 Chief, General Manufactures Branch: A. Cohen, B.Com.

SECTION I. - MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1935.

A report on the manufacturing industries of the Maritime Provinces for the year 1935 is presented herewith.

The report is divided into four sections. Section I deals with the three provinces as a group and the tables included therein show the principal statistics, statistics of the leading industries and statistics of the twenty leading cities and towns. Section 2 deals with the Province of Prince Edward Island, Section 3 with the Province of Nova Scotia and Section 4 with the Province of New Brunswick.

Manufacturing production in the Maritime Provinces continued to expand in 1935. Compared with the previous year, there was an increase of \$8,604,354 or 7.3 per cent in the gross value of production, 1,449 or 5 per cent in the number of persons employed, \$1,972,009 or 8.1 per cent in the amount of salaries and wages paid and \$4,037,118 or 7.3 per cent in the cost of materials used. The only decline was in capital investment which was \$7,914,612 or 3.2 per cent lower, this decrease being in part due to current charges for depreciation.

Of the three Maritime Provinces, Nova Scotia made the greatest advance in employment, salaries and wages paid and gross value of production, while Prince Edward Island reported the smallest advance. The table below gives the increases for each of the Maritime Provinces.

Increases in 1935 as Compared with 1934.

	Number of Employees	Salaries and Wages Paid	Gross Value of Products
	P.C.	P.C.	P.C.
CANADA .....	6.9	10.6	10.8
Prince Edward Island .....	1.4	3.0	1.6
Nova Scotia .....	6.8	13.2	10.3
New Brunswick .....	3.0	2.7	4.2

On referring to table 1, which gives the combined principal statistics of the Maritime Provinces, it will be noted that in 1935 there were 2,483 establishments reporting, with a capital investment in fixed and current assets of \$238,143,537. Employment was furnished to 31,105 persons who received \$26,341,175 in salaries and wages. The gross output was valued at \$126,809,368, and the materials used cost \$59,093,580, while the value added by manufacture amounted to \$60,000,901.

Pulp and paper, with an output valued at \$19,192,466, was again the leading industry from the standpoint of value of production. Central electric

MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1935.

stations ranked second with a value of production of \$8,608,859, followed by fish curing and packing with \$8,464,149, primary iron and steel \$7,987,949, sawmills \$6,859,862, etc. Other leading industries are: sugar refining, petroleum refining and cotton yarn and cloth. Figures for these industries, however, cannot be published as there are less than three establishments in each.

Principal statistics of the leading cities and towns are given in table 3. Saint John, New Brunswick, with an output valued at \$15,579,709 is the leading city. This was followed by Sydney, Nova Scotia, with an output of \$11,616,575, Halifax, Nova Scotia, with \$10,791,529, Moncton, New Brunswick with \$5,445,520, Dartmouth, Nova Scotia, with \$4,761,619, etc.

Table 1. -- Principal Statistics of the Maritime Provinces Compared for the Period 1927 to 1935.

Year	Estab- lish- ments	Capital Invested	Total Em- ployees	Total Salaries and Wages	Cost of Materials Used	Gross Value of Production
	No.	\$	No.	\$	\$	\$
1927 ....	2,353	230,323,871	39,066	29,297,894	87,695,340	151,618,590
1928 ....	2,238	256,591,785	39,220	31,233,849	86,666,294	156,807,510
1929 ....	2,331	257,118,229	41,616	34,418,960	94,824,889	170,365,507
1930 ....	2,493	277,724,651	41,546	33,314,237	80,950,269	153,526,149
1931 ....	2,611	262,703,487	<sup>x</sup> 30,452	28,397,692	61,269,473	130,025,897
1932 ....	2,519	246,961,070	26,276	22,548,783	45,646,118	101,390,415
1933 ....	2,441	249,162,629	26,319	21,176,859	47,466,357	100,806,101
1934 ....	2,506	246,058,149	29,656	24,369,166	55,056,462	118,205,014
1935 ....	2,483	238,143,537	31,105	26,341,175	59,093,580	126,809,368

<sup>x</sup>The large decrease in the number of employees since 1931 is not entirely due to the decline in manufacturing production. The decrease is in part due to the change in the method of computing the average annual employment of wage-earners. Between 1925 and 1930 the average was obtained by summing the averages of individual plants, based on the number of months in actual operation, and not by dividing by twelve the sum of the monthly employment figures. In 1931, however, a change was made to the old method, whereby the aggregate of the monthly figures is divided by twelve. This method gives the man year that each plant operates. The change in method, therefore, affects the average annual employment, as well as the average wages paid in seasonal industries, such as fruit and vegetable canning, fish canning, sawmills, etc.

MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1935.

MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1935.

SECTION 2. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF PRINCE EDWARD ISLAND, 1935.

Manufacturing establishments in Prince Edward Island numbered 261 in 1935. They had a capital investment of \$3,508,905 and employed 1,108 persons who were paid \$618,406 in salaries and wages. For their raw materials they spent the sum of \$1,894,409, while the gross value of merchandise produced amounted to \$3,356,006.

After four years of declining production, Prince Edward Island, in common with other sections of Canada, showed a slight improvement in 1934. Production in 1935 was maintained at about the same level as the previous year. There were increases of \$53,420 in the gross value of production, 15 in the number of employees, and \$18,190 in the amount of salaries and wages paid. These and other variations are shown in detail in tables 4 and 5.

Table 6 gives the principal statistics of the leading industries of the Province. The two most important are: fish curing and packing and butter and cheese. These two industries accounted for 33 per cent of the entire production. The manufacturing industries of Prince Edward Island are dependent for their raw materials on agriculture, fishing and forestry. The production of animal products accounted for 45 per cent of the total, vegetable products 17 per cent and wood and paper products 16 per cent.

Statistics of the various industries located in the Province are given in table 9.

Table 4. - Summary of the Principal Statistics of the Province of Prince Edward Island, 1927 to 1935.

Year	Estab-lish-ments	Capital Invested	Total Em-ployees	Total Salaries and Wages	Cost of Materials Used	Gross Value of Production

MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1935.SECTION 3. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF NOVA SCOTIA, 1935.

Establishments operating in Nova Scotia in 1935 numbered 1,350. The gross value of their products amounted to \$67,109,172, while the capital invested totalled \$118,999,064. Employment was furnished to 16,060 persons who received \$14,042,674 in salaries and wages. The cost of materials used reached a total of \$31,647,800, and the value added by manufacture \$30,995,130. The downward trend in manufacturing production was checked in 1933. During the following two years successive improvements in employment and gross value of production were reported. Compared with the previous year there was an increase in 1935 of \$6,264,591 in the gross value of production, \$3,150,677 in the cost of materials used, 1,019 in the number of persons employed, \$1,641,349 in the salaries and wages paid, and \$2,588,213 in the value added by manufacture. In spite of these increases, the capital invested was \$65,683 lower, due to current charges for depreciation.

The dominant industry in Nova Scotia in 1935 from the standpoint of gross value of products was that of primary iron and steel, with an output valued at \$7,987,949. This was followed by fish curing and packing with a value of production of \$5,368,117, central electric stations \$5,096,453, pulp and paper \$4,331,670, etc. The primary iron and steel industry, which was very severely affected by the decline in manufacturing activity, regained the premier position that it usually occupies. It rose from fourth place in 1933 to first place in 1934 and 1935, while central electric stations dropped from first to third place.

Manufacturing in Nova Scotia is to a considerable extent dominated by the steel and forest products industries although there is a large sugar and petroleum refinery. The production of iron and steel products constitutes the main industrial group, and accounted for \$12,891,132 or 19.2 per cent of the entire output of the Province. Non-metallic mineral products, which include petroleum refining, came second with a value of production of \$11,635,959, followed by wood and paper products \$11,431,162, vegetable products \$9,520,381, animal products \$8,043,795, textiles \$5,129,771 and central electric stations \$5,096,453. The iron and steel group, which dropped from first place in 1931 to fifth place in 1932, regained its premier position in 1935.

MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1935.

SECTION 4. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF NEW BRUNSWICK, 1935.

Manufacturing production in New Brunswick was maintained at a slightly higher level than the previous year. Compared with 1934 there was an increase of 4.2 per cent in the gross value of production, 3.1 per cent in the number of persons employed, 2.7 per cent in the amount of salaries and wages paid, and 4.2 per cent in the value added by manufacture. Reports were received from 872 establishments in 1935. These plants reported a gross value of production of \$56,344,190, a capital investment in fixed and current assets of \$115,635,568, and a payroll of 13,937 persons who received \$11,680,095 in salaries and wages. They also spent \$25,551,371 for materials and \$3,149,453 for fuel and electricity, leaving \$27,643,366 as the value added by manufacture.

In 1935 the pulp and paper industry again led all others in value of production with an output amounting to \$14,860,796 or 26.4 per cent of the total. Sawmills followed with an output valued at \$4,453,221. Central electric stations ranked third with a production of \$3,233,679, while coffee, tea and spices ranked fourth with an output of \$2,803,886. Sugar refining, railway rolling stock and cotton yarn and cloth were other leading industries in the Province. These, however, cannot be listed as there are less than three establishments in each. These industries are, nevertheless, of greater importance than some of the industries listed. Detailed statistics of the leading industries are given in table 26.

Forest products industries dominate the manufacturing field in New Brunswick. Production of wood and paper products led all groups in 1935 by a wide margin, the value of production being \$23,046,542, or over 40 per cent of the total. The vegetable products group followed with an output of \$12,486,101, animal products with a value of production of \$5,560,288 came third, iron and steel products came fourth with \$4,265,955, while textiles came fifth with \$4,189,930. The principal statistics of the various groups are given in table 28, while statistics of the industries included in each group are given in table 29.

Table 24. - Summary of the Principal Statistics of the Province of New Brunswick, 1927 to 1935.
