Vol. 2—Part II—Section F

EDMOND CLOUTIER, C.M.G., O.A., D.S.P., Queen's Printer and Controller of Stationery, Ottawa, 1956.

## NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes as follows: Volume I — The Primary Industries, including mining, forestry and fishing; Volume II — Manufacturing; Volume III — Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups:

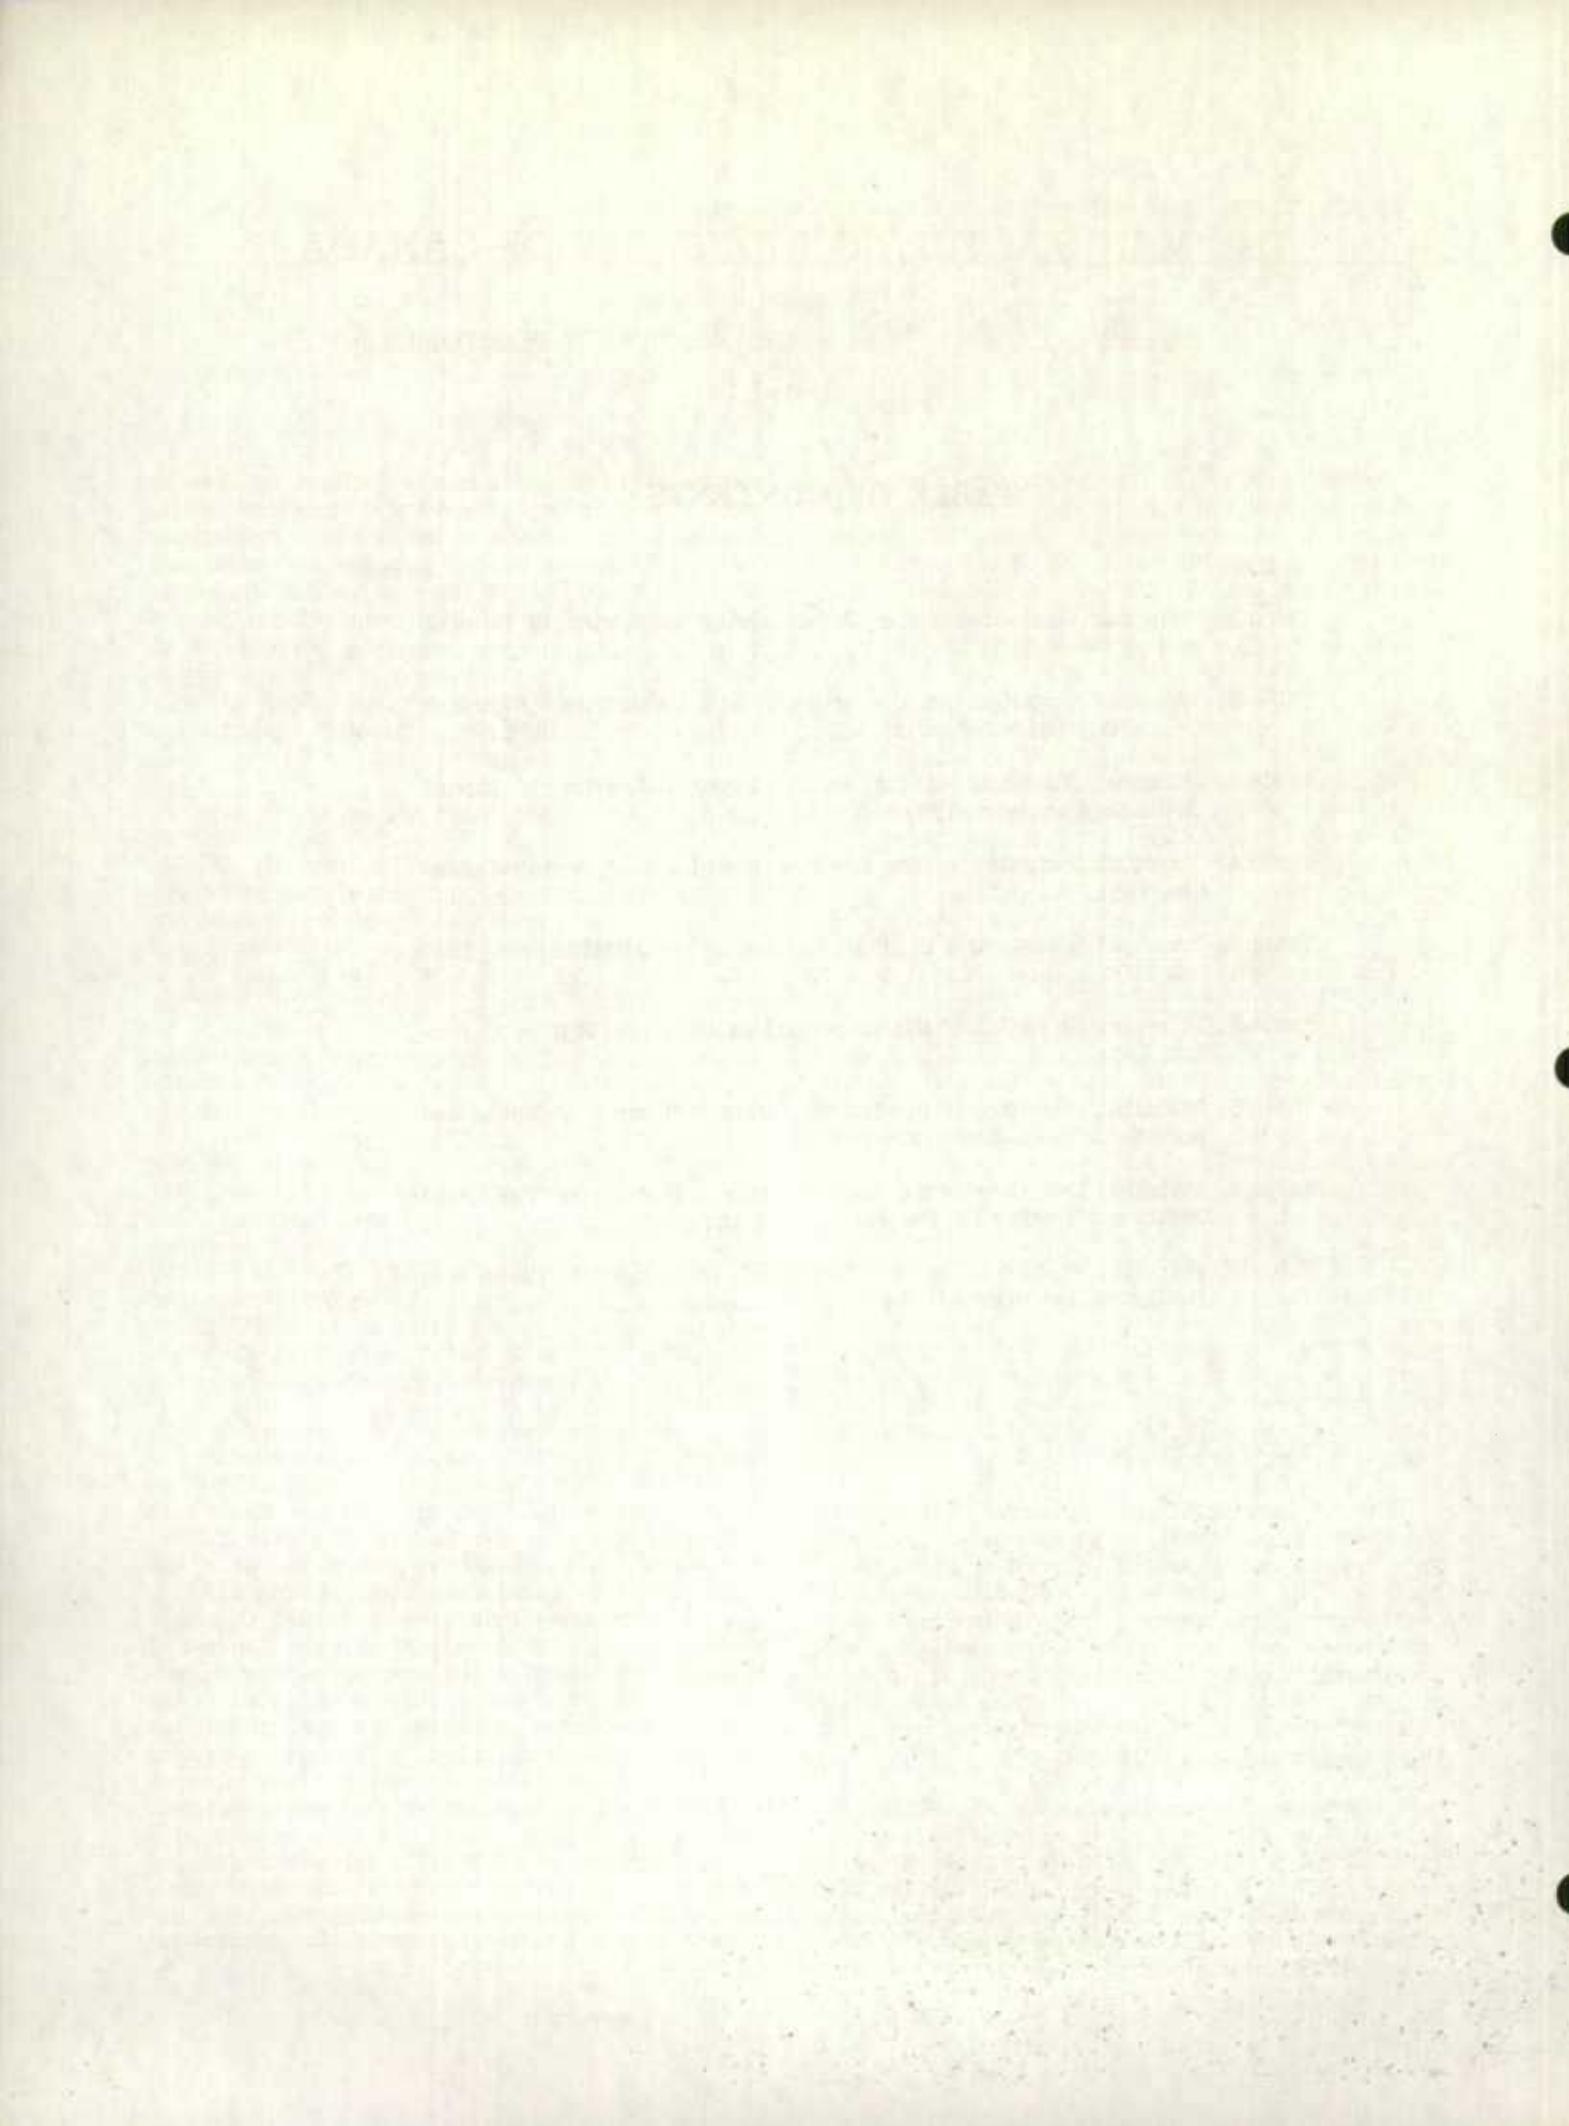

- I — General Review of the Manufacturing Industries, \$1.50
- II — The Manufacturing Industries of Canada,  
(7 sections, see below:)
- III — Foods and beverages
- IV — Tobacco and tobacco products
- V — Rubber products
- VI — Leather products
- VII — Textile mills
- VIII — Knitting mills
- IX — Clothing
- X — Wood and paper products
- XI — Printing trades
- XII — Iron and steel products
- XIII — Transportation equipment
- XIV — Non-ferrous metal products
- XV — Electrical apparatus and supplies
- XVI — Non-metallic mineral products
- XVII — Products of petroleum and coal
- XVIII — Chemicals and allied products
- XIX — Miscellaneous manufactures

The present report belongs in Part II. It is punched to permit filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section A. Summary for Canada, 25¢
- Section B. Atlantic Provinces, 25¢
- Section C. Province of Quebec, 25¢
- Section D. Province of Ontario, 25¢
- Section E. Prairie Provinces, 25¢
- Section F. Province of British Columbia, including Yukon and Northwest Territories, 25¢
- Section G. The Manufacturing Industries of Canada, Regional Distribution, 75¢

# THE MANUFACTURING INDUSTRIES OF CANADA

## Section F

### BRITISH COLUMBIA, YUKON AND NORTHWEST TERRITORIES

1954

British Columbia, with factory shipments totalling \$1,474,156,242, ranked third among the provinces in manufacturing production. In spite of the rapid industrialization of other provinces, British Columbia succeeded in increasing its share of the total Canadian output. This is reflected in the increase in the total from 7.1 p.c. in 1939 to 8.4 p.c. in 1954.

Forest resources, fisheries, minerals and electric power have given a broad base and wide diversification to its industrial development. While Ontario and Quebec have an outstanding predominance in each of the major industrial groups of the Standard Industrial Classification, in the production of wood products, however, British Columbia with 40 p.c. of the Canadian total holds the dominant position, outranking both Ontario and Quebec which account respectively for 24 and 22 p.c. of the total.

Emphasizing the importance of the forests in the industrial life of the Province, the sawmilling industry ranked first with a gross value of factory shipments of \$347,883,651, and pulp and paper second with \$157,781,577. Third in importance was the petroleum products industry with factory shipments valued at \$81,547,626. This industry received a great impetus with the completion of the Trans-Mountain oil pipeline. In 1953, with shipments valued at \$40,562,462 it ranked seventh, and contributed about 3 p.c. to the total value of factory shipments of the Province. In 1954 it assumed third place with the proportion of the total increasing to 5.5 p.c. In fourth place was fish processing, based principally in the estuarial salmon fisheries. This industry was in third place in 1953. British Columbia accounted for approximately 46 p.c. of the output of the fish processing industry in 1954 and plays a large part in making Canada the largest fish exporting nation in the world. Other important industries are: veneers and plywoods, slaughtering and meat packing, sash, door and planing mills, miscellaneous food preparations, ship-building, fertilizers, butter and cheese, fruit and vegetable preparations, etc. The non-ferrous metal smelting and refining industry ranks high among the leading industries. Information, however, cannot be published as there are less than three smelters located in the province.

A feature of recent progress has been that new developments are taking place in areas far removed from accepted industrial centres. Growing lines of communication and transportation are fanning out from and leading into formerly locked interior communities to tap a vast new potential and offer new sources of provincial economic unity and strength.

Factories and plants in remote sections are drawing greater value in employment and dollars from natural resources. The growth of the province industrially may be indicated by the increase in employment which is more than double the pre-war figure. In dollar terms, gross value of manufacturing is now more than double of the immediate postwar period, and up more than sixfold since 1939. The consumption of 4.0 billion kwh of electric power by manufacturers during 1954 marks a steady upward climb of 90 per cent in the past decade.

British Columbia ranks second among the provinces in available water-power resources and its hydraulic development which at the end of 1954 totalled 2,246,868 h.p., out of a Canadian total of 16,684,131 h.p., is exceeded only by Quebec and Ontario. Present developments are practically all located in the southern part of the province in the Fraser and Columbia River basins. The Aluminum Co. of Canada is making excellent progress in its great Kermano-Kitimat scheme, involving diversion of the head-waters of the Fraser River through the costal range by a ten-mile tunnel to an underground powerhouse. The highlight of hydro-electric construction in 1954 was the completion of the first stage of this project. The first three turbines, each of 150,000 h.p., were brought into operation. This power will be used in the production of aluminum which is a new product for British Columbia. Present capacity of the smelter is 91,500 tons of aluminum per annum, with a potential of 550,000 tons, a production that will further strengthen Canada's position as an important source of this vital metal.

Manufacturing establishments reporting in 1954 numbered 4,462. These plants furnished employment to 95,867 persons who received \$319,802,914 in salaries and wages. They also shipped goods with a selling value at the factory of \$1,474,156,242 and spent \$794,885,369 for materials, while the value added by manufacture totalled \$651,812,950. The manufacturing industries of British Columbia expanded during 1954, at a time when the rest of Canada experienced a minor recession. For Canada as a whole there was a drop of 4.5 p.c. in the number of persons employed, 1.5 p.c. in salaries and wages paid, and 1.3 p.c. in the value of factory shipments. British Columbia was the only province in 1954 reporting increased employment in manufacturing, the increase being 2.2 p.c., accompanied by an increase of 6.3 p.c. in salaries and wages paid. Although British Columbia was not the only province to report increased shipments, the increase of 7.9 p.c. was, however, the highest of any province.

## THE MANUFACTURING INDUSTRIES

TABLE 1. Principal Statistics of the Manufacturing Industries of Canada by Provinces, 1954

Provinces	Establishments	Employees	Earnings	Cost at plant of materials used	Value added by manufacture <sup>1</sup>	Selling value of factory shipments
	No.	No.	\$	\$	\$	\$
Newfoundland .....	790	9,892	30,101,186	46,503,032	59,483,922	109,567,770

1950 .....	3,695	"	87,375	216,656,977	634,177,837	479,606,261	1,133,016,956
1951 .....	3,897	"	93,647	262,626,283	789,840,417	592,448,565	1,404,880,341
1952 .....	4,225	"	92,667	283,530,976	751,011,248	556,172,312	1,332,481,862
1953 .....	4,317	"	93,844	300,921,318	724,495,754	615,686,215	1,366,823,690
1954 .....	4,462	"	95,867	319,802,914	794,885,369	651,812,950	1,474,156,242

1. In 1951 and previous years the value added by manufacture is computed by subtracting the cost of fuel, electricity and materials used from the gross value of products. For years 1952 and 1953 the deduction is made from the value of factory shipments and in 1954 from the calculated value of production.<sup>4</sup>

2. In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products."

3. Includes Yukon and Northwest Territories.

4. See last three paragraphs of text, Section A, Summary for Canada.

TABLE 3. Principal statistics compared, 1953 and 1954

Principal statistics		1953	1954	+ Increase -Decrease
Establishments .....	No.	4,317	4,462	+ 145
Supervisory and office employees:				
Male .....	No.	14,375	14,754	+ 379
Female .....	"	4,138	4,356	+ 218
Earnings .....	\$	66,817,112	72,549,043	+ 5,731,931
Production workers:				
Male .....	No.	66,463	68,243	+ 1,780
Female .....	"	8,868	8,514	- 354
Earnings .....	\$	234,104,206	247,253,871	+ 13,149,665
Cost of fuel and electricity .....	"	26,641,721	31,246,094	+ 4,604,373
Cost at plant of materials used .....	"	724,495,754	794,885,369	+ 70,389,615
Value added by manufacture <sup>1</sup> .....	"	615,686,215	651,812,950	+ 36,126,735
Selling value of factory shipments .....	"	1,366,823,690	1,474,156,242	+107,332,552

1. In 1954 the cost of fuel, electricity and materials used is deducted from the calculated value of products<sup>2</sup> instead of from the value of factory shipments as in 1953. The figures for these years are, therefore, not strictly comparable.

2. See last three paragraphs of text, Section A, Summary for Canada.

TABLE 4. Principal Statistics of the Leading Industries of British Columbia, 1954

No.	Industries	Establishments	Employees	Earnings	Cost at plant of materials used	Value added by manufacture	Selling value of factory shipments
		No.	No.	\$	\$	\$	\$

1. Confidential. Included in "Miscellaneous industries".

2. Includes, "Tobacco and tobacco products".

3. There were three major changes in concept affecting the data for the Primary Iron and Steel Industry in 1954. The first one involved a change in the method of counting establishments; the second concerned a change in valuing shipments of wire rods transferred to makers' own processing plants; while the third concerned the method of calculating "value added by manufacture". Figures for 1954 are, therefore, not comparable with previous years. See footnotes - Table 2 of the 1954 report on the Primary Iron and Steel Industry.

TABLE 5. Principal Statistics by Industrial Groups, 1953 and 1954

Production workers			Total employees	Total earnings	Cost of fuel and electricity	Cost at plant of materials used	Value added by manufacture	Selling value of factory shipments	No.

4. Apparent advance in the selling value of factory shipments is due in part to an actual gain in physical output but the major factor contributing to this increase was a change in accounting procedure by some firms in calculating value of shipments in the petroleum products industry.

TABLE 6. Principal Statistics of the Individual Industries, 1954

No.	Industries	Establishments	Supervisory and office employees		
			Male	Female	Earnings
		No.	No.	No.	\$
<i>1. Foods and beverages:</i>

3. See footnote 4, Table 5, page 9.

4. Includes "Tobacco and tobacco products".

**YUKON AND NORTHWEST TERRITORIES**

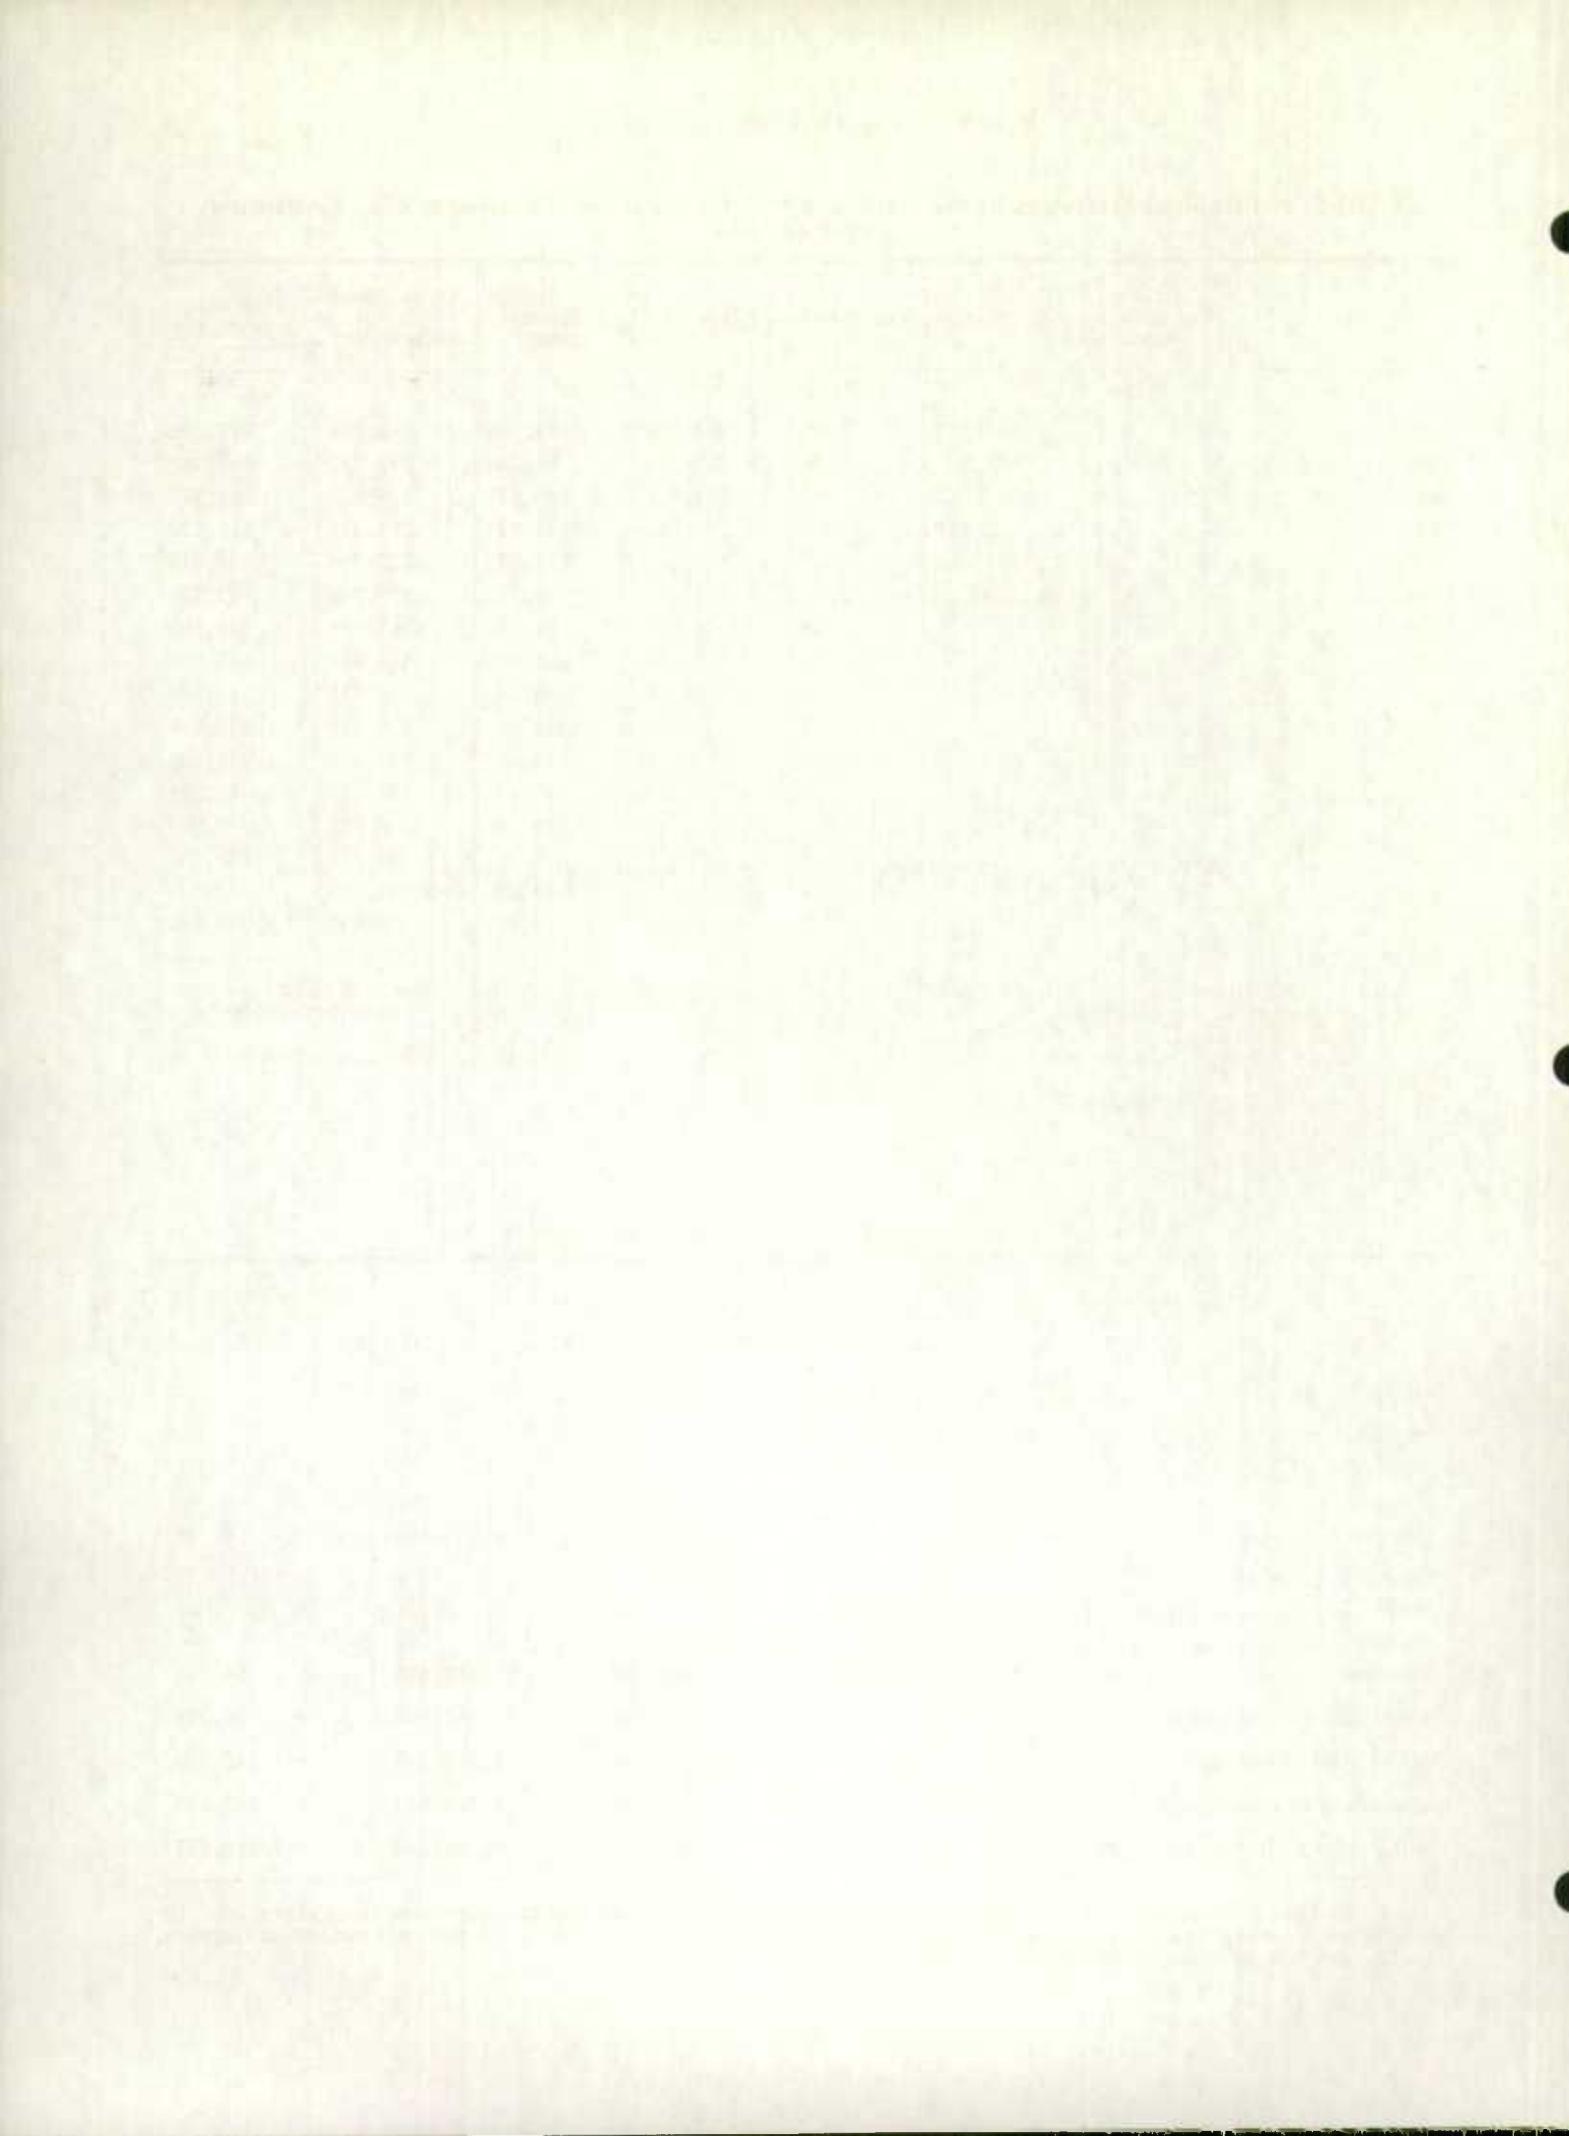

TABLE 7. Principal Statistics of the Manufacturing Industries of Yukon and N.W. Territories,  
1939 to 1954

Year	Establishments	Capital	Employees	Earnings	Cost at plant of materials used	Value added by manufacture <sup>1</sup>	Gross value of products <sup>2</sup>
	No.	\$	No.	\$	\$	\$	\$
1939 .....	5	533,847	55	97,766	138,500	92,054	242,968
1940 .....	9	666,281	78	123,276	97,240	152,733	266,745
1941 .....	9	785,012	59	111,641	129,477	199,863	341,377
1942 .....	9	852,927	68	106,278	139,006	263,471	417,773
1943 .....	8	589,841	62	120,714	138,369	237,709	395,943
1944 .....	12	Not collected	67	118,972	189,718	280,803	489,256
1945 .....	12	"	64	126,940	153,466	517,685	704,663
1946 .....	13	"	92	200,560	172,845	403,727	646,295
1947 .....	14	"	145	313,281	690,533	525,030	1,344,109
1948 .....	17	"	137	346,220	818,919	379,525	1,330,110
1949 .....	18	"	148	359,068	643,807	604,896	1,377,453
1950 .....	19	"	123	285,656	1,039,954	569,167	1,741,531
1951 .....	18	"	152	405,690	1,097,931	758,986	2,018,909
1952 .....	23	"	164	530,126	1,075,561	1,022,974	2,288,039
1953 .....	30	"	177	569,995	1,349,970	1,012,008	2,516,683
1954 .....	31	"	191	630,316	1,492,898	1,855,633	3,536,300

1. In 1951 and previous years the value added by manufacture is computed by subtracting the cost of fuel, electricity and materials used from the gross value of products. For years 1952 and 1953 the deduction is made from the value of factory shipments and in 1954 from the calculated value of production.

2. In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

3. See last three paragraphs of text. Section A, Summary for Canada.

TABLE 8. Principal Statistics Compared, 1953 and 1954

Principal statistics		1953	1954	+ Increase - Decrease
Establishments .....	No.	30	31	+ 1
Supervisory and office employees:				
Male .....	No.	45	44	- 1
Female .....	"	10	10	-
Earnings .....	\$	163,567	167,863	+ 4,296
Production workers:				
Male .....	No.	106	121	+ 15
Female .....	"	16	16	-
Earnings .....	\$	406,428	462,453	+ 56,025
Cost of fuel and electricity .....	"	154,705	191,003	+ 36,298
Cost at plant of materials used .....	"	1,349,970	1,492,898	+ 142,928
Value added by manufacture <sup>1</sup> .....	"	1,012,008	1,855,633	+ 843,625
Selling value of factory shipments .....	"	2,516,683	3,536,300	+ 1,019,617

1. In 1954 the cost of fuel, electricity, and materials used is deducted from the calculated value of products<sup>2</sup> instead of from the value of factory shipments as in 1953. The figures for these years are, therefore, not strictly comparable.

2. See last three paragraphs of text. Section A, Summary for Canada.

TABLE 9. Principal Statistics of the Individual Industries, 1954

No.	Industries	Establishments	Supervisory and office employees		
			Male	Female	Earnings
