Vol. 2—Part II—Section-F

## NOTICE

The annual reports prepared by the Industry and Merchandising Division of the Bureau of Statistics are divided into 3 volumes as follows: **Volume I** – The Primary Industries, including mining, forestry and fishing; **Volume II** – Manufacturing; **Volume III** – Merchandising and Services. The volumes are made up of parts, and the parts in turn are subdivided according to the industries or provinces which they comprise.

Volume II consists of the following parts, the first two of which deal with manufacturing as a whole and the balance with the major manufacturing groups:

- I – General Review of the Manufacturing Industries, \$1.50
- II – The Manufacturing Industries of Canada,  
(7 sections, see below:)
- III – Foods and Beverages
- IV – Tobacco and Tobacco Products
- V – Rubber Products
- VI – Leather Products
- VII – Textile Mills
- VIII – Knitting Mills
- IX – Clothing
- X – Wood and Paper Products
- XI – Printing Trades
- XII – Iron and Steel Products
- XIII – Transportation Equipment
- XIV – Non-ferrous Metal Products
- XV – Electrical Apparatus and Supplies
- XVI – Non-metallic Mineral Products
- XVII – Products of Petroleum and Coal
- XVIII – Chemicals and Allied Products
- XIX – Miscellaneous Manufactures

The present report belongs in Part II. It is punched to permit of filing in a ring binder along with other reports of the group, the full list of which is as follows:

- Section A. Summary for Canada, 25¢
- Section B. Atlantic Provinces, 50¢
- Section C. Province of Quebec, 25¢
- Section D. Province of Ontario, 25¢
- Section E. Prairie Provinces, 40¢
- Section F. Province of British Columbia, including Yukon and  
Northwest Territories, 25¢
- Section G. The Manufacturing Industries of Canada,  
Regional Distribution, 75¢

# THE MANUFACTURING INDUSTRIES OF CANADA

## Section F

### BRITISH COLUMBIA, YUKON AND NORTHWEST TERRITORIES

1956

British Columbia, with factory shipments valued at \$1,859,368,466, ranked third among the provinces in manufacturing production. In spite of the rapid industrialization of other provinces, British Columbia succeeded in increasing its share of the total Canadian output. This is reflected in the increase in the total from 7.1 p.c. in 1939 to 8.6 p.c. in 1956.

Forest resources, fisheries, minerals and electric power have given a broad base and wide diversification to its industrial development. While Ontario and Quebec have an outstanding predominance in each of the major industrial groups of the Standard Industrial Classification, in the production of wood products, however, British Columbia with 42 p.c. of the Canadian total holds the dominant position, outranking both Ontario and Quebec which account respectively for 25 and 22 p.c. of the total.

Emphasizing the importance of the forests in the industrial life of the Province, the sawmilling industry ranked first with a gross value of factory shipments of \$397,934,856, and pulp and paper second with \$184,526,395. Third in importance was the petroleum products industry with factory shipments valued at \$123,235,472. This industry received a great impetus in the completion of the Trans-Mountain oil pipeline. In 1953, with shipments valued at \$40,562,462 it ranked seventh, and contributed about 3 p.c. to the total value of factory shipments of the Province. In 1954 it assumed third place with the proportion of the total increasing to 5.5 p.c., with a further increase to 6.6 p.c. in 1956. In fourth place was veneer and plywood with \$87,532,258 while in fifth place was fish processing, based principally in the estuarial salmon fisheries. This industry was in third place in 1953. British Columbia accounted for approximately 48 p.c. of the output of the fish processing industry in 1956 and plays a large part in making Canada the largest fish exporting nation in the world. Other important industries are: sash, door and planing mills, slaughtering and meat packing, miscellaneous food preparations, shipbuilding, fertilizers, printing and publishing, butter and cheese, fruit and vegetable preparations, bridge and structural steel, etc. The non-ferrous metal smelting and refining industry also ranks high among the leading industries. Information, however, cannot be published as there are less than three smelters located in the province.

A feature of recent progress has been that new developments are taking place in areas far removed from accepted industrial centres. Growing lines of communication and transportation are fanning out from and leading into formerly locked interior communities to tap a vast new potential and offer new sources of provincial economic unity and strength. Factories and plants in remote sections are drawing greater value in employment and dollars from natural resources. The growth of the province industrially

may be indicated by the increase in employment which is two and one-half times the pre-war figure. In dollar terms, gross value of manufacturing is also up 650 p.c. since 1939. The consumption of 6.5 billion kwh of electric power by manufacturers during 1955 marks a steady upward climb of 200 per cent in the past decade.

British Columbia ranks second among the provinces in available water-power resources and its hydraulic development which at the end of 1956 totalled 2,566,460 h.p., out of a Canadian total of 18,403,048 h.p., is exceeded only by Quebec and Ontario. Present developments are practically all located in the southern part of the province in the Fraser and Columbia River Basins. The Aluminum Co. of Canada is making excellent progress in its great Kemano-Kitimat scheme, involving diversion of the head-waters of the Fraser River through the coastal range by a ten-mile tunnel to an underground powerhouse. The highlight of hydro-electric construction in 1955 was the completion of the first stage of this project. The first four turbines, each of 150,000 h.p. were brought into operation. A fifth unit of 150,000 h.p. is scheduled for completion in 1957, and the ultimate capacity is expected to be about 2,000,000 h.p. This power will be used in the production of aluminum which is a new product for British Columbia. Present capacity of the smelter is 90,000 tons of aluminum per annum, with a potential of 550,000 tons, a production which will further strengthen Canada's position as an important source of this vital metal.

Manufacturing establishments reporting in 1956 numbered 4,393. These plants furnished employment to 108,595 persons who received \$393,869,388 in salaries and wages. They also shipped goods with a selling value at the factory of \$1,859,368,466 and spent \$1,007,882,346 for materials, while the value added by manufacture totalled \$824,249,273.

The manufacturing industries of British Columbia expanded during 1954, at a time when the rest of Canada experienced a minor recession. For Canada as a whole there was a drop of 4.5 p.c. in the number of employees and 1.3 p.c. in the value of shipments. British Columbia was the only province in 1955 reporting increased employment, the increase being 2.2 p.c. Although British Columbia was not the only province to report increased shipments that year, the increase of 7.9 p.c. was, however, the highest of any province. In common with other provinces, manufacturing in British Columbia continued to expand during 1955 and 1956. Of all provinces British Columbia reported the greatest increase in employment and value of factory shipments. Since 1953 employees were 15.7 p.c. higher as compared with an increase of only 1.9 p.c. for Canada, while the value of factory shipments were 36.0 p.c. higher for British Columbia and 21.7 p.c. for Canada as a whole.

TABLE 1. Principal Statistics of the Manufacturing Industries of Canada by Provinces, 1956

<sup>1</sup> In 1951 and previous years the value added by manufacture is computed by subtracting the cost of fuel, electricity and materials used from the gross value of products. For years 1952 and 1953, the deduction is made from the value of factory shipments and in 1954 and subsequent years from the calculated value of production. (See footnote 1, table 1 above)

<sup>2</sup> In 1952 and subsequent years the basis of collection is "value of factory shipments" instead of "Gross value of products".

<sup>3</sup> Includes Yukon and Northwest Territories.

TABLE 3. Principal statistics compared, 1955 and 1956

Principal statistics	1955	1956	+ Increase - Decrease
Establishments ..... No.	4,486	4,393	- 93
Supervisory and office employees:

1944 .....	12	Not collected	67	118,972	189,718	280,803	489,256
1945 .....	12	"	64	126,940	153,466	517,685	704,663
1946 .....	13	"	92	200,560	172,845	408,727	646,295
1947 .....	14	"	145	313,281	690,533	525,030	1,344,109
1948 .....	17	"	137	346,220	818,919	379,525	1,330,110
1949 .....	18	"	148	359,068	643,807	604,896	1,377,453
1950 .....	19	"	123	285,656	1,039,954	569,167	1,741,531
1951 .....	18	"	152	405,690	1,097,991	758,986	2,018,909
1952 .....	23	"	164	530,126	1,075,561	1,022,974	2,288,039
1953 .....	30	"	177	569,995	1,349,970	1,012,008	2,516,683
1954 .....	31	"	191	630,316	1,492,898	1,855,633	3,536,300
1955 .....	26	"	170	604,507	2,843,895	1,732,511	4,751,000
1956 .....	24	"	175	681,433	3,867,415	1,076,223	5,130,497

<sup>1</sup> In 1951 and previous years the value added by manufacture is computed by subtracting the cost of fuel, electricity and materials used from the gross value of products. For years 1952 and 1953 the deduction is made from the value of factory shipments and in 1954 and subsequent years from the calculated value of production (shipments plus closing inventory, minus opening inventory of finished products).

<sup>2</sup> In 1952 and subsequent years the basis of collection is "Value of factory shipments" instead of "Gross value of products".

**TABLE 8. Principal Statistics Compared, 1955 and 1956**

Principal statistics		1955	1956	+ Increase - Decrease
Establishments .....	No.	26	24	- 2
Supervisory and office employees:				
Male .....	No.	35	37	+ 2
Female .....	"	10	9	- 1
Earnings .....	\$	144,013	174,307	+ 30,294
Production workers:				
Male .....	No.	109	111	+ 2
Female .....	"	16	18	+ 2
Earnings .....	\$	460,494	507,126	+ 46,632
Cost of fuel and electricity .....	"	181,182	188,560	+ 7,378
Cost at plant of materials used .....	"	2,843,895	3,867,415	+1,023,520
Value added by manufacture <sup>1</sup> .....	"	1,732,511	1,076,223	- 656,288
Selling value of factory shipments .....	"	4,751,000	5,130,497	+ 379,497

<sup>1</sup> See footnote 1, Table 7, above.
