31-207 ANNUAL

THE MANUFACTURING INDUSTRIES OF CANADA

1956

Section E

PRAIRIE PROVINCES

Published by Authority of
The Honourable Gordon Churchill, Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Industry and Merchandising Division
Central Assembly and Index Section

NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes as follows: **Volume I** — The Primary Industries, including mining, forestry and fishing; **Volume II** — Manufacturing; **Volume III** — Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups:

- I — General Review of the Manufacturing Industries, \$1.50
- II — The Manufacturing Industries of Canada,
(7 sections, see below:)
- III — Foods and Beverages
- IV — Tobacco and Tobacco Products
- V — Rubber Products
- VI — Leather Products
- VII — Textile Mills
- VIII — Knitting Mills
- IX — Clothing
 - X — Wood and Paper Products
 - XI — Printing Trades
- XII — Iron and Steel Products
- XIII — Transportation Equipment
- XIV — Non-ferrous Metal Products
- XV — Electrical Apparatus and Supplies
- XVI — Non-metallic Mineral Products
- XVII — Products of Petroleum and Coal
- XVIII — Chemicals and Allied Products
- XIX — Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit of filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section A. Summary for Canada, 25¢
- Section B. Atlantic Provinces, 50¢
- Section C. Province of Quebec, 25¢
- Section D. Province of Ontario, 25¢
- Section E. Prairie Provinces, 40¢
- Section F. Province of British Columbia, including Yukon and Northwest Territories, 25¢
- Section G. The Manufacturing Industries of Canada, Regional Distribution, 75¢

THE MANUFACTURING INDUSTRIES OF CANADA

1956

Section E

PRAIRIE PROVINCES

The leading industries of the Prairie Provinces are those based on agricultural resources—grain-growing, cattle-raising and dairying areas. Next in importance, generally, are industries providing for the more necessary needs of the resident population, such as the baking of bread, printing and publishing, etc. The extensive railway services require large shops for the maintenance of rolling-stock, especially in the Winnipeg area. The widespread use of motor vehicles and power machinery on farms has given rise to petroleum refineries in each province. This industry has made tremendous strides in the Prairie Provinces since 1949. At that time it ranked third in importance, being outranked by slaughtering and meat packing which was then in first place and by flour mills which ranked second. In 1956 it assumed the premier position in the Prairie Provinces in selling value of factory shipments. Of greater significance is the fact that it has increased its proportion of the total manufacturing production of the Prairie Provinces from 8.5 p.c. in 1949 to 16.5 p.c. in 1956. Manitoba, as the early commercial centre of the prairies, has had a greater industrial development than either of the other provinces. Its natural resources of accessible water power, forests and, more recently, minerals, have given rise to quite a diversification of industrial production. In Saskatchewan, while the main economic role continues to be played by agriculture, both oil and mineral wealth are being developed.

Considering the Prairie Provinces as an economic unit, petroleum products, as was mentioned before, had the largest value of factory shipments in 1956, amounting to \$272,367,057, followed closely by slaughtering and meat packing with \$264,886,950, flour mills \$99,572,619, butter and cheese \$94,256,285 and railway rolling stock \$50,364,723. These five industries accounted for about 47 p.c. of the total value of factory shipments of the Prairie Provinces. Other leading industries, in order of value of factory shipments and with shipments of \$15,000,000 or more were: bread and other bakery products, printing and publishing, breweries, bridge and structural steel, men's factory clothing, sash, door and planing mills, miscellaneous food preparations, furniture, sawmills, sheet metal products, concrete products, printing and bookbinding, sugar refining, hydraulic cement, prepared stock and poultry feeds, pulp and paper, primary iron and steel, and carbonated beverages. Non-ferrous metal smelting and refining is also a major industry in the Prairie Provinces. Information concerning it cannot, however, be published without disclosing the operations of individual establishments.

In water-power resources, the Prairie Provinces are not so well endowed as the more highly industrialized provinces of Quebec, Ontario and British Columbia. At the end of 1956 power installation in the three Provinces totalled only 1,191,745 h.p. or about 6 p.c. of the Canadian total. Manitoba had 796,900 h.p., Saskatchewan 109,835 h.p. and Alberta 285,010 h.p. With the present developments of natural gas and oil, the Prairie Provinces, will in large measure be able to overcome a lack of water-power

resources which is so vital to industrial development. Manitoba has more water-power resources and has developed them to a greater extent than either of the other Prairie Provinces. Practically all the developed sites are located on the Winnipeg River. These supply not only Winnipeg and its suburban areas but, also more than 400 municipalities and a large part of rural areas of southern Manitoba where farm electrification is a primary objective. In Saskatchewan, water-power development is confined to the northern mining districts. The southern portions of Saskatchewan and Alberta are lacking in water-power resources but have fuel reserves. In Alberta, present developments are located in the Bow River basin and serve Calgary and numerous other municipalities between the International Boundary and the area north of Edmonton.

In the Prairie Provinces, the nature of developments vary from one province to another. Alberta has moved to the forefront, especially since 1950. There the emphasis has been more on the manufacture of machinery and equipment for the burgeoning oil and gas industries. Chemicals, and especially petrochemicals, have made striking gains; second in terms of new growth, they now embrace various rayon intermediates and polythene plastics, as well as fertilizers and the manufacture of other new inorganic products like caustic soda and chlorine. Sizeable gains have been made by the expansion of food-processing plants and the construction of still more factories for making building materials.

Developments in Saskatchewan, by contrast, have continued along more or less traditional lines. The largest gains, for instance, have been recorded in food processing. The manufacture of building materials, including non-metallic mineral products and lumber, has also increased. However, the largest single gain in employment has been in the refining of prairie oil for local use.

Although Manitoba experienced considerable development in manufacturing production since 1949, it did not, percentagewise, keep pace with the other two Prairie Provinces. The change was not so much in the magnitude but rather in the nature of manufacturing production. The emphasis has shifted from the production of food and clothing to the production of products of mineral origin, such as iron and steel, non-metallic mineral products and products of petroleum and coal. There was also a wider diversification of products as is evidenced by the increase of 258 employees in the miscellaneous group. For manufacturing as a whole the increase in the number of persons employed totalled 865. The largest increase of 768 was reported by the iron and steel group. The non-metallic mineral products group with 511 reported the second largest increase, followed by electrical apparatus and supplies with 416, products of petroleum and coal 344, miscellaneous industries 258 and paper products 167. Only three groups reported major declines in employment: foods and beverages 704, clothing, including knitting mills 577 and wood products 170. The foods and beverages group which in 1949 accounted for 25 p.c.

THE MANUFACTURING INDUSTRIES

of the employment in manufacturing, accounted for only 23 p.c. of the total in 1956. The foods and beverages group with 9,922 employees was still in first place in 1956 as an employer of labour. This was followed by transportation equipment with 6,604, clothing 5,728, iron and steel products 5,542, printing and publishing 3,793 and wood products 3,033. These six groups accounted for 81 p.c. of the manufacturing employment in Manitoba.

According to Table 1, manufacturing establishments in 1956 numbered 4,303 for the Prairie Provinces as a whole. These plants furnished employment to 91,149 persons who received \$290,384,459 in salaries and wages. They also shipped goods with a selling value at the factory of \$1,648,781,413 and spent \$956,034,201 for materials, while the value added by manufacture totalled \$669,476,007.

Principal Statistics of the Prairie Provinces, 1956

	Establishments	Employees	Salaries and wages	Cost at plant of materials used	Value added by manufacture	Selling value of factory shipments
	number		\$'000			
Manitoba	1,534	42,821	133,506	367,025	270,018	647,389
Saskatchewan	798	11,536	36,683	176,871	113,628	298,203
Alberta	1,971	36,792	120,195	412,138	285,831	703,189
Total	4,303	91,149	290,384	956,034	669,477	1,648,781

In spite of the rapid development in the Prairie Provinces since 1939, manufacturing production did not keep pace with the developments in the more industrialized provinces of Ontario, Quebec and British Columbia. This is indicated by the slight drop in the Prairie Provinces' share of the Canadian total from 8.13 p.c. in 1939 to 7.91 p.c. in 1953. In 1954 conditions were reversed. The Prairie Provinces reported an increase of 1.4 p.c. in the value of factory shipments as compared with a decline of 1.3 p.c. for Canada as a whole. As a result of this the Prairie Provinces' share of the Canadian total

was again 8.13 p.c., the same as in 1939. In 1955 and 1956, however, the situation deteriorated again with the percentage of the total dropping to 7.62.

According to the table below, Manitoba and Saskatchewan did not keep pace with manufacturing developments in Canada as a whole. Alberta on the other hand fared much better. Compared with 1949 employment increased by 39.2 p.c. and value of factory shipments by 89.0 p.c. This compares with increases for Canada as a whole of 15.5 p.c. and 73.4 p.c. respectively.

Variation in Employment and Factory Shipments, 1956 Compared with 1949

Province	Employees	Earnings	Selling value of factory shipments	per cent		
				+ 2.1	+ 55.1	+36.4
Manitoba				+ 6.4	+ 61.3	+38.2
Saskatchewan				+39.2	+118.1	+89.0
Alberta				+15.1	+ 77.1	+55.2
Prairie Provinces				+15.5	+ 76.3	+73.4
Canada						

TABLE 1. Principal Statistics of the Manufacturing Industries of Canada, by Provinces, 1956

Provinces	Establishments	Employees	Salaries and wages	Cost at plant of materials used	Value added by manufacture ¹	Selling value of factory shipments
	number		dollars			
Newfoundland	783	10,502	30,462,735	55,451,956	62,607,709	123,691,344

1952	1,531	"	43,365	112,147,572	347,664,650	216,814,306	574,037,212
1953	1,540	"	43,740	121,126,279	345,403,115	229,797,439	584,872,459
1954	1,522	"	41,224	116,454,886	328,827,609	232,487,743	571,408,772
1955	1,549	"	41,318	121,718,573	329,698,765	247,472,108	588,351,081
1956	1,534	"	42,821	133,505,971	367,024,766	270,017,554	647,389,185

¹ Prior to 1952 the value added by manufacture is computed by subtracting the cost of materials, fuel and electricity used from the gross value of products and in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products."

TABLE 3. Principal Statistics Compared, 1955 and 1956

¹ Prior to 1952 the value added by manufacture is computed by subtracting the cost of materials, fuel and electricity used from the gross value of products and in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

TABLE 8. Principal Statistics Compared, 1955 and 1956

Principal statistics		1955	1956	+Increase -Decrease
Establishments	No.	960	798	- 162
Supervisory and office employees:				
Male	No.	2,383	2,255	- 128
Female	"	871	863	- 8
Salaries	\$	9,973,963	10,471,197	+ 497,234
Production workers:				
Male	No.	7,264	7,425	+ 161
Female	"	972	993	+ 21
Wages	\$	24,851,548	26,212,186	+1,360,638
Cost of fuel and electricity	"	7,781,357	8,236,492	+ 455,135
Cost at plant of materials used	"	174,078,701	176,871,188	+2,792,487
Value added by manufacture ¹	"	113,598,622	113,627,642	+ 29,020
Selling value of factory shipments	"	295,162,037	298,203,489	+3,041,452

¹ Prior to 1952 the value added by manufacture is computed by subtracting the cost of materials, fuel and electricity used from the gross value of products and in 1952 and 1953 from the factory shipments. In 1954 and subsequent years the deduction is made from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

² In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

TABLE 13. Principal Statistics Compared, 1955 and 1956
