REPORT ON THE PRODUCTION OF BOOTS AND SHOES
IN CANADA, NOVEMBER, 1929.

Number of Factories.— Statistics of the production of leather footwear in November, 1929, are based on the returns of 180 factories out of a total of 185 factories in operation during the month. The factories in operation are located by provinces as follows: Nova Scotia, 1; New Brunswick, 4; Quebec, 109; Ontario, 63; Manitoba, 2; and British Columbia, 6. Three factories in Quebec, and 1 factory each in Ontario and British Columbia failed to make return.

Production.— The output of the factories for the month of November shows a decided falling-off from the preceding month and is the second lowest recorded so far for any month of the year 1929. The total output for November amounted to 1,473,741 pairs, a decrease from the preceding month of 462,631 pairs, and a decrease from the month of November, 1928, of 81,726 pairs. Footwear made in sizes for women had an output of 597,512 pairs, a decrease from the preceding month of 278,060 pairs, or 32 per cent, and footwear in sizes for men, 430,125 pairs, a decrease of 150,908 pairs, or 26 per cent. Felt footwear is the only item of production that shows an increase over the month of October, and it shows an increase also over the production of November, 1928.

Cumulative Production.— The total production of footwear for the 11 months ended November 30, 1929, was 18,230,074 pairs, or an average per month of 1,657,279 pairs, compared with a total of 18,744,737 pairs and an average per month of 1,704,072 pairs for the corresponding period of 1928.

Imports and Exports.— The imports of footwear of all kinds (except rubber) in November, 1929, also show considerable decrease from the preceding month and from the month of November, 1928. The total quantity imported was 152,359 pairs, compared with 217,143 pairs in October and 173,829 pairs in November, 1928. According to quantity the United Kingdom is the principal country of origin for Canada's imports of footwear (except rubber), but according to value, the United States is the chief source. This is due to the fact that over half of the footwear imported from the United Kingdom is classified as footwear with felt uppers, and this is lower in value than the footwear with leather uppers which is the chief part of the imports from the United States. The quantity of Canadian made leather footwear exported in November amounted to only 5,063 pairs, compared with 10,101 pairs in October and 15,774 pairs in November, 1928. Over half of the quantity exported in November, 1929, went to the United States.
