**Alphabetical List of Products Made in  
the Manufacturing Industries  
of Canada, 1930**

*Issued by*  
**DEPARTMENT OF TRADE AND COMMERCE**  
Dominion Bureau of Statistics  
Ottawa, Canada

## Alphabetical List of the Products Reported as having been Manufactured in Canada during 1930

The appended list of the products of Canadian manufacturing industries presents the value and in most cases the quantity of these products in a new and much more detailed form. Heretofore, in presenting statistics of manufacturing production, the whole production of an establishment has been taken as a unit. This has not only prevented the presentation of production figures for specific products in detail, but has involved numerous inaccuracies in the production statistics of classes of commodities, owing to the fact that commodities which may be the major line of production in one establishment may also be products of secondary importance in another establishment where the major line of production puts the establishment into a different class. The statistics which follow, however, have been compiled by taking from the individual returns of each of the 24,000 manufacturing establishments covered, the value and, when given, the quantity of each commodity specified as produced by that establishment. In this way, detailed production figures are obtained for specific commodities and furthermore the total production of each commodity is brought together, no matter how varied may be the operations in different establishments producing it. Nevertheless it should be pointed out to those making use of these figures that there is one element of incompleteness about them. In the returns of many manufacturers products of minor importance are grouped under the name "all other products". As will be seen from the group at the end of the list, the value of products not specified, while they may appear unimportant to the individual manufacturer, are, in the aggregate, a large amount, especially in the industries of the iron and steel group. It is obvious that one manufacturer may consider a product of insufficient importance to report separately for his establishment, while that same product may be reported separately by other establishments. In other words, included in the value of other products not specified at the end of the list, there are doubtless values which, had the products been specified by the manufacturer, would have been included in the values of commodities appearing in the list. However, the products not specified total only about 1.4 per cent in value of the whole manufacturing production, although in the iron and steel group this proportion is 5.5 per cent. With the exception of this group, therefore, the incompleteness of the figures on this account is insignificant.

An analysis of the value of the products of Canadian manufacture, similar to this, was made for the first time from the 1927 returns. In the course of further administrative experience it is hoped that it will be possible to reduce considerably the proportion of the products not specified.

The sum of the values of the commodities as listed here is \$3,428,970,628, which is the gross value of manufacturing production for the year. There is thus no duplication in the listing of products, nor do any of the items include products listed in more detail under another name. It is possible, however, that essentially the same commodity produced in different establishments may have been called by different names; in such a case, which is probably a very rare one, the items would appear separately in the following list.

**Alphabetical List of Products Manufactured in Canada, 1930**

Item.	Unit of Measure.	Quantity.	Value.
Abrasive cloth and abrasive paper	—	—	\$
Abrasive wheels	—	—	546,276
Absorbent cotton	lb.	534,636	272,346
Acetylene	cu. ft.	44,181,816	1,094,999
Acid, acetic, 28%, 80% and 99%	—	—	*
Acid, hydrochloric (muriatic), 20°	—	—	*
Acid, hydrofluosilicic	—	—	*
Acid, lactic	—	—	*
Acid, nitric	—	—	*
Acid, phosphoric	—	—	*
Acid, sulphuric, 66°	lb.	187,825,099	1,138,441
Advertising	—	—	44,780,447
Advertising novelties of all kinds, not specified	—	—	266,016
Aeroplanes and hydroplanes	—	—	1,432,915
Aeroplane parts and supplies	—	—	297,421
Agricultural implements, not elsewhere specified	—	—	609,252
Agricultural implement parts	—	—	2,507,099
Alcohol, denatured	pr. gal.	2,124,085	1,001,731
Alcohol, non-potable	—	1,034,659	422,857
Almond paste	—	—	42,039
Almonds, ground	—	—	*
Alumina, fused	ton	42,894	3,376,908
Aluminum products, not elsewhere specified	—	—	*
Ammonia, anhydrous	—	—	*
Ammonia, aqua	—	—	*
Ammonia liquor	lb.	2,288,080	33,874
Ammonia powder	—	—	199,488
