DEPARTMENT OF TRADE AND COMMERCE
DOMINION BUREAU OF STATISTICS
GENERAL MANUFACTURES BRANCH
OTTAWA - CANADA

Dominion Statistician: S. A. Cudmore, M.A. (Oxon), F.S.S., F.R.S.C.
Chief, General Manufactures Branch: A. Cohen, B. Com.

MANUFACTURING INDUSTRIES OF THE PROVINCE OF ONTARIO, 1942.

Under the continued impetus of war production, the manufacturing industries of Ontario greatly accelerated their output of manufactured products in 1942. Compared with the previous year there were increases of 16 per cent in the number of persons employed, 27.3 per cent in the salaries and wages paid, and 22.3 per cent in the gross value of production. Of the increase in the gross value of production amounting to \$895,639,836, 49.2 per cent was contributed by the iron and its products group, 12.2 per cent by the chemicals and allied products group, 10.5 per cent by the non-ferrous metal industries, and the balance by the other groups in the order named: animal products, textiles, vegetable products, non-metallic mineral products, wood and paper products, and miscellaneous industries.

In 1942, reports were received from 10,711 establishments operating in Ontario. Their combined output was valued at \$5,817,396,404. Employment was furnished to 542,958 persons who were paid \$840,783,705 in salaries and wages. The cost of materials used was valued at \$2,056,746,983, while the value added by manufacture amounted to \$1,671,130,314. The investment in fixed and current assets totalled \$2,632,519,471.

Ontario is the most important manufacturing province in the Dominion. This favourable position is not of recent growth, but has been maintained over a long period of years. In spite of the rapid industrial development in recent years in other provinces, such as Quebec, British Columbia and Manitoba, Ontario is maintaining a manufacturing production equal to that of the remainder of the Dominion. Ontario also has the greatest diversification of manufacturing production of any province. Outstanding among the industries in which the Province of Ontario is pre-eminent is that of starch, agricultural implements and automobile manufacture which is carried on practically in this Province alone. Other important industries in which Ontario leads, with the percentage which the production of each bears to that of the Dominion total in 1942 are as follows: leather tanneries 88.1, rubber goods 81.3, electrical apparatus and supplies 69.9, primary iron and steel 68.5, iron castings 65.6, fruit and vegetable preparations 62.8, flour and feed mills, 60.1, hosiery and knitted goods 57.2, and furniture 56.3.

Table 4 compares the principal statistics of the industrial groups for the years 1941 and 1942. From the standpoint of the gross value of production, the iron and its products group again headed the list with an output valued at \$1,354,797,857. Other groups in order of importance were: vegetable products \$497,832,116, non-ferrous metal products \$491,228,003, wood and paper products \$357,843,723, animal products \$329,072,541, textiles and textile products \$306,507,099, etc.

Table 5 reviews the principal statistics of the forty leading industries of Ontario in 1942. In gross value of production, the automobile industry with an

MANUFACTURING INDUSTRIES OF THE PROVINCE OF ONTARIO, 1942.

output valued at \$323,968,911 again headed the list. Non-ferrous metal smelting and refining with a value of production of \$185,715,195 ranked second. Other leading industries in order of their importance are: automobile supplies \$182,783,322, primary iron and steel \$159,077,961, electrical apparatus and supplies \$146,126,610, slaughtering and meat packing \$132,769,040, miscellaneous iron and steel products \$113,123,675, etc. In salaries and wages paid the ranking of the industries is different. In this respect the automobile industry also heads the list, followed by miscellaneous iron and steel products, electrical apparatus and supplies, aircraft, automobile supplies, primary iron and steel, machinery, etc.

Table 6 reviews the principal statistics of the individual industries making up the various groups shown in Table 4.

Table 7 covers the principal statistics of all cities, towns and villages having three or more establishments. The city of Toronto with a production of \$886,256,494 accounted for 23.2 per cent of the entire output of the province. Windsor came second with a production of \$383,323,348, and Hamilton third with \$347,752,196. These three cities accounted for 42.4 per cent of the provincial production in 1942. Hamilton before the war ranked second while Windsor ranked third.

Statistics of capital investment, power equipment and fuel consumption are given in Tables 11 to 13.

1940	10,040	1,988,461,940	372,643	479,399,188	1,236,738,529	1,004,529,583	2,302,014,654
1941	10,250	2,336,788,884	468,230	660,722,278	1,683,912,216	1,360,055,756	3,121,756,568
1942	10,711	2,632,519,471	542,958	840,783,705	2,056,746,983	1,671,130,314	3,817,396,404

x The large decrease in the number of employees since 1931 is not entirely due to the decline in manufacturing production. The decrease is in part due to the change in method of computing the average annual employment of wage-earners.

Table 3. - Principal Statistics Compared, 1941 and 1942.
