Chief, Manufacturing Statistics:	A. Cohen

MANUFACTURING INDUSTRIES OF THE PROVINCE OF BRITISH COLUMBIA, 1946

With the end of the war in 1945 manufacturing production in British Columbia, as well as throughout the rest of Canada, dropped sharply. The production of war equipment was immediately curtailed and in many instances entirely discontinued. Many factories began to convert from war to peacetime production, while the production of many lines of consumers goods surged upwards. Due to these changes, production in British Columbia during 1945 which was valued at \$628,903,124, represented a drop of \$26,941,565 or 4.1 per cent as compared with the previous year. There was also a drop of 8,088 or 8.4 per cent in the number of persons employed and \$18,219,985 or 10.2 per cent in the amount of salaries and wages paid. The decline continued throughout 1946 with the result that the number of persons employed declined by another 12,490 and salaries and wages paid by \$22,912,488. However, due to rising prices, the gross value of production was \$15,624,774 higher. Between 1944 and 1946 the volume of production, as measured by the number of persons employed, declined by 21.4 per cent. As was to be expected, the iron and its products group reported the greatest decline in the volume of production with a drop of 28,339 employees, followed by miscellaneous industries with a drop of 409, chemical products 156 and non-ferrous metal products 70. On the other hand, the volume of production of many lines of consumers goods advanced. The wood and paper group reported an increase in employment of 5,888, vegetable products 1,197, animal products 689, non-metallic mineral products 503 and textiles 119.

In 1946 reports were received from 2,731 establishments in British Columbia with a combined output valued at \$644,527,898. Employment was furnished to 75,484 persons who were paid \$137,506,645 in salaries and wages. The cost of materials used amounted to \$335,708,553, while the value added by manufacture totalled \$293,352,652.

The production of wood and paper products which in 1946 had a gross value of production of \$238,668,191, again headed the list of British Columbia manufacturing operations, having displaced the iron and its products group which occupied the premier position during the war years. The output of the vegetable products group which was valued at \$104,354,880 ranked second, followed by animal products with \$95,472,814, iron and its products \$77,852,777, non-ferrous metals \$54,956,585, chemicals \$31,366,250, non-metallic mineral products \$25,949,868, textiles \$10,367,036 and miscellaneous industries \$5,539,497.

British Columbia with a gross value of production of \$644,527,898 in 1946 was again the third most important manufacturing province in the Dominion. About 20 per cent of this amount, viz., \$130,433,625 was contributed by the sawmilling industry. Shipbuilding with a value of production of \$31,680,612 was in fourth place. This industry which occupied first place during the war years was an important factor in British Columbia's manufacturing operations. At the height of its productive effort in 1943 it employed 31,258 persons who were paid \$64,939,484 in salaries and wages, while the value of production reached the unprecedented figure of \$155,556,396. In spite of its decline, the shipbuilding industry in 1946 was still the second largest employer of labour and also paid out the second highest amount in salaries and wages. Fish curing and packing with a value of production of \$43,256,957 was in second place, followed by pulp and paper with \$42,030,596, shipbuilding \$31,680,612, slaughtering and meat packing \$28,087,775, fruit and vegetable preparations \$21,269,911, fertilizers \$20,625,774, etc.

MANUFACTURING INDUSTRIES OF THE PROVINCE OF BRITISH COLUMBIA, 1946

Vancouver, with a gross value of production of \$270,165,166, was the most important manufacturing centre and accounted for about 42 per cent of the total for the province. Other principal cities with the value of production are: New Westminster \$50,475,574, Victoria \$27,029,692, North Vancouver \$15,604,029, Fort Alberni \$9,753,944, Prince Rupert \$7,319,917, Kelowna \$4,561,393, etc. Trail is also an important manufacturing centre, figures, however, cannot be published.

Principal statistics of the industries located in Vancouver are given in Table 8, while the statistics of capital invested, power equipment and fuel consumption are given in Tables 9 to 11.

(1) In 1935 a change was made in the method of calculating the "net value" of production" in the non ferrous metal smelting and refining industry, therefore, the figures for this item, in that and following years, are less than they would have been by the old method.

(2) Gross value of production less cost of materials, fuel and electricity.
