A. Cohen, B. Com.

MANUFACTURING INDUSTRIES OF THE PROVINCE OF ONTARIO, 1943

Under the impetus of war production, the manufacturing industries of Ontario in 1943 continued to expand their operations. Compared with the previous year there were increases of 5.0 per cent in the number of persons employed, 13.7 per cent in the salaries and wages paid, and 10.6 per cent in the gross value of production. Of the increase in the gross value of production amounting to \$403,704,659, 31.1 per cent was contributed by the iron and its products group, 25.4 per cent by the chemicals and allied products, 14.4 per cent by the non-ferrous metals industries, and the balance by the other groups, in the order named: miscellaneous industries, vegetable products, animal products, wood and paper products, and non-metallic mineral products. The production of textiles and textile products was \$1,774,316 lower.

In 1943, reports were received from 10,587 establishments operating in Ontario. Their combined output was valued at \$4,221,101,063. Employment was furnished to 570,017 persons who were paid \$956,399,212 in salaries and wages. The cost of materials used was valued at \$2,278,871,511, while the value added by manufacture amounted to \$1,844,651,587. The investment in fixed and current assets totalled \$2,994,953,988.

Ontario is the most important manufacturing province in the Dominion. This favourable position is not of recent growth, but has been maintained over a long period of years. In spite of the rapid industrial development in recent years in other provinces, such as Quebec, British Columbia and Manitoba, Ontario is maintaining a manufacturing production equal to that of the remainder of the Dominion. In 1942 the percentage was 50.5. Due to the relatively greater expansion in war production in other provinces in 1943 the percentage dropped to 48.3.

Ontario has also the greatest diversification of manufacturing production of any province. Outstanding among the industries in which this Province is pre-eminent are those of automobiles, agricultural implements and starch manufacture which are carried on practically in this province alone. Other important industries in which Ontario leads, with the percentage which the production of each bears to that of the Dominion total in 1943 are as follows: leather tanneries 88, rubber goods 77, primary iron and steel 71, electrical apparatus and supplies 69, fruit and vegetable preparations 62, castings, iron 61, flour and feed mills 58, furniture 57, and hosiery and knitted goods 56.

Table 4 compares the principal statistics of the industrial groups for the years 1942 and 1943. From the standpoint of the gross value of production, the iron and its products group again headed the list with an output valued at \$1,480,540,197. Other groups in order of their importance were: non-ferrous metal products \$549,243,536, vegetable products \$534,430,942, wood and paper products \$372,248,223, animal products \$348,346,452, chemicals and allied products \$338,236,584, textiles and textile products \$304,732,783, etc.

MANUFACTURING INDUSTRIES OF THE PROVINCE OF ONTARIO, 1943.

Table 5 reviews the principal statistics of the forty leading industries of Ontario in 1943. In gross value of production the automobile industry with an output valued at \$351,765,839 again headed the list. Miscellaneous chemical products with a value of production of \$193,083,839 ranked second. Other leading industries in the order of their importance are: non-ferrous metal smelting and refining \$186,600,741, miscellaneous iron and steel products \$175,507,602, automobile supplies \$171,536,667, electrical apparatus and supplies \$169,654,250, primary iron and steel \$159,789,576, etc. In salaries and wages paid the ranking of the industries is different. In this respect the miscellaneous iron and steel products industry heads the list, followed by automobiles, aircraft, electrical apparatus and supplies, etc.

Table 6 reviews the principal statistics of the individual industries making up the various groups shown in Table 4.

Table 7 covers the principal statistics of all cities, towns and villages having three or more establishments. The city of Toronto with a production of \$961,923,997 accounted for 22.8 per cent of the entire output of the province. Windsor came second with a production of \$417,745,229, and Hamilton third with \$362,743,019. These three cities accounted for 41.3 per cent of the provincial production in 1943. Hamilton before the war ranked second while Windsor ranked third.

Statistics of capital investment, power equipment and fuel consumption are given in Tables 11 to 13.

x The large decrease in the number of employees since 1931 is not entirely due to the decline in manufacturing production. The decrease is in part due to the change in method of computing the average annual employment of wage-earners.
