auprès des petits établissements mais inclus, depuis 1970, dans le "coût des matières et fournitures". Bien que cette pratique n'influe pas sur le calcul de la "valeur ajoutée", elle entraîne une sous-estimation de la valeur du combustible et de l'électricité dans les industries et les provinces où les petits établissements en consomment une part importante.

4. Modifications aux données sur les propriétaires et associés actifs, et retraits

À partir de 1970, les questions relatives aux propriétaires et associés actifs ont été supprimées de la formule abrégée (destinée aux petits établissements). En revoyant les données antérieures, nous avons constaté que, dans le cas des établissements déclarant des retraits, il suffirait d'imputer un propriétaire actif à chaque établissement "à propriétaire unique" et deux propriétaires ou associés actifs à chaque "société en nom collectif". (Par définition, les propriétaires et associés actifs n'existent pas dans les autres genres d'entreprise.) Étant donné qu'il est difficile de recueillir des renseignements uniformes et fiables sur les retraits, cette question a été supprimée en 1975 des questionnaires longs et abrégés (les données ont été publiées pour la dernière fois en 1973). À partir de 1975, le nombre de propriétaires et d'associés actifs, dans le cas des enquêtes sur la formule abrégée, est imputé uniquement selon la forme juridique. Cette modification se traduit par une augmentation apparente du nombre de propriétaires et d'associés actifs puisque, dans le passé, les établissements "à propriétaire unique" et ceux classés comme "société en nom collectif" n'ont pas tous déclaré des retraits chaque année. Pour les enquêtes utilisant la formule longue (envoyée aux grands établissements), le nombre de propriétaires et d'associés actifs est égal au chiffre indiqué chaque année.

5. Valeur de la production

Le lecteur qui désire connaître la valeur de la production (activité de l'exploitation forestière), n'a qu'à additionner le coût des matières et fournitures utilisées (activité de l'exploitation forestière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité de l'exploitation forestière).

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- R revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- R nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABBREVIATIONS

Ottawa	(992-4734)

NOTA

Toutes demandes de renseignements sur la présente publication doivent être adressées à la Section des forêts de la Division des industries manufacturières et primaires, à Ottawa, (992-2371); ou à M. T. Laanemae, agent de liaison, Section des forêts, à Vancouver (604-666-3691); ou à un bureau local de la division de l'assistance-utilisateurs situé aux endroits suivants:

Toronto	(966-6574)
Winnipeg	(985-3257)
Regina	(569-5403)
Edmonton	(425-5052)
Vancouver	(666-3594)

SECTION 1

LOGGING
S.I.C. 031

EXPLOITATION FORESTIÈRE
C.A.É. 031

1975

The Logging Industry

The Logging Industry includes establishments primarily engaged in felling and bucking, bunching, yarding, forwarding, decking and loading of round wood and establishments primarily engaged in the recovery of lost logs including sinkers. Establishments primarily engaged in transporting wood with specialized logging trucks and in driving, booming, sorting, rafting and towing of wood, if not licensed as public carriers - are included also, as are barking mills, engaged in producing barked or rossed pulpwood.

The Logging Industry is divided into two sub-industries, S.I.C. 0311 "Pulpwood Logging" and S.I.C. 0319 "Logging, n.e.s.". Section 1 of this report gives the principal statistics at the three-digit industry level (the sum of industries 0311 and 0319) Logging S.I.C. 031, Sections 2 and 3 deal with the sub-industries. Statistics at this level of aggregation (the four-digit industry level) are not available prior to 1970. Users who wish to make year-to-year comparisons in detail on the old three-digit industry level basis would have to add the comparable statistics from Sections 2 and 3 together.

Estimates of Total Forest Production

The "estimates of total forest production by products and by provinces" are shown in Table 2 of this section. These data cannot be apportioned to the four-digit industries. The category logs and bolts in this table includes considerable quantities of logs which will be used as pulpwood and as a consequence the category pulpwood appears to be smaller than it ought to be. This is due to the fact that many integrated operations in reporting production and deliveries do not distinguish between sawlogs, veneer logs and pulpwood. While this is most prevalent in British Columbia a similar practice is developing in some of the other provinces.

In many provinces the production of poles and pilings, round mining timber and fence posts cannot be properly identified and are reported under logs and bolts and/or miscellaneous round wood, as a result these individual products are understated. In order to avoid improper interpretation of the data all these products are, beginning with this issue, included with miscellaneous round wood or with logs and bolts.

Units of Measure

Beginning with this issue all quantities of round wood are shown in both cunits (100 cubic feet of solid wood) and in thousands of cubic metres. A cunit is equal to .002832 thousand cubic metres.

L'industrie de l'exploitation forestière

L'industrie de l'exploitation forestière comprend les établissements dont l'activité principale est l'abattage et le tronçonnage, l'empilage, le cubage, l'expédition et le chargement de grumes et les établissements dont l'activité principale est la récupération des billes perdues, y compris des billes immergées. Les établissements dont l'activité principale est le transport du bois par camions grumiers, ainsi que le flottage, le guidage, le tri, le flottage en trains et le remorquage du bois entrent également sous cette rubrique (sauf s'il s'agit d'établissements détenant une licence de transporteur public), de même que les entreprises d'écorçage qui s'occupent de la production de bois à pâte complètement ou partiellement écorcé.

L'industrie de l'exploitation forestière est divisée en deux industries: l'industrie 0311 de la C.A.É. intitulée "Exploitation forestière - Bois à pâte" et l'industrie 0319 de la C.A.É. "Exploitation forestière, n.c.a.". La première partie de cette publication nous donne les statistiques principales au niveau de l'industrie à trois chiffres (l'addition des industries 0311 et 0319) ce qui correspond à l'industrie de l'exploitation forestière sur la base de la C.A.É. 031. Les deuxième et troisième parties nous présentent les deux nouvelles industries. Au niveau des industries à quatre chiffres, on possède des statistiques à partir de l'année 1970, les années antérieures ne sont pas disponibles. Les usagers qui désirent comparer ces données aux données des années précédentes doivent additionner les chiffres des tableaux similaires des sections 2 et 3.

Estimations de la production forestière totale

Les "estimations de la production forestière totale par produit et par province" sont données au tableau 2. Une répartition de ces données au niveau des industries à quatre chiffres, n'est pas possible. Dans ce tableau de grandes quantités de bois à pâte sont incluses avec les billes et les billots. Ceci s'explique du fait que de nombreux établissements en Colombie-Britannique ont intégré les opérations de production de billes de sciage, de billes de déroulage et de bois à pâte et ne tiennent pas de comptes séparés pour ces produits; ils les produisent et les expédient plutôt comme billes et billots, et le tri se fait aux usines de fabrication. Ceci se produit sur une moins vaste échelle, mais de plus en plus, dans d'autres provinces par suite du plus grand nombre d'exploitations où l'on apporte l'arbre sur toute sa longueur à l'usine, pour en extraire les billes de sciage et le bois à pâte.

Dans de nombreuses provinces, la production de poteaux et de pilotis, d'étais de mines ainsi que de piquets de clôture ne peut faire l'objet d'une ventilation rigoureuse et figure donc sous la rubrique billes et billots et(ou) bois rond divers; par conséquent, les chiffres de ces produits sont sous-évalués. Pour éviter une interprétation fautive des données, on groupera dorénavant tous ces produits sous la rubrique bois rond divers ou billes et billots.

Unités de mesure

Désormais, toutes les quantités de bois rond seront exprimées en cunits (100 pieds cubes de bois solide) et en milliers de mètres cubes. Une unité de 100 pi³ correspond à .002832 millier mètre cube.

SECTION 2

PULPWOOD LOGGING S.I.C. 0311

EXPLOITATION FORESTIÈRE - BOIS À PÂTE C.A.É. 0311

1975

This industry resulted from the sub-division, beginning with 1970, of the three-digit industry "Logging" - S.I.C. 031. As its name implies, it includes establishments primarily engaged in pulpwood operations. British Columbia has no establishments coded to this industry (see explanation in Section 3).

Production of pulpwood East of the Rockies decreased from 16,963,000 cunits - 48 034 thousand m³ (cubic metres) in 1974 to 13,089,000 cunits - 37 063 thousand m³ (cubic metres) in 1975 or by 22.8%. A trend towards less exports of round wood continued in 1975 with exports of pulpwood down by 90,000 cunits - 225 thousand m³ (cubic metres) from 424,000 cunits - 1 201 thousand m³ (cubic metres) in 1974 to 334,000 cunits - 946 thousand m³ (cubic metres) in 1975.

Imports of pulpwood decreased from 230,000 cunits - 651 thousand m³ (cubic metres) in 1974 to 196,000 cunits - 555 thousand m³ (cubic metres) in 1975.

Statistics for Manitoba, Saskatchewan and Alberta are combined due to the confidentiality of certain data in each area.

Change in Basis of Reporting in 1975

As indicated in the "Notes to Users" on the inside front cover, most small establishments which did not report salaries and wages in 1974 were not surveyed in the 1975 Census of Forestry. Although the omission of such establishments had little or no effect in many industries, it does affect to some extent the historical comparability of data for "Pulpwood Logging".

In order to provide an indication of the probable effect of this change on 1975 census data for this industry, the following table on selected items from the 1974 census may be of interest:

La création de cette industrie n'est en fait que le résultat d'une ségrégation effectuée, à partir de 1970, au niveau de l'industrie à trois chiffres 031 auparavant connue sous le titre "Exploitation forestière". Comme le nom l'indique, cette industrie comprend les établissements dont l'activité principale consiste dans l'exploitation forestière du bois à pâte. La Colombie-Britannique n'a pas d'établissements dans cette industrie (voir section 3 pour l'explication).

La production de bois à pâte à l'est des Rocheuses a diminué de 16,963,000 unités de cent pieds cubes - 48 034 milliers de m³ (mètres cubes) en 1974 à 13,089,000 unités de cent pieds cubes - 37 063 milliers de m³ (mètres cubes) en 1975 ou par 22.8 %. La tendance des années antérieures vers une diminution des exportations de bois rond continue de s'accentuer en 1975; les exportations de bois à pâte ont en effet baissé de 90,000 unités de cent pieds cubes - 225 milliers de m³ (mètres cubes) en 1975 de 424,000 unités de cent pieds cubes - 1 201 milliers de m³ (mètres cubes) en 1974 par rapport à 334,000 unités de cent pieds cubes - 946 milliers de m³ (mètres cubes) en 1975.

Les importations de bois à pâte ont diminué de 230,000 unités de cent pieds cubes - 651 milliers de m³ (mètres cubes) en 1974 par rapport à 196,000 unités de cent pieds cubes - 555 milliers de m³ (mètres cubes) en 1975.

Les données sont réunies pour le Manitoba, la Saskatchewan et l'Alberta vu le caractère confidentiel de certaines données dans chaque région.

Modification de la base de déclaration en 1975

Comme nous l'avons indiqué dans les "Notes au lecteur" au verso de la couverture, la plupart des petits établissements qui n'ont déclaré ni traitements ni salaires en 1974 n'ont pas été pris en compte dans le recensement des forêts de 1975. Bien que leur omission a peu influé sur les chiffres de cette industrie, elle a eu certaines répercussions sur la comparabilité chronologique des données de "l'Exploitation forestière - Bois à pâte".

Dans le but d'indiquer les répercussions possibles de cette modification sur les données du recensement de 1975 pour cette industrie, le tableau ci-dessous présente certains postes tirés du recensement de 1974:

Items — Postes	Number of establish- ments — Nombre d'établis- sements	Number of working owners and partners — Nombre de proprié- taires et associés actifs	Cost of materials and supplies — Coût des matières et fournitures	Value of shipments — Valeur des livraisons	Value added by logging — Valeur ajoutée par l'activité de l'explo- itation forestière
thousands of dollars					
milliers de dollars					
A. Establishments (including those with no salaries and wages) — Établissements (y compris ceux qui n'ont déclaré ni traitements ni salaires)	970	465	470,157	940,532	522,389
B. Establishments (excluding those with no salaries and wages) — Établissements (sauf ceux qui n'ont déclaré ni traitements ni salaires)	919	428	469,380	939,290	521,915
C. Difference — Différence	51	37	777	1,242	473
D. C as a % of A — % de C par rapport à A	5.3	8.0	0.2	0.1	0.1

As part of the continuing programme of Statistics Canada to reduce the reporting burden on small establishments, the number reporting on "short-form" questionnaires in this industry increased from 644, accounting for 3.6% of shipments of goods of own manufacture in 1974, to 659, representing 7.6%, in 1975. Since short-form questionnaires do not ask for commodity detail, the effect of this change is to reduce the quantities and/or values of individual commodities included in Tables 6 and 6A. The distribution of inputs in Table 5 will also be affected.

Dans le cadre du programme permanent de Statistique Canada visant à alléger le fardeau de déclaration des petits établissements, le nombre d'enquêtés qui ont répondu sur formules abrégées au sein de cette industrie a été porté de 644 en 1974 à 659 en 1975, ce qui représente 3.6 % et 7.6 % respectivement des livraisons de produits de propre fabrication. Comme les questionnaires abrégés ne renferment pas de données détaillées sur les produits, cette modification réduit la quantité et (ou) la valeur de certains produits distincts figurant aux tableaux 6 et 6A. La répartition des intrants du tableau 5 sera aussi affectée.

SECTION 3

LOGGING, N.E.S.
S.I.C. 0319

EXPLOITATION FORESTIÈRE, N.C.A.
C.A.É. 0319

1975

The industry Logging, n.e.s. (S.I.C. 0319) resulted from the sub-division of industry 031, Logging. Beginning with 1970 those establishments whose major activity was logging - other than pulpwood logging - have been assigned to this four-digit industry (S.I.C. 0319).

Due to the many integrated operations in British Columbia it is impossible to determine, at the primary level (Logging), whether the round wood will be used as saw-logs, veneer logs or pulpwood. Accordingly, all logging establishments in this province are coded to industry 0319 - "Logging, n.e.s.".

Statistics for Manitoba, Saskatchewan and Alberta are combined due to the confidentiality of certain data in each area. Statistics for British Columbia Coast and British Columbia Interior are published separately. Establishments in Newfoundland and Manitoba report on "short forms". Therefore no commodity data are available for these provinces. Prince Edward Island, Yukon and Northwest Territories had no establishments coded to this industry in 1974 and 1975.

The large decreases in quantities of logs and bolts produced and shipped in 1975 are due mainly to major cut-backs by the wood using industries in British Columbia.

Change in Basis of Reporting in 1975

As indicated in the "Notes to Users" on the inside front cover, most small establishments which did not report salaries and wages in 1974 were not surveyed in the 1975 Census of Forestry. Although the omission of such establishments had little or no effect in many industries, it does affect to some extent the historical comparability of data for Logging, n.e.s.

In order to provide an indication of the probable effect of this change on 1975 census data for this industry, the following table on selected items from the 1974 census may be of interest:

L'industrie Exploitation forestière, n.c.a. (C.A.É. 0319) est une sous-division de l'industrie 031. Cette industrie de quatre chiffres comprend les établissements dont l'activité principale est l'exploitation forestière de bois rond à l'exception du bois à pâte.

En Colombie-Britannique, on inclut le bois à pâte avec les billes et les billots. Ceci s'explique dû au fait que dans cette province de nombreux établissements intégrés produisent du même coup des billes de sciage, des billes de déroulage et du bois à pâte, et ne peuvent pas en tenir compte séparément. Ces produits sont expédiés comme billes et billots et le tri se fait aux usines de fabrication. Par conséquent tous les établissements de la Colombie-Britannique sont inclus dans l'industrie 0319.

Les données sont réunies pour le Manitoba, la Saskatchewan et l'Alberta vu le caractère confidentiel de certaines données dans chaque région. Les statistiques pour la côte et pour l'intérieur de la Colombie-Britannique sont données séparément. Les établissements situés à Terre-Neuve et au Manitoba, ont reçu des "questionnaires abrégés". C'est pourquoi aucune donnée en détail n'est disponible pour ces provinces. L'île-du-Prince-Édouard, le Yukon et les Territoires du Nord-Ouest n'avaient pas d'établissements dans cette industrie, en 1974 et 1975.

Les diminutions des quantités de billes et billots abattus et livrés en 1975 sont dues au fait que la production des industries utilisant le bois en Colombie-Britannique a subi une baisse majeure.

Modification de la base de déclaration en 1975

Comme nous l'avons indiqué dans les "Notes au lecteur" au verso de la couverture, la plupart des petits établissements qui n'ont déclaré ni traitements ni salaires en 1974 n'ont pas été pris en compte dans le recensement des forêts de 1975. Bien que leur omission a peu influé sur les chiffres de cette industrie, elle a eu certaines répercussions sur la comparabilité chronologique des données de l'exploitation forestière, n.c.a.

Dans le but d'indiquer les répercussions possibles de cette modification sur les données du recensement de 1975 pour cette industrie, le tableau ci-dessous présente certains postes tirés du recensement de 1974:

Items — Postes	Number of establish- ments — Nombre d'établis- sements	Number of working owners and partners — Nombre de proprié- taires et associés actifs	Cost of materials and supplies — Coût des matières et fournitures	Value of shipments — Valeur des livraisons	Value added by logging — Valeur ajoutée par l'activité de l'exploi- tation forestière
A. Establishments (including those with no salaries and wages) — Établissements (y compris ceux qui n'ont déclaré ni traitements ni salaires)	2,283	633	1,115,003	1,792,067	698,446
B. Establishments (excluding those with no salaries and wages) — Établissements (sauf ceux qui n'ont déclaré ni traitements ni salaires)	2,179	564	1,113,316	1,788,844	696,923
C. Difference — Différence	104	69	1,687	3,223	1,523
D. C as a % of A — % de C par rapport à A	4.6	10.9	0.2	0.2	0.2

As part of the continuing programme of Statistics Canada to reduce the reporting burden on small establishments, the number reporting on "short form" questionnaires in this industry increased from 1,303, accounting for 4.7% of shipments of goods of own manufacture in 1974, to 1,388, representing 12.7%, in 1975. Since short-form questionnaires do not ask for commodity detail, the effect of this change is to reduce the quantities and/or values of individual commodities included in Tables 6 and 6A. The distribution of inputs in Table 5 will also be affected.

Dans le cadre du programme permanent de Statistique Canada visant à alléger le fardeau de déclaration des petits établissements, le nombre d'enquêtés qui ont répondu sur formules abrégées au sein de cette industrie a été porté de 1,303 en 1974 à 1,388 en 1975, ce qui représente 4.7 % et 12.7 % respectivement des livraisons de produits de propre fabrication. Comme les questionnaires abrégés ne renferment pas de données détaillées sur les produits, cette modification réduit la quantité et (ou) la valeur de certains produits distincts figurant aux tableaux 6 et 6A. La répartition des intrants du tableau 5 sera aussi affectée.

CLASSIFIÉ À CETTE INDUSTRIE POUR LA PREMIÈRE FOIS

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment

Smallest operating unit capable of reporting certain specified input and output data. The number of establishments represents the number of operating units that are principally engaged in logging activities. These units do not represent the total number engaged in logging operations. Numerous logging operations are conducted by establishments classified to other industries (e.g., the sawmill industry) and by farmers and other individuals.

Employees

(a) Production and related workers - Logging activity

In addition to those engaged in production, they include employees engaged in maintenance, repair, janitorial, cooking and watchman services and working foremen engaged in similar work to that of the employees they supervise. The average number of production and related workers engaged in logging is calculated by dividing the reported number of man-days paid during the year by 240 in British Columbia and 270 (250 after 1972) in the other provinces. The number of man-hours paid is calculated on the basis of eight hours per day in British Columbia and nine hours per day in other provinces. It should be noted that the division of hours paid into production and related workers payrolls results in average hourly earnings and does not represent hourly wage rates which are collected and published by the Department of Labour and which are based on selected occupations.

(b) Production and related workers - Non-logging activities

Such employees include those on logging establishments' payrolls engaged in activities such as construction undertaken for the use of these establishments and any other production workers who are not engaged in logging-type operations.

NOTES EXPLICATIVES

Les notes abrégées ci-après traitent seulement de points saillants ou de certaines extensions ou restrictions qui ne sont peut-être pas évidents. On peut se procurer sur demande les "Concepts et définitions" détaillés; voir "Notes au lecteur".

Établissement

La plus petite unité exploitante pouvant fournir certaines données sur les entrées et les sorties. Le nombre d'établissements représente le nombre d'unités d'exploitation engagées principalement dans les activités de l'exploitation forestière. Ces unités ne représentent pas toutes celles qui sont engagées dans les opérations d'exploitation forestière. Plusieurs exploitations forestières sont dirigées par des établissements classés dans d'autres industries (par ex., les scieries) et par des cultivateurs et autres individus.

Salariés

a) Ouvriers de la production et assimilés - Activité de l'exploitation forestière

En plus de ceux qui s'adonnent à la production, ce groupe comprend les ouvriers de l'entretien, des réparations, de la conciergerie, les marmitons, les gardiens et les contremaîtres actifs qui font le même travail que les employés qu'ils dirigent. Le nombre moyen des travailleurs de la production et assimilés qui s'adonnent à l'exploitation forestière est calculé en divisant le nombre de jours-hommes déclarés payés durant l'année par 240 en Colombie-Britannique et par 270 (250 après 1972) dans les autres provinces. Le nombre d'heures-hommes payées est calculé sur la base de huit heures par jour en Colombie-Britannique et de neuf heures par jour dans les autres provinces. A noter que, divisée par les heures-hommes rémunérées, la paie des travailleurs de la production et assimilés donne le gain horaire moyen et ne représente pas les salaires horaires relevés et publiés par le Ministère du Travail et qui se fondent sur un choix de professions.

b) Travailleurs de la production et assimilés - Activité autre que l'exploitation forestière

Parmi ces employés sont ceux qui émargent à la feuille de paie des établissements de l'exploitation forestière et qui sont engagés dans des travaux de construction pour l'usage de ces établissements et tous autres ouvriers de la production qui ne sont pas engagés dans l'exploitation forestière proprement dite.

(c) Administrative and office employees

This category includes all executive and supervisory officials such as presidents, vice-presidents, comptrollers, secretaries, treasurers, etc., together with managers, professional, technical and research employees, superintendents, supervisors above the working foreman level, clerical staffs, scalers and employees in activities such as purchasing, personnel, legal, medical, etc.

(d) Total employees

The numbers of employees included under categories (a), (b) and (c) are reported in the form of annual averages and represent as closely as possible full time employment; adjustments are made when reported figures indicate the existence of part time or seasonal employment.

Working Owners or Partners

These are not included in the statistics of employees and salaries and wages. There is some duplication in numbers when a person owns more than one establishment and is reported as a working owner on each census return.

Salaries and Wages

Salaries and wages refer to gross earnings of employees before deductions for income tax and employees' contributions to social services such as sickness, accident and unemployment insurance, pensions, etc. They include all salaries, wages, bonuses, profits shared with employees, the value of room and board where provided, commissions (paid to regular employees only) as well as any other allowance forming part of the worker's earnings. Payments for overtime are included.

Fuel and Electricity

Figures for fuel refer to amounts purchased (including fuel for cars, trucks, locomotives, etc.). Any fuel and electricity produced by establishments for internal consumption are not included in the total cost. Values represent laid down cost at the establishment including freight, duty, etc. Although fuel and electricity is considered part of logging activity statistics it should be noted that it also includes relatively small amounts used in non-logging activities since these cannot be reported separately.

c) Employés de l'administration et du bureau

Cette catégorie comprend les membres du personnel de direction et de surveillance tels que les présidents, les vice-présidents, les contrôleurs, les secrétaires, les trésoriers et autres de même que les administrateurs, les professionnels, les techniciens, les chercheurs, les suprinctents et les surveillants d'une classe supérieure à celle des contremaîtres actifs, et les employés de bureau, mesureurs et les employés préposés à l'achat, au personnel, au personnel juridique et médical, et autres.

d) Total des salariés

Le nombre d'employés des catégories a), b) et c) est donné sous forme de moyennes et représente d'autant près que possible un emploi de plein temps; des rectifications sont apportées lorsque les chiffres déclarés indiquent qu'il y a emploi à temps partiel ou saisonnier.

Propriétaires et associés actifs

La statistique des employés et des traitements et salaires s'étend à ces personnes. Il y a quelque double emploi numérique lorsqu'une personne est propriétaire de plus d'un établissement et s'inscrit comme propriétaire actif sur chaque rapport de recensement.

Traitements et salaires

Les traitements et salaires représentent le gain brut des employés avant les déductions d'impôt sur le revenu et les contributions des employés à des services sociaux tels que les assurances maladie, accident et chômage, pensions, etc. Ils comprennent tous les traitements, salaires, bonus, bénéfices partagés avec les employés, la valeur de la chambre et de la pension là où elles sont fournies, les commissions (versées aux employés réguliers seulement) de même que toute autre allocation faisant partie de la rémunération du travailleur. La rémunération pour temps supplémentaire est incluse.

Combustible et électricité

Les chiffres relatifs au combustible désignent les quantités achetées (y compris le combustible ou le carburant pour les voitures, les camions, les locomotives, etc.). Le combustible et l'électricité produits par les établissements pour consommation interne ne sont pas inclus dans le coût total. Les valeurs représentent le coût à l'établissement, y compris le transport, la douane, etc. Bien que le combustible et l'électricité soient considérés comme faisant partie de l'activité de l'exploitation forestière, il faut remarquer que certaines petites quantités qui ne peuvent être déclarées distinctement servent à des activités autres que l'exploitation forestière.

Materials and Supplies - Logging Activity

Figures represent quantities and laid down cost values, at the establishment, of materials and supplies purchased during the year for use in logging activities and related processes. This includes purchases of food, van supplies, etc., as well as payments for stumpage and royalties. These statistics represent only commodity items or physical goods (cost of services or overhead charges such as advertising, insurance, depreciation, etc., are not included) whether purchased from others or received as transfers from other establishments of the reporting company. Included are maintenance and repair supplies not chargeable to fixed assets accounts and any amounts paid to others for logging work done on a contract basis. Cost of repairs or maintenance done by outside contractors are not included.

Value of Shipments

These figures represent deliveries of wood produced either by the reporting establishment or by contractors on the basis of a charge to the reporting establishment for work done as well as wood purchased from various sources. Included are revenue from repair work and amounts received in payment for work done on materials owned by other establishments.

All products shipped from the establishment are covered, including transfer shipments to other logging establishments or to log supply divisions, sawmills, shingle mills, veneer and plywood mills, pulp and paper mills, etc., of the reporting firm, when such units are treated as separate establishments. The value of shipments are net of allowances, sales tax, excise taxes and duties, and charges for outward transportation by common or contract carriers. Transportation or delivery expense incurred by the reporting establishment's own carriers are included.

Value Added

(a) By logging activities

Figures are compiled by deducting the cost of the purchases of logging materials, supplies, etc. and fuel and electricity from the value of shipments (adjusted for changes in the value of inventories).

Matières et fournitures - Activité de l'exploitation forestière

Les chiffres représentent les quantités et le coût débarqué, à l'établissement, des matières et fournitures achetées durant l'année pour être utilisées dans l'abattage et les processus assimilés. Ceci comprend les achats de nourriture, les fournitures du magasin, etc., aussi bien que les montants versés pour les droits de coupe. Cette statistique ne représente que les articles ou biens matériels (le coût des services ou les frais généraux tels que la publicité, les assurances, l'amortissement, etc. ne sont pas inclus) qu'ils aient été achetés d'autrui ou reçus à titre de transferts d'autres établissements de la société déclarante. Sont inclus les fournitures d'entretien et de réparation non imputables sur le compte des biens fixes et tous montants versés à d'autres pour de l'exploitation forestière faite à contrat. Le coût des travaux de réparation et d'entretien exécutés par des entrepreneurs de l'extérieur n'est pas inclus.

Valeur des livraisons

Ces chiffres représentent les livraisons de bois produit par l'établissement déclarant, ou par des entrepreneurs contre paiement par cet établissement pour ce travail exécuté aussi bien que le bois acheté d'autres sources. Sont incluses les recettes découlant des travaux de réparation et les sommes reçues contre du travail exécuté avec des matières appartenant à d'autres établissements.

Tous les produits livrés de l'établissement sont couverts, y compris les transferts à d'autres établissements d'abattage ou divisions d'approvisionnement en billes, scieries, moulins à bardeaux, usines de placages et contre-plaqués, usines de pâtes et papiers, etc. de la société déclarante, lorsque ces unités sont déclarées comme établissements distincts. La valeur des livraisons ne comprend pas, les laissés pour compte, la taxe de vente, les taxes et droits d'accise, et les frais de transport vers l'extérieur par des transporteurs publics ou à forfait. Les frais de transport ou de livraison des transporteurs de l'établissement sont compris.

Valeur ajoutée

a) Activité de l'exploitation forestière

Les chiffres sont obtenus par soustraction du coût des achats de matières servant à l'exploitation forestière, fournitures, etc. et combustible et électricité de la valeur des livraisons (rectifiée pour tenir compte des variations de la valeur des stocks).

(b) By total activities

Consists of (1) value added, logging activity and (2) value added, non-logging activity. The latter is calculated by subtracting relevant commodity inputs from non-logging revenues or output; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-logging revenues include depreciable fixed assets produced by own work force for own use, revenue from sale of purchased wood residue (wood chips, etc.) but exclude non-operating revenue such as real property rentals, dividends, interest.

b) Activité totale

Réunit (1) la valeur ajoutée par l'activité exploitation forestière et (2) la valeur ajoutée par l'activité autre que l'exploitation forestière. On calcule cette dernière en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité autre que l'exploitation forestière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité autre que l'exploitation forestière comprennent les éléments d'actif dépréciables produits par la main-d'œuvre de l'établissement pour l'usage de l'établissement, les recettes de vente des déchets de bois achetés (copeaux, etc.) mais non les recettes autres que les recettes d'exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Inventories

Values represent the book values of inventories owned in Canada. This may include wood in transit in Canada. Opening inventories may differ from the closing inventories of the previous year because of changes in classification, the receipt of revised data, the inclusion of new establishments and the removal of establishments which did not operate during the survey year.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for logging and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units - Included in the individual industry of the company's largest activity.

Stocks

Les valeurs sont les valeurs comptables des stocks possédés au Canada. Ceci peut comprendre le bois en transit au Canada. Les stocks d'ouverture différeront peut-être de ceux de fermeture de l'année précédente en raison des modifications apportées à la classification, à la réception de chiffres revisés, à l'inclusion de nouveaux établissements et au retrait d'établissements qui n'ont pas été en activité durant l'année observée.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", "le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité de l'exploitation forestière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires - Classés avec l'industrie qui représente l'activité principale de la société.
