Mining Statistician: R. J. McDowall, B.Sc.

MONTHLY REPORT

GOLD PRODUCTION IN CANADA, NOVEMBER, 1945

Gold production during November 1945 totalled 220,755 fine ounces compared with 223,806 fine ounces in November 1944 and 229,550 fine ounces in October 1945. The value of the November 1945 gold production was \$8,499,067.

Of the total gold production for November 1945, 192,071 fine ounces came from auriferous quartz mines and alluvial deposits, and 28,684 fine ounces originated in base metal mines.

Gold production from auriferous quartz mines and placers increased 1.4 per cent in November 1945 as compared with the production from the corresponding sources in November 1944. Production of gold from base metal mines decreased 16.4 per cent in a comparison of the same period.

Employees in producing auriferous quartz mines, including both salaried employees and wage-earners, numbered 17,017 in November 1945; the corresponding total for active non-producing mines was 978. Employees in non-ferrous metal mines, smelters and refineries totalled 27,144.
