CRUDE PETROLEUM - Crude petroleum and natural gasoline production in Canada advanced to 288,934 barrels in August from the July total of 241,737 barrels and the August, 1936, output of 142,572 barrels, according to a statement just issued by the Dominion Bureau of Statistics at Ottawa. During the first seven months of 1937 Canada produced 1,592,352 barrels; in the corresponding months of 1936 the production was 966,363 barrels.

Production from Alberta sources amounted to 271,898 barrels as compared with 226,000 barrels in July. The August output was made up of 269,145 barrels from the Turner Valley field, 1,239 barrels from the Red Coulee field, and 1,514 barrels from the Wainwright-Ribstone field.

The Sterling Pacific #5 well was drilled into production with a rotary rig on August 4th at a depth of 7,073 feet. Richland #3 well came into production at a depth of 6,060 feet on August 20th. The latter well was drilled with standard tools and had an initial output ranging from 500 to 600 barrels per day. These two wells are located in the Turner Valley field.

Exports of petroleum and its products from Canada in August were valued at \$197,553; in the preceding month the export valuation was \$183,968.

Petroleum, asphalt and their products imported into Canada in August were appraised at \$6,986,382 or 2.2 per cent above the value of the July receipts. Crude petroleum importations in August declined to 158,566,855 imperial gallons from the previous month's total of 165,480,023 gallons. The United States supplied 74.3 per cent of the August crude receipts; Venezuela, 14.0 per cent; Colombia, 8.9 per cent, and Peru, 2.8 per cent.
