SECTION 1. - MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1938.

A report on the manufacturing industries of the Maritime Provinces for the year 1938 is presented herewith.

The report is divided into four sections. Section 1 deals with the three provinces as a group and the tables included therein show the principal statistics, statistics of the leading industries and statistics of the twenty leading cities and towns. Section 2 deals with the Province of Prince Edward Island, Section 3 with the Province of Nova Scotia and Section 4 with the Province of New Brunswick.

Manufacturing production in the Maritime Provinces declined during 1938. Compared with the previous year, there was a decrease of \$20,437,630 or 13.0 per cent in the gross value of production, 2,944 or 8.5 per cent in the number of persons employed, \$2,567,563 or 8.1 per cent in the amount of salaries and wages paid and \$6,661,791 or 10.6 per cent in the value added by manufacture.

Compared with the rest of Canada the Maritime Provinces as a unit suffered a greater recession in 1938 than the rest of Canada, as the following table shows:

Percentage Variation 1938 as Compared with 1937

I GI COMUNE VA	TTUOTOR TOOO ar	o compared wron T.	7010
	Number of Employees	Salaries and Wages Paid	Gross Value of Products
and with all all the barries with the time of all the start of the barries of the time of the barries of the ba	P.C.	P.C.	P.C.
CANADA	- 2.8	- 2.2	- 7.9
Prince Edward Island	- 2.0 - 7.1 -10.5	- 4.1 - 6.9 - 9.5	+ 0.1 -11.3 -15.7

On referring to Table 2, which gives the combined principal statistics of the Maritime Provinces, it will be noted that in 1938 there were 2,157 establishments reporting, with a capital investment in fixed and current assets of \$176,012,141. Employment was furnished to 31,818 persons who received \$29,330,632 in salaries and wages. The gross output was valued at \$137,002,224 while the cost of the materials used amounted to \$73,661,172 and the value added by manufacture totalled \$56,373,030.

MANUFACTURING INDUSTRIES OF THE MARITIME PROVINCES, 1938.

Pulp and paper with an output valued at \$20,230,857 was again the leading industry from the standpoint of value of production. The output of primary iron and steel ranked second with a value of \$11,183,267, followed by fish curing and packing with \$9,636,403, sawmills \$8,091,019, railway rolling stock \$6,299,569, butter and cheese \$5,828,353, coffee, tea and spices \$4,336,937, etc. Sugar and petroleum refining are also important in the Maritime Provinces. Statistics for these industries cannot, however, be published as there are less than three establishments in each.

Principal statistics of the leading cities and towns are given in Table 4. Saint John, New Brunswick with an output valued at \$17,643,984 was the leading manufacturing city in 1938. This was followed by Sydney, Nova Scotia with an output of \$15,253,976; Halifax, Nova Scotia, with \$12,451,634; Moncton, New Brunswick, \$6,524,700, Dartmouth, Nova Scotia, \$5,237,005; Liverpool, Nova Scotia, \$5,128,060, Trenton, Nova Scotia, \$5,062,133, etc.

x The large decrease in the number of employees since 1931 is not entirely due to the decline in manufacturing production. The decrease is in part due to the change in the method of computing the average annual employment of wage-earners. Between 1925 and 1930 the average was obtained by summing the averages of individual plants, based on the number of months in actual operation, and not by dividing by twelve the sum of the monthly employment figures. In 1931, however, a change was made to the old method, whereby the aggregate of the monthly figures is divided by twelve. This method gives the man year that each plant operates. The change in method, therefore, affects the average annual employment, as well as the average wages paid in seasonal industries, such as fruit and vegetable canning, fish canning, sawmills, etc.

SECTION 2. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF PRINCE EDWARD ISLAND, 1938.

Manufacturing establishments in Prince Edward Island numbered 229 in 1938. They had a capital investment of \$2,652,783 and employed 1,041 persons who were paid \$582,725 in salaries and wages. For their raw materials they spent the sum of \$2,379,543, while the gross value of merchandise produced amounted to \$3,570,667 and the value added by manufacture to \$1,131,902.

The upward climb in manufacturing production, begun in the summer of 1933 continued until 1937. In 1938 another minor recession occurred. In spite of a slight increase in the gross value of production, the number of employees and salaries and wages paid declined by 2.8 per cent and 2.2 per cent respectively.

Table 7 gives the principal statistics of the leading industries of the Province. The two most important are butter and cheese and fish curing and packing. These two industries accounted for 41 per cent of the entire production. The manufacturing industries of Prince Edward Island are dependent for their raw materials on agriculture, fishing and forestry. The production of animal products represented 56 per cent of the total, vegetable products 15 per cent, and wood and paper products 13 per cent.

Statistics of the various industries established in the province are given in Table 10.

SECTION 3. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF NOVA SCOTIA, 1938.

Establishments operating in Nova Scotia in 1938 numbered 1,102. The gross value of their products amounted to \$74,860,605, while the capital invested totalled \$91,393,782. Employment was furnished to 16,810 persons who received \$15,570,669 in salaries and wages. The cost of materials used reached a total of \$39,703,367 and the value added by manufacture \$31,375,251. The downward trend in manufacturing production was checked in 1933. During the following four years, successive improvements in employment and gross value of production were reported. A minor recession was, however, experienced in 1938. Compared with the previous year, there was a decrease of \$9,533,051 in the gross value of production, 1,278 in the number of persons employed, \$1,156,669 in the salaries and wages paid and \$1,771,545 in the valued added by manufacture.

The dominant industry in Nova Scotia in 1938, from the standpoint of gross value of products and number of employees, was that of primary iron and steel with the output valued at \$11,183,267. This was followed by fish curing and packing with a production of \$6,471,510, pulp and paper \$5,933,523, railway rolling stock \$3,246,035, butter and cheese \$3,013,284, etc. Other leading industries for which figures cannot be published are: sugar refineries, coke and gas, and petroleum products. The primary iron and steel industry, which was severely affected by the decline in manufacturing activity, regained the premier position that it usually occupies. It rose from fourth place in 1933 to first place in 1934, a position which it has occupied since.

Manufacturing in Nova Scotia is to a considerable extent dominated by the steel and forest products industries, although there is a large sugar and petroleum refinery. The production of iron and steel products constitutes the main industrial group and accounted for \$19,992,052 or 27 per cent of the entire output of the province. Wood and paper products came second with a value of production of \$14,016,933, followed by vegetable products \$12,353,941, non-metallic mineral products \$11,059,788, animal products \$10,159,499, textiles and textile products \$4,681,312, etc.

SECTION 4. - MANUFACTURING INDUSTRIES OF THE PROVINCE OF NEW BRUNSWICK, 1938.

Manufacturing production in New Brunswick in 1938 slowed down to a lower level than in the previous year. Compared with 1937, there was a decrease of 15.7 per cent in the gross value of production, 10.5 per cent in the number of persons employed and 9.5 per cent in the amount of salaries and wages paid. There was also a decrease of 17 per cent in the value added by manufacture.

Reports were received from 826 establishments in 1938. These plants reported a gross value of production of \$58,570,952, a capital investment in fixed and current assets of \$81,965,576 and a payroll of 13,967 persons who received \$13,177,238 in salaries and wages. They also spent \$31,578,262 for materials, and \$3,126,813 for fuel and electricity, leaving \$23,865,877 as the value added by manufacture.

In 1938 the pulp and paper industry again led all the others in value of production, with an output amounting to \$14,297,334 or 24 per cent of the total. Sawmills followed with an output valued at \$5,414,051. The production of coffee, tea and spices ranked third with a production of \$3,464,593, while fish curing and packing ranked fourth with an output of \$2,557,617. Sugar refining, railway rolling stock, and cotton yarn and cloth were other leading industries in the Province. These, however, cannot be listed as there are less than three establishments in each. These industries are, nevertheless, of greater importance than some of the industries listed. Detailed statistics of the leading industries are given in Table 25.

Forest products industries dominate the manufacturing field in New. Brunswick. Production of wood and paper products led all groups in 1938 by a wide margin, the value of production being \$24,236,399 or 42 per cent of the total. The vegetable products group followed with an output of \$15,013,109, animal products with a value of production of \$6,706,148 came third, iron and steel products came fourth with \$5,662,109, while textiles came fifth with \$3,156,168. The principal statistics of the various groups are given in Table 27, while statistics of the industries included in each group are included in Table 28.
