ADVANCE REPORT ON THE MANUFACTURING INDUSTRIES OF  
CANADA, 1943.

RAPPORT PRÉLIMINAIRE SUR LES INDUSTRIES  
MANUFACTURIÈRES DU CANADA, 1943.

The gross output of manufactured products totalled \$8,732,860,999 in 1943, an increase of \$1,179,066,027 or 15.6 per cent as compared with the previous year. The number of persons employed increased by 7.7 per cent and the salaries and wages paid by 18.1 per cent. The increase in the value of production was mainly due to the continued expansion in the chemical, iron and non-ferrous metal products industries whose output consists mainly of war equipment and materials. Industries producing consumers' goods recorded but moderate increases, with textiles and textile products actually declining by .3 per cent. The food, textile and chemical industries were the first to feel the effects of the stimulated demands created by the present war. With the progress of the war and its ever increasing demands for vehicles, aircraft and armaments of all kinds, the other groups, especially iron and non-ferrous metals, also experienced a tremendous expansion in production. For manufacturing as a whole there was an increase since 1939 of 151 per cent in the gross value of production, 149 per cent in the value added by manufacture, 89 per cent in the number of persons employed and 169 per cent in the salaries and wages paid.

La valeur brute de production manufacturière s'élève à \$8,732,860,999 en 1943, ce qui est une augmentation de \$1,179,066,027 ou 15.6 p.c. comparativement à l'année précédente. Le nombre d'employés a augmenté de 7.7 p.c. et les salaires et gages de 18.1 p.c. L'augmentation dans la valeur de la production est due à la nouvelle expansion des industries des produits chimiques, du fer et des métaux non-ferreux, lesquelles produisent principalement l'équipement et le matériel de guerre. Les industries qui produisent les articles de consommation n'enregistrent que de faibles augmentations. Dans les industries textiles il y eut même une diminution de .3 p.c. Les effets de la guerre se sont faits d'abord sentir dans les industries textiles, les produits alimentaires et les produits chimiques. Avec les progrès de la guerre, la demande pour les véhicules, les aéroplanes et les armements de toutes sortes étant devenue plus pressante, tous les produits du fer, de l'acier et des métaux non ferreux ont été fabriqués sur une plus grande échelle. Depuis 1939, il y a augmentation de 151 p.c. dans la valeur brute de la production globale, 149 p.c. dans la valeur nette, 89 p.c. dans le nombre d'employés et 169 p.c. dans les salaires et gages.

The major increase in production, as measured by the number of persons employed, was reported by the industries listed below. Of the total increase in employees since 1939, totalling 582,954, 358,173 or 61 per cent was contributed by these twelve industries.

Ce sont les industries énumérées ci-dessous qui déclarent la plus forte augmentation de production telle que mesurée par le nombre de personnes employées. Depuis 1939, l'augmentation totale a été de 582,954 dont 358,173 ou 61 p.c. sont dans ces douze industries.

Industry	Persons Employed in 1943	Increase Since 1939	Industrie
	Personnes employées en 1943	Augmentation depuis 1939	
	Number Nombre	Number Nombre	
1. Shipbuilding .....	75,847	72,356	Constructions navales .....

10. Sawmills .....	43,954	11,555	Scieries .....
11. Primary iron and steel .....	34,222	19,395	Fer et acier basiques .....
12. Clothing, men's factory .....	30,885	8,459	Confection pour hommes .....
Total, twelve industries .....	513,624	358,173	Total, douze industries .....
Total, all industries .....	1,241,068	582,954	Total, toutes industries .....

The greatest expansion in production in 1943, as measured by the number of persons employed, was reported by the iron and its products group with an increase of 20.8 per cent. This was followed by the non-ferrous metal products group with 20.4 per cent, miscellaneous industries 13.0 per cent, vegetable products 1.5 per cent, animal products 1.1 per cent, and non-metallic mineral products, .9 per cent. Employment in textiles and textile products declined by 4.5 per cent, wood and paper products 1.2 per cent and chemicals and allied products .8 per cent.

The table following gives the percentage increase in 1943 as compared with 1942 for all groups and provinces.

L'augmentation dans la production en 1943, telle que mesurée par le nombre de personnes employées est de 20.8 p.c. dans le groupe du fer et ses dérivés. Viennent ensuite le groupe des métaux non ferreux avec 20.4 p.c., industries diverses, 13.0 p.c., produits végétaux, 1.5 p.c., produits animaux, 1.1 p.c., et métallurgie, .9 p.c. Le nombre d'employés a diminué de 4.5 p.c. dans les industries textiles, 1.2 p.c. dans le bois et le papier, et .8 p.c. dans les produits chimiques.

Le tableau ci-dessous donne le pourcentage d'augmentation en 1943 par groupe et par province.

	Percentage variation, 1943 compared with 1942

Manufacturing establishments reporting in 1943 numbered 27,652. Of these 230 were located in Prince Edward Island, 1,278 in Nova Scotia, 862 in New Brunswick, 9,372 in Quebec, 10,587 in Ontario, 1,245 in Manitoba, 976 in Saskatchewan, 1,133 in Alberta, 1,961 in British Columbia and 8 in the Yukon and Northwest Territories. These plants reported a capital investment of \$6,317,166,727 in fixed and current assets; they furnished employment to 1,241,068 persons who were paid \$1,987,-292,384 in salaries and wages. They also produced goods with a selling value at the factory of \$8,732,860,939 and spent \$4,700,493,083 for materials, while the value added by manufacture totalled \$3,806,413,541. It should be remembered that the value added by manufacture does not represent the manufacturers' profits. The value

Le nombre d'établissements manufacturiers du Canada s'élève à 27,652 dont 230 sont dans l'île du Prince-Edouard, 1,278 dans la Nouvelle-Ecosse, 862 dans le Nouveau-Brunswick, 9,372 dans le Québec, 10,587 dans l'Ontario, 1,245 dans le Manitoba, 976 dans la Saskatchewan, 1,133 dans l'Alberta, 1,961 dans la Colombie Britannique et 8 dans le Yukon et les Territoires du Nord-Ouest. Ces établissements ont \$6,317,166,727 en actif fixe et liquide, ils ont fourni du travail à 1,241,068 personnes qui reçoivent \$1,987,292,384 en salaires et gages. La valeur de leurs produits s'élève à \$8,732,860,939, les matières employées à \$4,700,493,083, tandis que la valeur ajoutée par la fabrication est de \$3,806,413,541. Il ne faut pas oublier que la valeur ajoutée par la fabrication ne représente pas les profits du manufacturier; elle s'obtient par le

added is obtained by subtracting the cost of materials, including fuel and power, from the value of the products. This difference represents the value added to the raw materials by labour. It is this difference which the employer of labour uses to pay for the labour itself, the overhead expenses, interest and profits. Compared with the previous year, there was an increase of \$496,439,783 in the value added by manufacture. Of this amount \$304,487,542 was passed along in increased salary and wage payments to employees.

The manufacturing industries of Canada are concentrated largely in the provinces of Ontario and Quebec. Ontario is the dominant manufacturing province of Canada. In 1943 with only 38 per cent of the total number of establishments reporting, it employed 47 per cent of the capital, 46 per cent of the number of employees and produced over 48 per cent of the entire output. Quebec ranks second with 33 per cent of the output while British Columbia with 7 per cent of the output ranks third.

As mentioned previously the number of persons engaged in manufacturing in 1943 totalled 1,241,068 of whom 193,195 were classed as salaried employees and 1,047,873 as wage-earners. Compared with the previous year there was thus an increase of 88,977 employees. The increase in the number of male employees totalled 36,089 and female employees 52,888. To meet the shortage of manpower, more and more women are being absorbed in industry. Indicative of this trend is the increase in the proportion of women workers engaged in manufacturing. Whereas in 1939, out of every 1,000 workers employed 220 were females, in 1943 this figure jumped to 282. Earnings in 1943 also increased. Average salaries at \$2,012 were \$122 higher than in the previous year, while average wages at \$1,525 were \$142 higher.

A prominent feature of Canadian manufacturing development in recent years has been the growth of non-ferrous metal smelting and refining. This industry based on mineral resources has taken its place among the leading manufactures, along with the industries based upon forest, agricultural and live-stock resources. The pulp and paper industry, although of comparatively recent development in Canadian industry, had by 1933 displaced flour milling as Canada's most important manufacturing industry. In spite of recent vicissitudes it held that position up to 1933, when it was displaced by the non-ferrous metal smelting and refining industry. In salaries and wages paid, however, pulp and paper was still the dominant industry until 1941.

The incidence of the war resulted in a rearrangement in the rank of many industries. Industries producing supplies and equipment for the armed forces naturally advanced while those industries producing for the domestic consumers' market declined in importance. To supply the raw materials needed by the industries engaged principally in war production, it became necessary

soustraction du coût des matières premières, plus le combustible et l'électricité, de la valeur brute des produits. Cette différence représente la valeur ajoutée à la matière première par le travail, laquelle sert à payer la main-d'oeuvre, les frais d'exploitation, les intérêts et assure aussi le profit du manufacturier. Comparativement à l'année précédente, il y a eu une augmentation de \$496,439,783 dans la valeur nette. De ce montant, \$304,487,542 représente l'augmentation dans les salaires et gages payés aux employés.

L'industrie manufacturière du Canada est centralisée principalement dans l'Ontario et le Québec. L'Ontario est à la tête du Dominion; en 1943 cette province, avec 38 p.c. des établissements employait 47 p.c. des capitaux, 46 p.c. du nombre total des employés tandis que sa production s'élevait à plus de 48 p.c. de la production totale. Québec suit avec 33 p.c. de la production, puis vient la Colombie Britannique avec 7 p.c.

Ainsi que nous l'avons dit précédemment, le nombre de personnes employées par les industries canadiennes en 1943 est de 1,241,068, dont 193,195 sont des employés à salaire et 1,047,873 employés à gages. Comparativement à l'année précédente, il y a eu une augmentation de 88,977 employés. L'augmentation dans le nombre d'hommes employés s'élève à 36,089 et celle des femmes à 52,888. Afin d'obvier à la rareté de la main-d'oeuvre masculine, on emploie de plus en plus les femmes dans les industries. Tandis qu'en 1939 sur chaque 1,000 employés, 220 étaient des femmes, en 1943 le nombre de femmes monte à 282. Il y a aussi une augmentation dans les salaires et gages. La moyenne des salaires (\$2,012) est de \$122 plus élevée que celle de l'année précédente et celle des gages (\$1,525) plus élevée de \$142.

Un trait caractéristique du développement de l'industrie manufacturière canadienne ces dernières années a été la croissance de l'industrie de la réduction et de l'affinage des métaux autres que le fer. Cette industrie ayant pour base les ressources minérales, a pris place parmi les principales activités manufacturières basées sur les ressources des forêts, de l'agriculture et du bétail. L'industrie de la pulpe et du papier, quoique relativement jeune, était devenue l'industrie la plus importante du Canada en 1933 alors qu'elle supplantait les minoteries. En dépit des circonstances adverses, elle a conservé ce premier rang jusqu'en 1933. Cette année-là, l'affinage des métaux non ferreux monta, à son tour, au premier rang. Cependant, l'industrie de la pulpe et du papier fut première en ce qui concerne les salaires et les gages, jusqu'en 1941.

La guerre a déterminé tout un remaniement dans l'ordre des industries. Naturellement, les industries produisant des fournitures et du matériel pour les forces armées ont pris de l'importance, tandis que celles engagées dans la production pour consommation domestique en ont perdu. Pour approvisionner de matières brutes les industries engagées principalement dans la production de

in many cases to restrict or prohibit the manufacture of many products such as pleasure cars, radios, washing machines, electrical equipment, household appliances, agricultural implements, etc. Many industries were thus forced to change over to war-time production. These changes, however, did not affect the value of the output of these industries, and consequently their importance as producers of manufactured goods did not alter drastically. To analyse the impact of the war on any industry it becomes necessary to compare the nature of the products made before the war with that of the present. For example, the number of employees engaged in the agricultural implements industry increased by 8,759 since 1939, this in spite of the fact that the output of agricultural implements increased but slightly. The main increase was due to a change over of some of the plants to war production. Due to the many changes in production occasioned by the present war, it becomes impossible to trace industrial trends from the principal statistics alone as published in the present report. To make a proper evaluation of any industry it is necessary to study the changes in the types of commodities produced. This should be borne in mind in making industrial comparisons with pre-war years.

guerre, il a fallu dans bien des cas limiter ou interdire la fabrication d'un grand nombre d'articles tels que: automobiles de promenade, radios, lessiveuses, accessoires électriques, machines agricoles, accessoires de ménage, etc.; ainsi, plusieurs industries ont dû transformer leurs produits en produits de guerre. Ces changements, toutefois, n'ont pas modifié la valeur de la production de ces industries et, partant, leur importance comme productrices de produits ouvrés n'a pas changé de façon radicale. Pour analyser le choc de la guerre sur une industrie quelconque, il faut comparer la nature des produits fabriqués avant la guerre et celle des produits fabriqués présentement. Par exemple, le nombre d'employés engagés dans l'industrie de la machinerie agricole a augmenté de 8,759 depuis 1939 et ceci, malgré la faible augmentation de production de machines agricoles. Cette augmentation dans la main-d'oeuvre est attribuée au passage de certains des établissements à la production de guerre. En raison de nombreux changements déterminés dans la production par la guerre actuelle, il devient impossible, d'après les seules principales statistiques publiées dans ce rapport, de tracer l'orientation de l'industrie. Pour donner à une industrie quelconque sa valeur réelle, il est nécessaire d'étudier les changements dans les genres de produits fabriqués. Il faut donc compter tous ces faits dans les comparaisons entre les industries actuelles et celles de l'avant-guerre.

The ten leading industries in 1943 in order of their importance were as follows:

Les dix principales industries, par ordre d'importance, se classent comme suit:

Industry	Rank in 1943 Rang en 1943	Rank in 1942 Rang en 1942	Industrie
Non-ferrous metal smelting and refining .....	1	1	Réduction et affinage des métaux non ferreux .....
Miscellaneous chemical products ....	2	5	Autres produits chimiques, n.a.é. ....
Slaughtering and meat packing .....	3	2	Abattoirs et salaisons .....
Shipbuilding and repairs .....	4	6	Constructions navales .....
Miscellaneous iron and steel products	5	12	Divers produits du fer et de l'acier ..
Automobiles .....	6	4	Automobiles .....
Pulp and paper .....	7	3	Pulpe et papier .....
Aircraft .....	8	18	Aéroplanes .....
Electrical apparatus and supplies ..	9	9	Appareils et fournitures électriques ..
Primary iron and steel .....	10	7	Sidérurgie .....

1941	26,293	4,905,503,966	961,178	1,264,862,643	3,296,547,019	2,605,119,788	6,076,308,124
1942	27,862	5,488,785,545	1,152,091	1,682,804,842	4,037,102,725	3,309,973,758	7,553,794,972
1943	27,652	6,317,166,727	1,241,068	1,987,892,384	4,700,493,083	3,806,413,541	8,732,860,999

1. - A change in the method of computing the number of wage-earners in the years 1925 to 1930 increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years.

1. - Vu la modification apportée à la méthode de calcul de 1925 à 1930 le nombre d'employés à gages est plus élevé qu'il ne l'aurait été si l'on s'était servi de l'ancienne méthode. En 1931, toutefois, la méthode antérieure à 1925 a été réadoptée. Les chiffres de 1931 et des années suivantes sont donc comparables avec ceux de 1924 et des années précédentes.

2. - In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924.

2. - En vertu d'une résolution adoptée à la conférence des Statisticiens du Commonwealth Britannique, en 1935, la valeur nette de production est maintenant calculée en soustrayant le coût des matières premières, plus le combustible et l'électricité, de la valeur brute des produits. Les chiffres de 1924 et des années postérieures ont donc été révisés conformément à cette résolution. Les calculs ne peuvent remonter plus haut que 1924, les statistiques du coût de l'électricité n'existant pas antérieurement à cette date.

NOTE: In accordance with the resolution passed at the Conference of British Commonwealth Statisticians, held in 1935, the net value of production is to be computed by subtracting the cost of materials, fuel and electricity from the gross value of products. Prior to this, only the cost of materials was deducted.

Profits and losses cannot be estimated from the figures published in this report as no data are collected for overhead expenses such as rent, depreciation, taxes, insurance, advertising, etc.

NOTA: Conformément à une résolution de la Conférence des Statisticiens du Commonwealth Britannique, tenue en 1935, la valeur nette de la production est calculée en soustrayant le coût des matières premières, du combustible et de l'électricité de la valeur brute des produits. Antérieurement, le coût des matières premières en était seul déduit.

Les profits et les pertes ne peuvent être estimés d'après les chiffres publiés dans ce rapport parce qu'aucune donnée n'est colligée sur les frais généraux, tels que loyer, dépréciation, taxes, assurances, publicité, etc.
