DOMINION BUREAU OF STATISTICS

OTTAWA - CANADA

Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce

Vol. 10, No. 1 January 1956

Price: \$2.00 per year.

CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

The statistics made available monthly in this report are considered to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synthetic and reclaim whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in January 1956 as compared with December 1955 shows a decrease in natural of 1,003,786 pounds, an increase in synthetic of 133,556 pounds and a decrease in reclaim of 16,884 pounds, the total being a decrease of 887,114 pounds. Considering the situation in terms of end products use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, decreased by 406,361 pounds, consumption in rubber footwear decreased by 140,551 pounds, in wire and cable increased by 36,108 pounds and in other products decreased by 376,310 pounds, making the total decrease of 887,114 pounds mentioned above.

Prepared in Textiles and Miscellaneous Products Section, Industry and Merchandising Division.

6503-502-16

Section A. Summary Data

This section includes summary data on natural, synthetic and reclaim rubber showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classification, wherever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1 - Summary Statement of all Rubber Stocks, Domestic Production and Domestic Consumption Showing Monthly Averages, 1939-1955 and Actual Monthly Totals, January 1956.

Section B. Natural Rubber

The January 1956 consumption of Natural Rubber, showing crude rubber and natural latex separately and arranged according to end products classification, is shown in Table 5. Summary data, by months January 1955 to January 1956 are shown in Table 6. For summary data on Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Table 5 - Consumption of Natural Rubber, by Types and by End Products Classification, January 1956

End	Products	Natural Rubber (excluding Latex)	Latex	Total Natural
		pounds	pounds	pounds
1.	Tires, tubes and tire

Section D. Reclaim Rubber

Table 10 gives the consumption of Reclaim Rubber in total only, by end products classification January 1955 to January 1956. Of the 2,999,039 pounds consumed in January 1956, 32,391 pounds were consumed in the form of dispersions and 2,966,648 pounds as other than dispersions. For summary data on Reclaim and other rubber stocks, domestic production and domestic consumption expressed in long tons, see Table 1.
