## CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

AUGUST, 1949

The statistics made available monthly in this report are considered only to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting this production, and (b) the total consumption of all types of rubber, natural, synthetic and reclaim, whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales of rubber by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in August, 1949 as compared with July, 1949 shows a decrease in natural of 45,494 pounds, an increase in synthetic of 57,898 pounds, and a decrease in reclaim of 63,570 pounds, the total decrease being 51,166 pounds. Considering the situation in terms of end product use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, decreased by 1,026,549 pounds, consumption in rubber footwear increased by 519,532 pounds, in wire and cable increased by 197,587 pounds, and in other products increased by 258,264 pounds, making the total decrease of 51,166 pounds mentioned above.

CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

Section A, Summary Data.

This section includes summary data on natural, synthetic and re-claim rubber, showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classifications, wherever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Section B. Natural Rubber

The July 1949 and August 1949 consumption of Natural Rubber, showing crude rubber and natural latex separately, and arranged according to end products classifications, is shown in Tables 6 (a) and 6 (b).

Summary Data, by months, August 1948 to August 1949, are shown in Table 5, and 1939 - 1948 yearly totals, monthly averages and percentages of natural rubber to all rubber consumed, are given in Table 4. Crude rubber and natural latex do not appear separately in summary tables, but are combined under the heading "Natural". For summary data on Synthetic, Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

Section D. Reclaim Rubber

Tables 11 and 12 give the consumption of Reclaim in total for the years 1939-1948 with monthly averages for each year and broken down into Dispersions and Other than Dispersions, by actual months, January 1948 to August 1949. Consumption of Reclaim, in total only, by end product classification is given in Tables 3 (a) and 3 (b) for July 1949 and August 1949. For summary data on Reclaim, Synthetic, and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.
