THE MANUFACTURING INDUSTRIES OF CANADA,  
BY PROVINCES, 1948

The manufacturing industries of Canada in 1948 established a new record in gross value of production with a total of \$11,876,-790,012. This represents an increase of \$1,-795,763,432 or 17.8 per cent over the previous year, and \$2,803,097,493 or 31 per cent over the previous high attained in 1944. In terms of the actual physical output, however, the record is not so impressive. The increase of 17.8 per cent in the gross value of production is accounted for in large part by an increase in the wholesale prices of partly and fully manufactured products, and only for about 3 per cent in the physical volume of production. The number of employees at 1,156,006, although representing an increase of 2.1 per cent over the previous year, was still 85,062 below the record number employed in 1943. Salary and wage payments at \$2,409,809,791 were the highest on record and exceeded the previous high reported in 1947 by \$323,883,825.

From the point of view of employment which more closely reflects changes in the physical volume of production than any other factor, the non-metallic mineral products group with an increase of 4.4 p. cent reported the greatest increase in production. The non-ferrous metal products group came second with an increase of 4.0 per cent, followed by textiles and textile products with 3.6 per cent, wood and paper products 3.4 per cent, chemicals and allied products 2.7 per cent, iron and its products 2.4 per cent, and animal products .7 per cent. The vegetable products and miscellaneous industries groups reported declines of 2.4 and 3.0 per cent respectively.

Of the total increase in employment of 24,256 in 1948 the forty leading industries accounted for 23,389. Twenty-nine industries reported an increase of 33,052 and eleven reported a decline of 9,663. The agricultural implements industry with an increase of 3,098 recorded the greatest gain in production. This was followed by railway rolling-stock with an increase of 2,845, women's factory clothing 2,447, primary iron and steel 2,434, non-ferrous smelting and refining 2,252, pulp and paper 1,978, planing mills 1,920, synthetic fibres and silk 1,369, printing and publishing 1,338, sawmills, 1,331, men's factory clothing 1,275, iron castings 1,187, electrical apparatus and supplies 1,137, hosiery and knitted goods 1,123, furniture 1,112, butter and cheese 1,067, etc. Of the eleven industries reporting declines in employment the following were the most severely affected: shipbuilding and repairs reported a loss of 2,720, rubber goods, 1,772, flour and feed mills 1,161, automobile supplies 1,099, breweries 971 and miscellaneous foods 565. Declines in the remaining five industries were only moderate.

Manufacturing establishments reporting in 1948 numbered 33,447. Of these 251 were located in Prince Edward Island, 1,440 in Nova Scotia, 1,067 in New Brunswick, 11,122 in Quebec, 12,127 in Ontario, 1,400 in Manitoba, 926 in Saskatchewan, 1,568 in Alberta, 3,526 in British Columbia, and 17 in Yukon and Northwest Territories. These plants furnished employment to 1,156,006 persons who received

LES INDUSTRIES MANUFACTURIERES DU CANADA  
PAR PROVINCES, 1948

Les industries manufacturières du Canada ont atteint en 1948 un nouveau sommet quant à la valeur brute de la production, soit \$11,876,-790,012. C'est là une augmentation de \$1,795,763,-432 ou 17.8 p. 100 sur l'année précédente, et de \$2,803,097,493 ou 31 p. 100 sur le maximum précédent atteint en 1944. Tousfaire, pour ce qui est de la production réelle, le résultat n'est pas aussi impressionnant. L'augmentation de 17.8 p. 100 de la valeur brute de la production provient en grande partie d'une hausse des prix de gros des produits partiellement ou entièrement ouvrés, le volume de la production n'augmentent en réalité que d'environ 3 p. 100. Le nombre d'employés (1,156,006) représente une augmentation de 2.1 p. 100 sur l'année précédente, mais demeure de 85,-062 au-dessous du sommet touché en 1943. Les salaires et gages ont atteint un nouveau sommet de \$2,409,809,791 et dépassé de \$323,883,825 le maximum antérieur, celui de 1947.

Au point de vue de l'emploi, qui reflète plus exactement les changements du volume de la production que tout autre facteur, le groupe des métalloïdes a enregistré une augmentation de 4.4 p. 100 et c'est celui dont la production s'accroît le plus. Le groupe des produits métalliques non-ferreux est deuxième avec une augmentation de 4.0 p. 100, suivi des textiles et produits textiles (3.6 p. 100), des produits du bois et du papier (3.4 p. 100), des produits chimiques et parachimiques (2.7 p. 100), du fer et ses dérivés (2.4 p. 100) et des produits animaux (.7 p. 100). Les groupes des substances végétales et des industries diverses déclarent des diminutions respectives de 2.4 et 3.0 p. 100.

En 1948, les quarante principales industries contribuent pour 23,389 à l'augmentation totale (24,256) de l'emploi. Vingt-neuf industries déclarent une augmentation de 33,052, et onze, une diminution de 9,663. L'industrie des instruments agricoles, qui déclare 3,098 employés de plus, accuse l'augmentation de production la plus élevée. Suivent le matériel roulant de chemin de fer avec une augmentation de 2,845 employés; la confection pour femmes, 2,447; fer et acier primaires, 2,434; réduction et affinage des métaux non-ferreux, 2,-252; pulpe et papier, 1,978; ateliers de rabotage, 1,920; fibre synthétique et soie, 1,369; impression et édition, 1,338; scieries, 1,331; confection pour hommes, 1,275; moulages en fer, 1,187; appareils et fournitures électriques, 1,137; bonneterie et tricots, 1,123; meubles, 1,112; beurre et fromage, 1,067. Sur les onze industries qui déclarent des diminutions, les suivantes ont été le plus sévèrement atteintes: construction et réparation de navires, baisse de 2,720; articles en caoutchouc, 1,772; moulins à farine et à provende, 1,161; fournitures pour automobiles, 1,099; brasseries, 971; et produits alimentaires divers, 565. Les diminutions dans les cinq autres industries ont été modérées.

Le nombre d'établissements manufacturiers qui font rapport en 1948 s'élève à 33,447, dont 254 dans l'Île du Prince-Édouard, 1,440 en Nouvelle-Ecosse, 1,067 au Nouveau-Brunswick, 11,122 dans le Québec, 12,127 en Ontario, 1,400 au Manitoba, 926 en Saskatchewan, 1,568 en Alberta, 3,526 en Colombie-Britannique et 17 dans le Yukon et les Territoires du Nord-Ouest. Ces établissements emploient 1,156,006 personnes qui reçoivent \$2,409,809,791 en

\$2,409,809,791 in salaries and wages. They also produced goods with a selling value at the factory of \$11,876,790,012 and spent \$6,632,881,628 for materials, while the value added by manufacture totalled \$4,940,369,190. It should be remembered that the value added by manufacture does not represent the manufacturers' profits. The value added is obtained by subtracting the cost of materials, including fuel and electricity, from the value of the products. This difference represents the value added to the raw materials by labour. It is this difference which the employer of labour uses to pay for the labour itself, the overhead expenses, interest and profits. Compared with the previous year, there was an increase of \$648,313,388 in the value added by manufacture.

The manufacturing industries of Canada are concentrated largely in the provinces of Ontario and Quebec. Ontario is the dominant manufacturing province of Canada. In 1948, with only 36 per cent of the total number of establishments reporting, it furnished employment to 48 per cent of the number of persons engaged in manufacturing and produced over 48 per cent of the entire output. Quebec with 30 per cent of the output ranks second, while British Columbia with 8 per cent ranks third.

The following table gives the percentage variation in employment and gross value of production in 1948 as compared with 1947 for all major groups and provinces.

salaires. La valeur marchande de leurs produits s'élève à \$11,876,790,012 et la valeur des matières employées à \$6,632,881,628, tandis que la valeur ajoutée par la fabrication est de \$4,940,369,190. A noter que la valeur ajoutée par la fabrication ne représente pas les bénéfices du manufacturier; elle s'obtient par la soustraction du coût des matières premières, y compris le combustible et l'électricité, de la valeur brute des produits. Cette différence représente la valeur ajoutée à la matière première par le travail et sert à payer la main-d'œuvre, les frais généraux, les intérêts et les bénéfices. Comparativement à l'année précédente, la valeur ajoutée par la fabrication augmente de \$648,313,388.

L'industrie manufacturière du Canada est centralisée principalement dans l'Ontario et le Québec. L'Ontario est à la tête des provinces. En 1948 cette province, avec 36 p. 100 seulement de tous les établissements faisant rapport, emploie 48 p. 100 de la main-d'œuvre manufacturière et donne plus de 48 p. 100 de la production globale. Le Québec, avec 30 p. 100 de la production, se classe deuxième et la Colombie-Britannique avec 8 p. 100, troisième.

Le tableau ci-dessous donne le pourcentage des variations dans le degré d'emploi et la valeur de la production en 1947 et 1948 par groupe d'industries et par province.

	Percentage variation, 1948 compared with 1947				
	Pourcentage de changement entre 1948 et 1947

As mentioned previously, the number of persons employed in manufacturing in 1948 totalled 1,156,006 of whom 198,279 were classed as salaried employees and working proprietors and 957,727 as wage-earners. Compared with the previous year there was an increase of 24,256 employees. Male employees increased by

Comme on l'a vu, le nombre d'employés dans les industries manufacturières en 1948 s'élèvait à 1,156,006, dont 198,279 étaient des employés à salaires et des propriétaires actifs et 957,727 des employés à gages. Il y a augmentation de 24,256 employés au regard de l'année précédente. Le nombre d'hommes augmente de 23,383 et celui de

23,383 and female employees by 873. To meet the shortage of man power during the war years, more and more women were absorbed into industry. Indicative of this trend is the increase in the proportion of women workers engaged in manufacturing. Whereas in 1939, out of every 1,000 workers employed 220 were females; in 1944 this figure jumped to 287. With the end of the war many female workers who lost their jobs were not absorbed by other industries, with the result that the proportion of females employed in manufacturing declined to 239 in 1948. Earnings in 1948 were \$2,085 as against \$1,843 the previous year. Average salaries at \$2,687 were \$203 higher, while average wages at \$1,959 were 246 higher.

In interpreting the industry statistics published in this report it should be remembered that the figures of employment, value of production, etc., do not refer to individual products but to all the products made in an industry. For example, the value of production of the confectionery industry amounting to \$102,686,263 does not imply that this was the value of confectionery produced. What it means is that the firms whose principal product was confectionery, had a value of production of \$102,686,263. This figure, in addition to confectionery, includes all the subsidiary products made by these firms, such as ice cream which was valued at \$2,475,034, and bread and other bakery products valued at \$1,-961,933. Confectionery is also produced as a subsidiary product by firms credited to other industrial classification. For total production figures of individual products reference should be made to "The Alphabetical List of Products" published annually in the printed report on manufacturing.

The incidence of the depression during the thirties resulted in a rearrangement in the ranking of many industries which in some cases proved to be temporary. Under the impetus of war production, the industries engaged in producing the equipment needed by the armed forces, such as shipbuilding, aircraft, and miscellaneous chemical products, advanced to higher positions. With the end of the war in 1945, the industries engaged in the production of consumers' goods, by reason of the greater demand for their products, bettered their position. As shown by the following table, a return to the pre-war ranking of the leading industries is in evidence. The ten leading industries in 1948 in order of their importance, as measured by the gross value of production, were as follows:

Industry	RANK RANG			Industrie
	1948	1944	1939	
Pulp and paper .....	1	5	2	Pulpe et papier .....
Slaughtering and meat packing ....	2	1	3	Abattoirs et salaisons .....
Non-ferrous metal smelting and refining .....	3	2	1	Réduction et affinage des métaux non-ferreux .....
Electrical apparatus and supplies .....	4	8	9	Appareils et fournitures électriques .....
Sawmills .....	5	11	8	Scieries .....
Automobiles .....	6	7	5	Automobiles .....
Petroleum products .....	7	14	6	Produits pétroliers .....
Butter and cheese .....	8	10	4	Beurre et fromage .....
Flour and feed mills .....	9	12	7	Minoterie et meunerie .....
Primary iron and steel .....	10	13	11	Fer et acier primaires .....

femmes, de 873. Afin d'obvier à la rareté de la main-d'œuvre pendant la guerre, l'industrie a employé un nombre croissant de femmes. L'augmentation du nombre d'ouvrières dans les manufactures reflète cette tendance; tandis qu'en 1939, sur 1,000 employés, 220 étaient des femmes, en 1944 le nombre de femmes monte à 287. La guerre terminée, un grand nombre de femmes qui perdent leur emploi ne sont pas embauchées par d'autres industries, si bien que la proportion des femmes employées dans les manufactures tombe à 239 en 1948. Le gain en 1948 est de \$2,085, contre \$1,843 l'année précédente. Le salaire moyen, soit \$2,687, augmente de \$203, tandis que la moyenne des gages monte de \$246 pour atteindre \$1,959.

Il ne faut pas oublier que les statistiques publiées dans le présent rapport en ce qui concerne l'emploi, la valeur de la production, etc. ne couvrent pas les produits individuels des établissements mais tous les produits fabriqués dans une industrie. Ainsi l'industrie de la confiserie a une valeur de production de \$102,686,263, chiffre qui comprend, en outre de la confiserie, tous les produits secondaires fabriqués par ces établissements, comme la crème glacée (valeur de \$2,475,034), le pain et autres produits de boulangerie (\$1,961,933). La confiserie est aussi le produit secondaire de certains établissements figurant dans d'autres classes d'industries. Pour obtenir les chiffres de production totale, il faut se référer à la "Liste alphabétique des produits", qui paraît annuellement dans le rapport imprimé sur l'industrie manufacturière.

Durant la dépression des environs de 1930, plusieurs industries ont changé de place dans le tableau général, mais dans plusieurs cas la chose était temporaire. Sous l'impulsion de la production de guerre, les industries produisant l'équipement militaire, comme les chantiers maritimes, l'avionnerie et les produits chimiques divers, ont atteint des rangs supérieurs. À la fin de la guerre, en 1945, les industries productrices de biens de consommation, par suite de la forte demande de leurs produits, ont amélioré leur position. Comme l'indique le tableau suivant, les principales industries tendent maintenant à reprendre leur importance d'avant-guerre. Les dix principales industries en 1948, par ordre d'importance, mesuré d'après la valeur brute de leur production, sont les suivantes:

Table 1. - Summary Statistics of the Manufacturing Industries, 1917 - 1948.

1/ A change in the method of computing the number of wage-earners in the years 1925 to 1930 increased the number somewhat over that which the method otherwise used would have given. In 1931, however, the method in force prior to 1925 was re-adopted. The figures for 1931 and later years are, therefore, comparable with those for 1924 and earlier years.

1/ Vu la modification apportée à la méthode de calcul de 1925 à 1930 le nombre d'employés à gages est plus élevé qu'il ne l'aurait été si l'on s'était servi de l'ancienne méthode. En 1931, toutefois, la méthode antérieure à 1925 a été ré-adoptée. Les chiffres de 1931 et des années suivantes sont donc comparables avec ceux de 1924 et des années précédentes.

2/ In accordance with a resolution passed by the Conference of British Commonwealth Statisticians, 1935, the net value of production is now computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products. The figures for 1924 and later years have, therefore, been revised in accordance with this resolution. The revision could not be carried farther back as statistics for the cost of electricity are not available for years prior to 1924.

2/ En vertu d'une résolution adoptée à la conférence des Statisticiens du Commonwealth Britannique, en 1935, la valeur nette de production est maintenant calculée en soustrayant le coût des matières premières, plus le combustible et l'électricité, de la valeur brute des produits. Les chiffres de 1924 et des années postérieures ont donc été révisés conformément à cette résolution. Lea calculs ne peuvent remonter plus haut que 1924, les statistiques du coût de l'électricité n'existant pas antérieurement à cette date.

NOTE: In accordance with the resolution passed at the Conference of British Commonwealth Statisticians, held in 1935, the net value of production is to be computed by subtracting the cost of materials, fuel and electricity from the gross value of products. Prior to this, only the cost of materials was deducted.

Profits and losses cannot be estimated from the figures published in this report, as no data are collected for overhead expenses such as rent, depreciation, taxes, insurance, advertising, etc.

NOTA: Conformément à une résolution de la Conférence des Statisticiens du Commonwealth Britannique, tenue en 1935, la valeur nette de la production est calculée en soustrayant le coût des matières premières, du combustible et de l'électricité de la valeur brute des produits.

Antérieurement, le coût des matières premières en était seul déduit.

Les profits et les pertes ne peuvent être estimés d'après les chiffres publiés dans ce rapport parce qu'aucune donnée n'est colligée sur les frais généraux, tels que loyer, dépréciation, taxes, assurances, publicité, etc.
