MONTHLY REPORT OF THE BOOT AND SHOE PRODUCTION OF CANADA, JULY, 1926

The report of the production of boots and shoes in Canada during the month of July is based on the returns of 164 establishments out of a total of 169 establishments in operation in that month. Three establishments in Quebec and 1 each in Ontario and Nova Scotia failed to make return. The production of footwear was slightly in excess of that of the preceding month, the total for all classes for July being 1,571,101 pairs in comparison with 1,550,274 pairs in June. The number of pairs of boots and shoes with leather or fabric uppers manufactured during July was 1,485,225, an increase over the preceding month of 26,153. The quantity of felt footwear of all kinds and cloth slippers for house wear totalled 85,876 pairs, a decrease of 5,326 pairs from the production shown for June. According to the different classifications, the production of men's boots and shoes increased by 10 per cent; of boys' and youths' by 5 per cent; and of women's by 5 per cent. The production of misses' and children's and of babies' and infants' show decreases of 18 and 9 per cent respectively. Detailed statistics of production for the month of July are given in Table 1.

Statistics of the cumulative production of footwear for the 7 months ending July 31, are given in Table 2. A total production of 10,500,325 pairs is shown for the 7 months, or an average of 1,500,046 pairs per month. If the production for each of the remaining months of 1926 equals this average the total production for the year will exceed the production of the year 1924, the latest year for which complete statistics are available. The production in 1924 comprised 17,050,754[#] pairs of footwear.

Exclusive of larrigans and shoepecks and Indian slippers and moccasins.
