NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes as follows: **Volume I**—The Primary Industries, including mining, forestry and fishing; **Volume II**—Manufacturing; **Volume III**—Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups:

- I—General Review of the Manufacturing Industries, \$1.50
- II—The Manufacturing Industries of Canada,
(7 sections, see below:)
- III—Foods and Beverages
- IV—Tobacco and Tobacco Products
- V—Rubber Products
- VI—Leather Products
- VII—Textiles
- VIII—Wood and Paper Products
- IX—Printing Trades
- X—Iron and Steel Products
- XI—Transportation Equipment
- XII—Non-ferrous Metal Products
- XIII—Electrical Apparatus and Supplies
- XIV—Non-metallic Mineral Products
- XV—Products of Petroleum and Coal
- XVI—Chemicals and Allied Products
- XVII—Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section A. Summary for Canada, 25¢
- Section B. Atlantic Provinces, 50¢
- Section C. Province of Quebec, 25¢
- Section D. Province of Ontario, 25¢
- Section E. Prairie Provinces, 40¢
- Section F. Province of British Columbia, including
Yukon and Northwest Territories, 25¢
- Section G. The Manufacturing Industries of Canada,
Regional Distribution, 75¢

THE MANUFACTURING INDUSTRIES OF CANADA

Section F

BRITISH COLUMBIA, YUKON AND NORTHWEST TERRITORIES

1953

British Columbia, with factory shipments totaling \$1,366,823,690 in 1953, ranked third among the provinces in manufacturing production. In spite of the rapid industrialization of other provinces, British Columbia succeeded in increasing its share of the total Canadian output. This is reflected in the increase in the total from 7.1 p.c. in 1939 to 7.8 p.c. in 1952, with a slight decline to 7.7 p.c. in 1953.

Forest resources, fisheries, minerals and electric power have given a broad base and wide diversification to its industrial development. While Ontario and Quebec have an outstanding predominance in each of the major industrial groups of the Standard Industrial Classification, in the production of wood products, however, British Columbia with 37 p.c. of the Canadian total holds the dominant position, outranking both Ontario and Quebec which account respectively for 26 and 22 p.c. of the total.

Emphasizing the importance of the forests in the industrial life of the Province, the sawmilling industry ranked first with a gross value of shipments of \$323,474,522, and pulp and paper second with \$138,883,093. Third in importance was fish processing, based principally in the estuarial salmon fisheries. British Columbia accounted for approximately 48 p.c. of the output of the fish processing industry in 1953 and plays a large part in making Canada the largest fish exporting nation in the world. Other important industries are: veneers and plywoods, slaughtering and meat packing, sash, door and planing mills, petroleum products, miscellaneous food preparations, fertilizers, shipbuilding, fruit and vegetable preparations, butter and cheese, bridge building and structural steel, bread and other bakery products, printing and publishing, etc. The non-ferrous metal smelting and refining industry ranks high amongst the leading industries. Information, however, cannot be published as there is only one smelter located in the Province.

A feature of recent progress has been that new developments are taking place in areas far removed from accepted industrial centres. Growing lines of communication and transportation are fanning out from and leading into formerly locked interior communities to tap a vast new potential and offer new sources of provincial economic unity and strength. Factories and plants in remote sections are drawing greater value in employment and dollars from natural resources. The growth of the province industrially may be indicated by the increase in employment which is more than double the pre-war figure. In dollar terms, gross value of manufacturing is now more than double of the immediate postwar period, and up more than fivefold since 1939. The consump-

tion of 3.2 billion kwh of electric power by manufacturers during 1953 marks a steady upward climb of 29 per cent in the past decade.

British Columbia ranks second among the provinces in available water-power resources and its hydraulic development which at the end of 1953 totalled 1,702,858 h.p., out of a Canadian total of 15,140,880 h.p., is exceeded only by Quebec and Ontario. Present developments are practically all located in the southern part of the province in the Fraser and Columbia River basins. The Aluminum Co. of Canada is making excellent progress in its great Nechako-Kitimat scheme, involving diversion of the head-waters of the Fraser River through the coastal range by a ten-mile tunnel to an underground powerhouse. It is anticipated that the first stage of installation, covering 420,000 h.p. in three units, will be completed in 1954. This power will be used in the production of aluminum which will be a new product for British Columbia.

In the investment in new plant and equipment by British Columbia manufacturers, the wood products group, principally sawmills and including new plants manufacturing plywood and furniture, are well out in front. This is so both in number of firms and in new development opportunities. Next in line comes paper products. Four new mills have been built and others expanded to increase British Columbia's output of newsprint, kraft and dissolving pulps. New plants making chemicals, principally fertilizers and plywood adhesives, have been prominent, as well as firms making machinery and equipment. Food processing has also made considerable headway and, in investment terms, petroleum products are worthy of comment. Construction work on several new refineries commenced when construction was started on the Trans-Mountain oil pipeline in 1951. It is not expected that any of them will be in operation before 1954 or 1955.

Manufacturing establishments reporting in 1953 numbered 4,317. These plants furnished employment to 93,844 persons who received \$300,921,318 in salaries and wages. They also shipped goods with a selling value at the factory of \$1,366,823,690 and spent \$724,495,754 for materials, while the value added by manufacture totalled \$615,686,215. Compared with the previous year there was an increase of 1.3 p.c. in the number of persons employed, 6.1 p.c. in the salaries and wages paid, and 2.6 p.c. in the selling value of factory shipments. The expansion of manufactures in British Columbia in 1953 was not as great as for Canada as a whole which showed an increase of 3.0 p.c. in number of persons employed, 8.8 p.c. in salaries and wages paid and 4.7 p.c. in the selling value of factory shipments.
