STATISTICS ON HIDES, SKINS AND LEATHER IN CANADA

January, 1947

Statistics on stocks of raw hides and skins held by Tanners, Packers and Dealers are given below for the main classes of hides and skins. Comparisons with the previous month and the same month a year ago are shown. Foreign hides or skins in transit are shown separately.

Wettings of hides and skins represents the number put into the first stage of tanning process and is a good item of comparison, reflecting the trend in the Tanning Industry. A substantial increase is noted from the previous month and a slight gain is shown over January 1946.

Finished leathers show production, deliveries and stock on hand at the end of the month for the main classifications of leather. Some leathers are not shown to withhold disclosure of individual tanners' figures while others are not included in this report because of their miscellaneous nature in both type and unit in which they were reported. Because of a change in the design of the schedule for 1947, comparable figures are not available for all classes for the 1946 periods shown.
