Ontario operators reported an output of 192,634 ounces in November, made up of 92,807 ounces from the Kirkland Lake area, 88,650 ounces from the Porcupine camp, and 11,177 ounces from other sources. Barry-Hollinger, Dome, McIntyre, Moss, Parkhill, Teck-Hughes, Toiburn and Vipond reported increased outputs over October. This month's total includes the first shipments from the Ashley mine in the Metachewan area. Shipments from the Munro-Croesus are included for the first time since September, 1931. The Triple Lake mine made a small shipment in November, the first since August, 1932.

Output from British Columbia, Manitoba, the Yukon, Nova Scotia, and Alberta totalled 32,084 ounces; during October these provinces produced 31,919 ounces.

The world gold production in November was estimated by the American Bureau of Metal Statistics at 2,020,000 ounces as compared with 2,033,000 ounces in October. World output during the eleven months ending November aggregated 21,523,000 ounces, of which the Transvaal produced 49.2 per cent, Canada 12.9 per cent, the United States 10.6 per cent, and Russia 6.9 per cent. Transvaal's production amounted to 978,716 ounces as against 974,965 ounces in October and 900,510 ounces in November, 1931. The United States output (including the Philippines) in November declined to 235,000 ounces from the October total of 255,000 ounces. This falling-off was due principally to seasonal conditions.
