## DOMINION BUREAU OF STATISTICS <br> Industry and Merchandising Division

OTTAWA

CONSUMPTTON, PRODUCTION AND INVENTGRIES OF RUBELR
DECEMBER. 1949

The statistica made available monthly in this report are considered only to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting this production, and (b) the total consumption of all types of rubber, natural, synthetic and reclaim, whether foreign or damestic, by broad end product use groupings, together with inventardes, reced pts and sales of rubber by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not.accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in December, 1949 as compared with November, 1949 shows an increase in natural of 419,450 pounds, an increase in synthetic of 82,695 pounds, and an inc rease in reclaim of 316,767 pounds, the total increase being 818,912 pounds. Considering the situation in terms of end product use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, increased by 703,210 pounds, consumption in rubber footwear decreased by 202,849 pounds, in wire and cable decreased by 2,308 pounds, and in other products increased by 320,859 pounds, making the total increase of 818,912 pounds mentioned above.

## - 2 . <br> CONSUMPPTION, PRODUCTION AND INVENTORIES OF RUBBER <br> Section A. Summary Data.

This section includes summary data on natural, synthetic and reclaim rubber, showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classifications, where. ever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

## $-5$. <br> CONSUMPTION. PRODUTTION AND LWWNTORIES OF RUBBER <br> Section B, Natural Rubber

The November 1949 and December 1949 consumption of Natural Rubber, ahowing crude rubber and natural latex separately, and arranged according to end products classifications is shown in Tables 6 (a) and 6 (b).

Summary Data, by months, December 1948. to December 1949, are shown in Table 5, and 1939-1949 yearly totals, monthly averages and percentages of natural rubber to all rubber consumed, are given in Table 4. Crude rubber and natural latex do not appear separately in sumpary tables, but are combined under the heading "Natural". For sumary data on Synthetic, Natural and other rubber atocks, domestic production and domestic consumption, expressed in long tons, see Table l.
