

NATURAL GAS - Canadian production of natural gas in September amounted to 1,157,682 thousand cubic feet as compared with 911,982 thousand cubic feet in August and 1,512,228 thousand cubic feet produced in September, 1931.

The drilling into production of the Northwestern Utilities Harvey #2 well in the Kinsella field, Alberta, was an important development in September. It is reported that this well has an open flow of 19,000 thousand cubic feet of dry gas.

In September, imports of mixed gas (natural and artificial) into Canada reached a total of 9,191 thousand cubic feet worth \$6,870, in the preceding month 7,768 thousand cubic feet valued at \$6,113 were imported.
