## CONSUMPIION, PRODUCTION AND INVENIORIES OF RUBBER

$$
\text { JUTY, } 1948
$$

Commencing with March 1947, the Dominion Bureau of Statistics undertook the continuance and publication, in a modified form, of the monthly rubber statistics developed during the years of control. Historical tables wore prepared, largely from the Rubber Control records, and are included in this report in order that valuable material may thus be presented in a condensed form, and also that relationships may be established for the evaluation of current data. These statistics show clearly, during the later war years, the impact on rubber consumers of the loss of matural rubber supplies, and the consequent growth of the synthetic rubber industry. They also evidence, in the post-war period, the gradually increasing availability of natural rubber, and, since they show consumption by broad end products divisions, changes in the percentages of natural and synthetic consumed in each division may be said to contain inferences as to the suitabilities of each type.

Early publications in this series sontained a Rubber Balance Statement, in which an attempt was made to account for all rubber entering or produced in Canada. However, assumptions which were valid during the period of control due to the fact that the movements of the comnodity were under direction, are no longer sufficiently reliable to permit the publication of import - export data based on receipts and sales of manufacturers, or to assume that the imports of some specific synthetic by a particular manufacturer represent the total new supply of this synthetic. Nor can the inventories of manufacturers, whether producing or consuming, be considered a total since the re-establishment of normal trade channels indicates dealer inventories outside the scope of an industry survey. Also the quantity of foreign or domestic rubber in transit at the close of any period is not known.

Therefore, the statistics now available monthly, are considered only to represent clearly and accurately (a) the new domestic production of synthetic and reclaim, and the inventories of firms reporting this production, and (b) the total consumption of rubber, whether foreign or domestic, together with inventories, receipts and sales of rubber by consuming manufacturers in all industries. The addition of the two inventories give the total stocks held by industry.

The historical tables have now been revised to omit import-export columns, and the current rubber balance statement has been broken down into (a) and (b) as outlined in the preceding paragraphs.

## CONSUMPRION, PRODUCTION AND INVENTORTES OF RUBBER

However, despite the fact that the total available supply is not known and that it is impossible to relate shipments and receipts, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being co-related with new production and export - import data (as compiled by External Trade Branch, D.B.S.) over a period of months.

The sections showing consumption of rubber, by types, and by end products have not been changed, since they do correctly represent total consumption in each case.

## Section $A$. Canadian Rubber Balance Statement

This section includes sumary data on natural, synthetic and reclaim rubber, showing stocks, domestic production and domestic consumption. Table 1 gives yearly averages, 1939 - 1947, and actual months, January, 1946 to July, 1948. Table 2 gives details for June and July, 1948.

For detailed data for consumption by specific types and by end products classifications, wherever possible, see Section B, Natural Rubber, Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1. - Summary statement of all Rubber stocks, Domestic Production, Domestic Consumption showing Monthly Averages, 1939 - 1947, and Actual Monthly rotala, January 1946 to July, 1948.

Weights are given in Long Tons (2,240 pounds)

| Period | Stocks, End of Period | Domestic <br> Production | Consumption |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

## CONSUMPIION, PRODUCTION AND INVENTORIES OF RUBBER

Table 1. - Summary Statement of all Rubber Stocks, Domestic Production, Domestic Consumption showing Monthly Averages, 1939-1947, and Actual Monthly Totals, January, 1946 to July, 1948. - Concluded.

Weights are given in Long Tons (2,240 pounds)

Note: Poundage of Guayule Rubber included in Natural Rubber totals in on a deresinated basis. All other wild rubber is calculated on a Washed and Dried basis. Also it should be particularly noted that all stocks are taken at the raw level, or the level at which rubber may be used as a material. They would include compound latex purchased for consumption by a manufacturer, but would not include the semi-processed, or finished goods, held in inventory by the manufacturer.

| TOIAL | 8,426,740 | 3,965,889 | 2,697,679 | 15,090,308 |

Table $3(b)$. - Consumption of All Rubber, by Main Types and by End Product Classification, July, 1948.

| End Froducts | Natural | Synthetic | Reclaim | Total All Rubber |
| :---: | :---: | :---: | :---: | :---: |
|  | Pounds | Younds | Founds | Pounds |
| 1. 'ires and tubes, including tire repair materials ............. | 5,125,902 | 2,298,852 | 1,040,451 | $8,465,205$ |
| 2. \#ire and cable | 46,192 | 137,012 | 21,905 | 205,109 |
| 3. Footwear (including heels, soles, etc.) ............ | 614,786 | 217,452 | 208,887 | 1,041,125 |
| 4. Other products | 728,460 | 486,227 | 858,945 | 2,073,632 |
| TOTAL .......................... | $6,515,340$ | 3,139,543 | 2,130,188 | 11,785,071 |

Tire repair materials, now included with tires and tubes, and mechanical goods, now included with other products, were shown separately previous to January, 1948. The present grouping is by arrangement with the Kubber Association of Canada.

# - 6 - <br> CONSUMPIION, FRODUCIION AND INVENTORIES OF RUBBER 

Sectica B. Natural Imbber

The Juns ant July, 2948 sonsurpt:on of fatural Rubber showine erude rubver and natural latex separately, and arranged according to end products classifications, is shown in Tables $6(a)$ and $6(b)$.

Summary Data, by months, January, 1947 to July, 1948 are shown in Table 5, and 1939 - 1947 yearly totals, monthly averages and percentages of natural rubber to all rubber consumed, are given in Table 4. Crude rubber and natural latex do not appear separately in summary tables, but are combined under the heading "Natural".

For summary data on jynthetic, Natural and other rubber stocks, domestic production, domestic consumption, expressed in long tons, see Table l. However, when comparing monthly consumption of natural rubber, as given in Table l, with consumption as shown in detalled tables by end product classification, it should be noted that in Table 1, Guayule Rubber is reduced to a deresinated busis, whereas in the detailed tables it is included at the weight reported by the firms. Comencing with March 1 , 1947, poundage Guayule included in all tables is on a deresinated basis, and totals should, therefore agree.

## CONSUMPIION, PRODUCTION AND INVENTORIE3 OF RUBBER

Table $6(a)$. Consumption of Natural Rubber, by Types and by End Product Classification, June, 1948.

| End Products | Natural Kubber (excluding latex) | Latex | Total Natural |
| :---: | :---: | :---: | :---: |
|  | Pounds | Founds | Younds |
| 1. Tires and tubes, including tire repair materials | $6,166,977$ | 22,203 | 6,189,180 |
| 2, Nire and cable.............. | 91,445 | - | 91, 445 |
| 3. Footwear (including heels, soles, etc.) ................. | $1,055,460$ | 1,198 | 1,056,658 |
| 4. Other Products ...... | 934,935 | 154,522 | $1,089,457$ |
| LOLAL | 8,248,817 | 177,923 | 8,426,740 |

Table 6(b) - Consumption of Natural Rubber, by Types and by End Product Classification, July, 1948.

| End Products | Natural Kubber (excluding latex) | Latex | rotal Natural |
| :---: | :---: | :---: | :---: |
|  | Pounds | Pounds | Pounds |
| 1. Tires and tubes, including tire repair materials ............. | 5,105,596 | 20,306 | 5,125,902 |
| 2, wirc and cable | 46,192 | - | 46,192 |
| 3. Footwesr (including heels, soles, etc.) .................. | 613,792 | 994 | 614,786 |
| 4. Other products | 640,692 | 87,768 | 728,460 |
| TOTAL ................ | 6,406,272 | 109,068 | 6,515,340 |

Hire repair materials, now included with tires and tubes, and mechanicul goods, now included with other products, were shown separately previous to January 1948. The present grouping is by arrangement with the Rubber Association of Canaaa.

## Section C. Jynthetic Rubber

The Junc and July, 1948 consumption of Jynthetic Fubber is shown by type, and by end products classification, in 'rable 10.

Summary data, by months are shown in Tables 8 and 9, while 1943 - 1947 yearly totals and monthly averages are given in Table 7.

For sunmary data on synthetic and other rubber stocks, domestic production, domestic consumption, expressed in long tons, see Table 1.

Table 7. - Consumption of Synthetic Rubber in Total, showing Monthly Averages, 1943 - 1947 and Percentages of synthetic Kubber to All Rubber Consumed.

| Year | Total |  | Monthly Average |  | Percentage |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1943 | 8,252,160 | pounds | 687,680 | pounds | 7.9 |
| 1944 | 55,399,680 | 1 | 4,616,640 | I | 52.7 |
| 1945 | 80,505,600 | 1 | 6,708,800 | 1 | 62.9 |
| 1946 | 66,357,973 | " | 5,529,831 | + | 55.6 |
| 1947 | 65, 367,660 | " | 5,447,305 | " | 37.5 |

fire repair materials, now included with tires and tubes, and mechanical goods, now included with other products, were shown separately previous to January 1948. The present grouping is by arrangement with The Rubber Association of Canada.

## CONSUHIPIION PROUUCTION AND INV SNIORIEO OF FUBBER

## Section D. Reclaim Rubber

Tables 11 and 12 give the consumption of Reclaim in total, for the years 1969 1947 with monthly averages for each year and broken down into Dispersions and other: than Dispersions, by actual months, Jan. 1947 to July, 1948. Consumption of Reclain, in total only, by end product classification is given in l'ables 3(a) and 3(b) for June and July 1948.

For summary data on Reclaim, Jynthetic, and other rubber stocks, domestic production, domestic consumption, expressec in long tons, see Table 1.

Table 11. - Consumption of Reclaim Rubber in Total, and by Monthly Averages, 1939 1947, showing also percentages of Reclaim to all rubber consumed.

| Year |  | rotal <br> 1939$\ldots \ldots \ldots$ |
| :--- | :--- | ---: |
| 1940 | $\ldots \ldots \ldots$ | $16,826,880$ |
