| Vancouver | (666-3594) |

FOREWORD

The fourth edition of Canadian Forestry Statistics (Revised 1974) reference paper is similar in content to the 1969 edition.

Beginning with 1961 principal statistics of Division 5 (Manufacturing) are based on the Standard Industrial Classification of Industries. A description of definitions and concepts followed in the statistics for the Manufacturing Industries is included in the back of this publication.

Identical concepts have been implemented for Division 2 (Major Group 1 - Logging) of the Standard Industrial Classification but, unlike for Division 5 (Manufacturing) the data on this base are available back to 1963 only. This publication includes logging principal statistics on the old basis for the years prior to 1965 and on the new basis for the years 1963-1974 inclusive, thus providing for a two-year overlap.

There is a considerable difference between the logging statistics on the old basis and those compiled on the new basis. A detailed explanation of these differences is given in the "Revisions to the Logging Statistics" in the 1965 "Logging" publication. This is followed by a chapter "Concepts and Definitions" as applied to the Logging Industry Statistics.

As in the past, the Canadian Forestry Service, Department of the Environment has supplied the forest resources data. These figures have now been up-dated to 1973.

AVANT-PROPOS

La quatrième édition des Statistiques forestières du Canada (rectifiées 1974) documentation est semblable dans son ensemble à l'édition de 1969.

Depuis 1961 les statistiques principales de la branche 5 (industries manufacturières) sont fondées sur la Classification type des industries. Une description des définitions et des concepts utilisés dans la statistique des industries manufacturières, est incluse à la fin de cette publication.

Les concepts identiques s'appliquent à la branche 2 (groupe principal 1 - Exploitation forestière) de la Classification type des industries mais, contrairement à la branche 5 (industries manufacturières) les données sur cette base ne sont continues que depuis 1963. La présente publication renferme les statistiques principales de l'exploitation forestière fondées sur l'ancienne base pour les années avant 1965, et sur la nouvelle base pour les années 1963-1974 inclusivement, ce qui fait une période de chevauchement de deux ans.

Il y a une différence considérable entre les statistiques de l'exploitation forestière fondées sur l'ancienne base et celles établies sur la nouvelle base. Ces différences sont expliquées en détail dans les "Modifications de la statistique de l'exploitation forestière" de la publication "Abattage" de 1965. Ces renseignements sont suivis d'un chapitre sur les "Concepts et définitions" qui s'appliquent à la statistique de l'industrie de l'exploitation forestière.

Comme par le passé, le Service canadien des forêts, ministère de l'Environnement ont fourni les données des ressources forestières. Ces chiffres ont été maintenant mis à jour jusqu'à 1973.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

-- amount too small to be expressed.

^p preliminary figures.

^r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada.

.. nombres indisponibles.

... n'ayant pas lieu de figurer.

- néant ou zéro.

-- nombres infimes.

^p nombres provisoires.

^r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

ABBREVIATIONS

n.e.s.: Not elsewhere specified.

S.I.C.: Standard Industrial Classification.

ABRÉVIATIONS

n.c.a.: Non classé(e)s ailleurs.

C.T.I.: Classification type des industries (titre français du système de classification industrielle de 1960).

C.A.É.: Classification des activités économiques (titre français du système de classification industrielle de 1970).

NATIONAL FOREST INVENTORY

L'INVENTAIRE NATIONAL DES FORÊTS

1973

Forest Land

The 1973 National Forest Inventory reported an area of 1,259,192 sq. miles of forest land. Of this, 59,742 sq. miles are reserved by legislation for primary uses other than timber production.

On the basis of present inventories it is estimated that the balance is comprised of 607,081 square miles of primary forest land, 76,637 square miles of secondary forest land and 515,732 square miles of tertiary forest land. Primary forest land is normally located within 50 miles of a designated or existing major wood conversion center. Secondary forest land is located beyond 50 miles but less than 75 miles and tertiary forest land is more than 75 miles from a wood-using center.

As inventories are refined and extended it can be anticipated that these figures will change.

Tables 1 and 2 show the areas in thousands of acres, of these various categories of forest land by province and territory.

Provincial Crown forest land constitutes 69% of the non-reserved forest land of Canada leaving 23% under federal jurisdiction and 8% in private ownership. Of the provincial forest land, 62% is allocated to timber production while in the case of federal forest land the figure is less than 9%. Precise use of private forest land is a matter of speculation. However, individual studies and limited statistics suggest that timber production still predominates despite a tendency to convert some of this land to recreational use.

Inventories of the forest resources are made periodically by provincial forest authorities and, with their co-operation, the Canadian Forestry Service of the Department of the Environment compiles national statistics. The latest estimates of the merchantable timber, by province, appear in Tables 3 and 4. These estimates are also subject to constant revision as more accurate and complete inventories are compiled.

Terres boisées

L'Inventaire national des forêts de 1973 indique qu'il y avait 1,259,192 milles carrés de terres boisées. De ce nombre, 59,742 milles carrés sont réservés, aux termes de la Loi, à des utilisations premières autres que la production de bois.

En se fondant sur les inventaires actuels, on estime que le reste de la surface boisée comprend 607,081 milles carrés de terres boisées primaires, 76,637 milles carrés de terres boisées secondaires et 515,732 milles carrés de terres boisées tertiaires. Les terres boisées primaires sont normalement situées à moins de 50 milles d'un centre de conversion de bois majeur. Les terres boisées secondaires sont situées entre 50 milles et 75 milles et les terres boisées tertiaires sont à plus de 75 milles d'un centre.

Au fur et à mesure que les inventaires deviennent plus précis et plus complets, il est à prévoir que ces chiffres changeront.

Les tableaux 1 et 2 contiennent la superficie, en milliers d'acres de ces diverses catégories de terres boisées par province et territoire.

Les terres boisées provinciales de la Couronne constituent 69 % des terres boisées non réservées au Canada; le reste relève à 23 % de l'administration fédérale et appartient à 8 % à des propriétaires privés. Les terres boisées provinciales sont consacrées à 62 % à la production de bois, alors qu'au niveau fédéral, ce taux est inférieur à 9 %. L'utilisation précise des terres boisées privées relève uniquement de la supposition. Toutefois, des études particulières et des statistiques restreintes laissent entendre que la production de bois domine toujours même s'il existe une tendance à convertir une partie de ces terres à des utilisations créatives.

Les autorités provinciales font périodiquement des inventaires forestiers et, grâce à leur collaboration, le Service canadien des forêts du ministère de l'Environnement établit des statistiques à l'échelle du pays. Les tableaux 3 et 4 donnent les plus récentes estimations du bois marchand, par province. Ces estimations sont aussi mises à jour à mesure que les inventaires sont plus précis et plus complets.

(1) The figures for depletion do not include wastage caused by agencies other than fire, such as insects, diseases and natural mortality, for which no reliable estimates are available. — Non compris la destruction par des causes autres que le feu, comme insectes, les maladies et la mortalité naturelle, pour lesquelles on ne dispose d'aucune donnée estimative sûre.

(2) Includes some pulpwood. — Y compris du bois à pâte.

(3) Includes fuelwood and wood for charcoal. — Inclus le bois de chauffage et le bois de carbonisation.

| 1974 | 1,409,644 | 1,016,392 | 2,007,876 | 369,657 | 27,659 | 43,837 | 252,898 | 57,591 | |

(1) Plywood - Basis 1/4" sanded two sides for hardwoods and 3/8" unsanded for softwoods. - Contre-plaqués - Base, 1/4" sablé des deux côtés pour bois feuillus et 3/8" non-sablé pour bois résineux.

(2) Softwood veneer all thicknesses prior to 1971, from 1971 on 1/8" basis. - Les placages de bois résineux sont basés sur toutes épaisseurs ayant l'année 1971, depuis l'année 1971 la base est de 1/8" d'épaisseur.

(3) Hardwood veneer - All thicknesses. - Placages de bois feuillus - Quantité en toutes épaisseurs.

TABLE 23A. Shipments of Veneer and Plywood, All Industries, 1961-1974

TABLEAU 23A. Livraisons de placages et de contre-plaqué, toutes industries, 1961-1974

| Year - Année | Veneer(1) — Placages(1) | Plywood(2) — Contre-plaqué(2) | | Veneer — Placages | Plywood — Contre-plaqué | |
|--------------|-----------------------------------|-------------------------------------|-----------------------------------|-------------------------|-----------------------------------|-----------------------------------|
| | | Softwood — Bois résineux | Hardwood — Bois feuillus | | Softwood — Bois résineux | Hardwood — Bois feuillus |
| | | square feet - '000 - pieds carrés | | | | \$'000 |
| 1961 | 1,102,869 | 1,905,873 | | 23,844 | 106,259 | |
| 1962 | 1,437,540 | 2,135,157 | | 27,980 | 127,278 | |
| 1963 | 1,661,047 | 1,433,108 | 364,090 | 31,621 | 106,231 | 37,432 |

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment - Smallest operating unit capable of reporting certain specified input and output data; usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity - Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture - Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes reprise and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters' work on own ore valued at imputed charge to mine.

Value added - Net output as measured by gross output less purchased commodity inputs used and contract work by others.

- (a) Value added, manufacturing activity: Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.
- (b) Value added, total activity: Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages - Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use; beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expenses, certain drivers, etc.

Inventories - Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services, and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity; value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units - Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points salients et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et Définitions" détaillées; se reporter aux "Notes au lecteur".

Établissement - Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Cout des matières et fournitures, du combustible et de l'électricité - De manière générale, concerne uniquement la consommation de produits achetés, au prix franco. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication - Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matière lui appartenant, déduction faite des rabs, des retours de marchandises, dea remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. En ce qui concerne l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, les fabricants de matériel ferroviaire roulant ainsi que l'industrie de construction et réparation de navires, la valeur de la production remplace les livraisons dans les tableaux relatifs aux statistiques principales. Pour déterminer la valeur du travail effectué par une fonderie intégrée sur du minerai lui appartenant, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée - Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

- a) Valeur ajoutée, activité manufacturière: valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.
- b) Valeur ajoutée, activité totale: comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires - Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratrifications, commissions, etc., versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la place de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks - Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", "le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés, et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale; la valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires - Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970).

PUBLICATIONS ON FORESTRY STATISTICS

PUBLICATIONS SUR LA STATISTIQUE FORESTIÈRE

Statistics Canada - Statistique Canada

Ottawa, Canada

Catalogue

Name of publicationTitre de la publication

Annual - Annuelle

- 25-202 Canadian Forestry Statistics - Statistiques forestières du Canada
 36-204 Pulp and Paper Mills - Usines de pâtes et papiers
 36-205 Asphalt Roofing Manufacturers - Fabricants de papier de couverture asphalté
 36-206 Miscellaneous Paper Converters - Transformations diverses du papier
 36-207 Paper and Plastic Bag Manufacturers - Fabricants de sacs en papier et en plastique
 36-213 Manufacturers of Corrugated Boxes - Fabricants de boîtes en carton ondulé
 36-214 Manufacturers of Folding Cartons and Set-up Boxes - Fabricants de cartons pliants et de boîtes montées
 35-204 Sawmills, Planing Mills and Shingle Mills - Scieries, ateliers de rabotage et usines de bardeaux
 35-206 Veneer and Plywood Mills - Fabriques de placages et de contre-plaqué
 35-205 Sash, Door and Other Millwork Plants - Industrie des portes, châssis et autres bois ouvrés
 35-209 Wooden Box Factories - Fabriques de boîtes en bois
 35-210 Coffin and Casket Industry - Industrie des cercueils
 35-208 Miscellaneous Wood Industries - Industries diverses du bois
 25-201 Logging - Exploitation forestière
 31-203 Manufacturing Industries of Canada: National and Provincial Areas - Industries manufacturières du Canada: niveaux national et provincial
 31-211 Products Shipped by Canadian Manufacturers - Produits livrés par les fabricants canadiens

Monthly - Mensuelle

- 35-002 Production, Shipments and Stocks on Hand of Sawmills East of the Rockies - Production, expéditions et stocks en main des scieries à l'est des Rocheuses
 35-003 Production, Shipments and Stocks on Hand of Sawmills in British Columbia - Production, expéditions et stocks en main des scieries en Colombie-Britannique
 35-001 Peeler Logs, Veneers and Plywoods - Billes de déroulage, placages et contre-plaqué
 25-001 Pulpwood and Wood Residue Statistics - Statistiques de bois à pâte et déchets de bois
 11-003 Canadian Statistical Review - Revue statistique du Canada
 31-001 Inventories, Shipments and Orders in Manufacturing Industries - Stocks, livraisons et commandes des industries manufacturières
 65-004 Exports by Commodities - Exportations par marchandises
 65-007 Imports by Commodities - Importations par marchandises
 36-001 Hardboard - Panneaux pressés
 36-002 Rigid Insulating Board - Panneaux isolants rigides
 36-003 Particle Board - Panneaux de particules

In addition to this report, Statistics Canada publishes annual statistics on forest related industries and current statistics on the more important commodities. Copies of reports provided in the above list are available from Publications Distribution, Statistics Canada, Ottawa, K1A 0T6.

En plus de ce rapport, Statistique Canada publie des statistiques annuelles sur les industries connexes forestières et des statistiques courantes sur les marchandises principales. Des exemplaires des rapports compris dans la liste ci-haut mentionnée peuvent être obtenus de la Distribution des publications, Statistique Canada, Ottawa, K1A 0T6.
