Acting Chief, General Manufactures Branch: A. Cohen, B.Com.

SECTION I. - MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1934.

A report on the manufacturing industries of the Maritime Provinces for the year 1934 is presented herewith.

The report is divided into four sections. Section I deals with the three provinces as a group and the tables included therein show the principal statistics, statistics of the leading industries and statistics of the twenty leading cities and towns. Section 2 deals with the province of Prince Edward Island, Section 3 with the province of Nova Scotia and Section 4 with the province of New Brunswick.

Manufacturing production in the Maritime Provinces was materially stimulated in 1934. Compared with the previous year, there was an increase of \$17,398,913 or 17.3 per cent in the gross value of production, 3,337 or 12.8 per cent in the number of persons employed, \$3,192,307 or 15.1 per cent in the amount of salaries and wages paid, and \$7,590,105 or 16 per cent in the cost of materials used. The only decline was in the capital investment which was \$3,104,480 or 12.5 per cent lower, this decrease being in part due to current charges for depreciation.

Of the three Maritime Provinces, Nova Scotia made the greatest advance in employment and salaries and wages paid, while New Brunswick led in gross value of products. The increases in employment and production for the Maritime Provinces and Canada are given in the table below.

Increases in 1934 as compared with 1933.

	Number of Employees	Salaries and Wages Paid	Gross Value of Products
	P.C.	P.C.	P.C.
CANADA .....	10.4	14.6	21.4
Prince Edward Island .....	2.6	.4	7.3
Nova Scotia .....	13.4	15.9	15.0
New Brunswick .....	12.7	15.1	20.6

On referring to table 1, which gives the combined principal statistics of the Maritime Provinces, it will be noted that in 1934 there were 2,506 establishments reporting with a capital investment in fixed and current assets of \$246,058,149. Employment was furnished to 29,656 persons who received \$24,369,166 in salaries and wages. The gross output was valued at \$118,205,014 and the materials used cost \$55,056,462, while the value added by manufacture amounted to \$56,045,214. For the change in method of calculating the value added by manufacture, see footnote on page 2.

Pulp and paper with an output valued at \$17,662,380 was again the leading industry from the standpoint of value of production. Fish curing and packing ranke

MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1934.

second with a value of production of \$8,278,823, while central electric stations came third with a production of \$8,256,083. The leading industries given in table 2 show statistics only for industries having three or more establishments. Other leading industries are: sugar refining, petroleum refining and cotton yarn and cloth. Figures for these industries, however, cannot be published as there are less than three establishments in each.

Principal statistics of the leading cities and towns are given in table 3. Saint John, New Brunswick, with an output valued at \$17,176,433 is the leading city. This was followed by Sydney, Nova Scotia, with an output of \$10,123,057, Halifax, Nova Scotia, with \$9,698,038, Moncton, New Brunswick, with \$5,232,298, Dartmouth, Nova Scotia, with \$4,880,404, etc.

Detailed statistics of the manufacturing industries of Prince Edward Island, Nova Scotia and New Brunswick follow in the order named.

Table 1. - Principal Statistics of the Maritime Provinces Compared for the Period 1927 to 1934<sup>x</sup>.

Year	Estab-lish-ments No.	Capital Invested \$	Em-ployees No.	Salaries and Wages \$	Cost of Materials Used \$	Gross Value of Products \$
1927 .....	2,353	230,323,871	39,066	29,297,894	87,695,340	151,618,590
1928 .....	2,238	256,591,785	39,220	31,233,849	86,666,294	156,807,510
1929 .....	2,331	257,118,229	41,616	34,418,960	94,824,889	170,365,507
1930 .....	2,493	277,724,651	41,546	33,314,237	80,950,269	153,526,149
1931 <sup>x</sup> .....	2,611	262,703,487	30,452	28,397,692	61,269,473	130,025,897
1932 .....	2,519	246,961,070	26,276	22,548,783	45,646,118	101,390,415
1933 .....	2,441	249,162,629	26,319	21,176,859	47,466,357	100,806,101
1934 .....	2,506	246,058,149	29,656	24,369,166	55,056,462	118,205,014

<sup>x</sup>The large decrease in the number of employees since 1931 is not entirely due to the decline in manufacturing production. The decrease is in part due to the change in method of computing the average annual employment of wage-earners. Between 1925 and 1930 the average was obtained by summing the averages of individual plants, based on the number of months in actual operation, and not by dividing by twelve the sum of the monthly employment figures. In 1931, however, a change was made to the old method, whereby the aggregate of the monthly figures is divided by twelve. This method gives the man year that each plant operates. The change in method, therefore, affects the average annual employment as well as the average wages paid in seasonal industries, such as fruit and vegetable canning, fish canning, sawmills, etc.

1/ In accordance with the resolution passed at the Conference of British Commonwealth Statisticians held in 1935, the net value of products is now computed by subtracting the cost of materials, fuel and electricity from the gross value of products. Prior to this only the cost of materials was deducted.

NOTE: - Statistics for cities and towns do not include central electric stations which are shown by provinces only.

SECTION 2. -- MANUFACTURING INDUSTRIES OF THE PROVINCE OF PRINCE EDWARD ISLAND, 1934.

Manufacturing establishments in Prince Edward Island in 1934 numbered 273, an increase of ten over the previous year. They had a capital investment of \$3,517,088 and employed 1,093 persons who were paid \$600,216 in salaries and wages. For raw materials they spent the sum of \$1,921,421, while the gross value of finished merchandise produced amounted to \$3,302,586.

After four years of continuous declines in production, Prince Edward Island, in common with other sections of Canada, showed a slight improvement in industrial activity in 1934. Compared with the previous year there were increases of \$130,993 or 4 per cent in the capital invested, twenty-eight in the number of persons employed, and \$224,769 or 7.3 per cent in the gross value of production. These and other variations are shown in detail in tables 4 and 5.

Table 6 shows the principal statistics of the leading industries of the Province. It will be observed that the two most important are fish curing and packing and butter and cheese. These two industries accounted for 38 per cent of the entire production. Also, on turning to table 8, it will be noted that the production of various animal products accounts for about 48 per cent of the total for all groups.

Statistics of the various industries making up the different groups are shown in detail in table 9.

Table 4. -- Summary of the Principal Statistics of the Province of Prince Edward Island, 1927-1934.

Year	Estab-lish-ments No.	Capital Invested \$	Em- ployees No.	Salaries and Wages \$	Cost of Materials Used \$	Gross Value of Products \$

SECTION 3. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF NOVA SCOTIA, 1934.

Establishments operating in Nova Scotia in 1934 numbered 1,386. The gross value of their products amounted to \$60,844,581, while the capital invested totalled \$119,064,747. Employment was furnished to 15,041 persons who received \$12,401,325 in salaries and wages. The cost of materials used reached a total of \$28,497,123 and the value added by manufacture \$28,406,917. The downward trend in manufacturing production commenced in 1930 was definitely checked in 1934. Compared with the previous year there was an increase of \$7,942,644 in the gross value of production, \$3,094,691 in the cost of materials used, 1,781 in the number of persons employed, \$1,700,136 in the salaries and wages paid, and \$4,050,638 in the value added by manufacture. In spite of these increases, however, the capital invested was \$4,581,214 lower. This decrease is in part due to current charges for depreciation.

As shown in table 16 the principal industry in Nova Scotia in 1934 from the standpoint of gross value of products was that of primary iron and steel. The value of production amounted to \$6,701,638 as compared with a value of \$3,763,242 the previous year. This was followed by fish curing and packing with an output valued at \$5,268,128, central electric stations \$4,904,770, pulp and paper \$4,296,428, etc. The primary iron and steel industry, which was the most severely affected by the decline in manufacturing activity, regained the premier position that it usually occupies. It rose from fourth place in 1933 to first place in 1934, while central electric stations dropped from first to third place. The principal statistics of the leading industries are given in table 16.

The production of wood and paper products constitutes the main industrial group, and accounted for \$11,106,120 or 18.3 per cent of the entire output of the Province. The iron and its products group came second with a production of \$10,229,261, followed by vegetable products with \$9,625,033, non-metallic mineral products \$9,549,497 and animal products \$8,086,770. The iron and steel group, which dropped from first place in 1931 to fifth place in 1932 improved its position materially in 1933 and 1934. The value of its output rose to \$10,229,261 in 1934 and thus secured second place.

Table 14. - Summary of the Principal Statistics of the Province of Nova Scotia, 1928 to 1934.

SECTION 4. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF NEW BRUNSWICK, 1934.

Manufacturing production in New Brunswick improved considerably in 1934. Compared with the previous year there was an increase of 20.6 per cent in the gross value of production, 12.7 per cent in the number of persons employed, 15.1 per cent in the amount of salaries and wages paid and 22.9 per cent in the value added by manufacture. Reports were received from 847 establishments in 1934. These plants reported a gross value of production of \$54,057,847, a capital investment in fixed and current assets of \$123,476,314 and a payroll of 13,522 persons who received \$11,367,625 in salaries and wages. They also spent \$24,637,918 for materials and \$3,062,672 for fuel and electricity, leaving \$26,357,257 as the value added by manufacture.

In 1934 the pulp and paper industry again led all others in value of production with an output amounting to \$13,365,952 or 25.7 per cent of the total. Sawmills followed with an output valued at \$3,856,865. Central electric stations ranked third with a production of \$3,071,588, while coffee, tea and spices ranked fourth with an output of \$2,956,440. Sugar refining, railway rolling stock and cotton yarn and cloth are other leading industries in the Province. These, however, cannot be listed as there are less than three establishments in each. These industries are, nevertheless, of greater importance than some of the industries listed. Detailed statistics of the leading industries are given in table 26.

Production of wood and paper products led all groups in 1934 by a wide margin, the value of the output being \$20,597,216 or over 38 per cent of the total. The vegetable products group followed with an output of \$12,719,084, animal products with a value of production of \$5,230,738 came third and textiles and textile products came fourth with an output of \$4,559,857. The principal statistics of the various groups are given in table 28, while statistics for the industries comprised within each group are given in table 29

Table 24. - Summary of the Principal Statistics of the Province of New Brunswick, 1927 to 1934.
