TABLE 1

INDUSTRIAL PRODUCTION

1967-1970

The following table shows the index of industrial production for the years 1967 to 1970. The index is based on the 1967 base year. The index is calculated as the ratio of the value of industrial production in a given year to the value of industrial production in 1967, multiplied by 100. The index is rounded to the nearest integer.

Year	1967	1968	1969	1970
1967	100			
1968		105		
1969			102	
1970				108
