REPORT ON THE PRODUCTION OF LEATHER FOOTWEAR IN CANADA,

## November, 1930

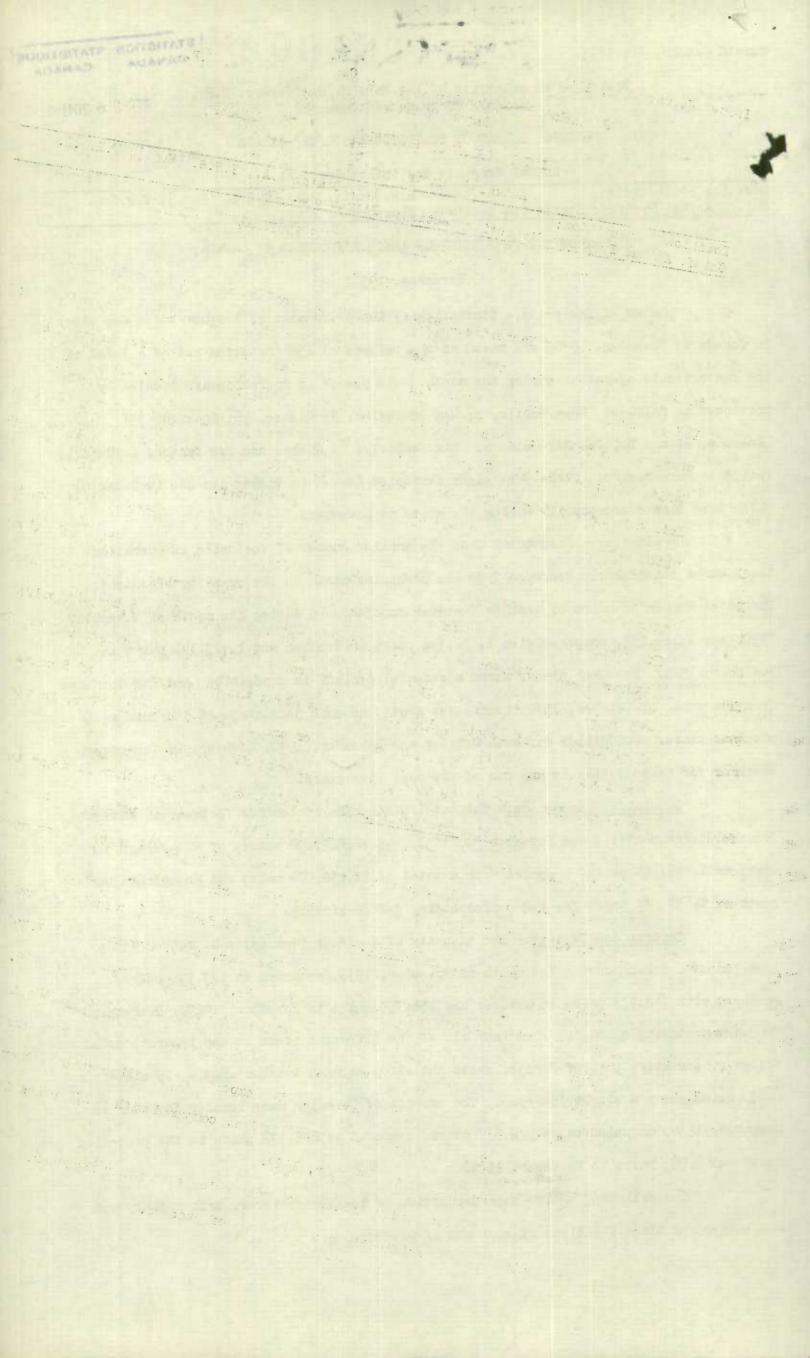

Number of Factories.- Statistics of the production of leather boots and shoes in Canada in November, 1930, are based on the returns of 158 factories out of a total of 165 factories in operation during the month. The plants in operation are located by provinces as follows: Nova Scotia, 2; New Brunswick, 4; Quebec, 96; Ontario, 55; Manitoba, 2; and British Columbia, 6. Six factories in Quebec and one factory in Ontario failed to make return. There were eight factories (seven in Quebec and one in Ontario) which were closed temporarily during the month of November.

<u>Production</u>.- Consequent upon the smaller number of factories in operation there was a considerable decrease from the preceding month in the quantity of output. The total number of pairs of leather footwear manufactured during the month of November, 1930, was 1,124,793, compared with 1,552,392 pairs in October and 1,473,741 pairs in November, 1929. November always shows a seasonal decline in production, and the decrease from the month of October, 1930, represents about the same percentage of decrease as in previous years. Production for both October and November, 1930, however, is the lowest recorded for these months in any one of the past five years.

<u>Cumulative Production.</u> The total production of leather footwear in Canada for the eleven months ended November 30, 10,0, mas 16,023,190 pairs, or an average per month of 1,456,654 pairs, compared with a total of 18,230,074 pairs and an average per month of 1,657,279 pairs for the corresponding period of 1929.

Imports and Exports.- The quantity of footwear (exclusive of rubber goods) imported into Canada during the month of November, 1930, amounted to 123,396 pairs, compared with 146,977 pairs in October and 152,359 pairs in November, 1929. Decreases from the preceding month are shown for all of the different items in the importation of footwear, excepting that of "boots, shoes and slippers with leather uppers, in sizes for men", which shows a slight increase. The exports of Canadian made leather footwear in November, 1930, amounted to only 2,677 pairs, compared with 6,172 pairs in the preceding month and 5,063 pairs in November, 1929.

The following tables show production of leather footwear, both monthly and cumulative, by classifications of size and of process.

1. Production of Boots and Shoes in Canada, November, 1930.
