

## DOMINION BUREAU OF STATISTICS

Industry and Merchandising Division
OTTAWA

Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce

Vol. 4. No. 7

CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

July, 1950.

The statistics made available monthly in this report are considered only to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synthetic and reclaim, whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales of rubber by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in July, 1950 as compared with June, 1950, show a decrease in natural of 930,284 pounds, a decrease in synthetic of 299,020 pounds, and a decrease in reclaim of 384,199 pounds, the total decrease being $1,613,503$ pounds. Considering the situation in terms of end product use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, decreased by 492,825 pounds, consumplion in rubber footwear decreased by 409,223 pounds, in wire and cable decreased by 184,664 pounds, and in other products decreased by 526,791 pounds, making the total decrease of $1,613,503$ pounds mentioned above.

# - 2 - <br> CONSUMPTION, PRCDUCTION AND IVVENTORIES OF RUBBER 

## Section A, Sumnary Data.

This section includes summary data on natural. synthetic and reclaim rubber showing stocks, domestic production and domestis consumption. For more detailed data of consumptior by specific types and by end products classifications, wherever possitle, see Section E, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1. - Summary Statement of all Rubber Stocks, Domestic Production, Domestic Consumption showing Monthly Averages, 1939 - 1949, and Actucl Monthly totals, January 1949 o July 1950 。

Weights are given in Long Tons ( $\ddot{c}_{, 2} 240$ pounds)

## CONSUMPTION, FRODUCTICN AND INVENTORIES OF RUBBER

 Section B, Natural RubberThe June 1950 and July 1950 consumption of Natural nubber, showing crude rubber and natural latex separately, and arranged according to end products classificaticns is shown in Tatles 6 (a) and 6 (b).

Surmary Data, by months July 1949 to July 1950, are show in Table 5, and 1939 1949 yearly totals, monthly averages and percentages of natural rubber to all rubber consumed, are given in Table 4. Crude rubber and natural latex do not appear separately in sumary tables, but are combined under the headine "Natural". For summary data on Symthetic, Natural and other rubber stocks, comstic production and domestic consumption, expressed in long tors, see Table l.

Table 4. - Consumption of Natural Kubber in Total, showing Monthly Averages 1939-1949 and percentages of Netural to All Rubber Consumed.

| Year | Total | Monthly Average | Percentage to all liubber |

## CONSUMPTION, PRODUCTION AND INVGNTORIES OF RUBBER

## Section D, Reclaim Rubber

Table 11 gives the consumption of Reclaim in total for the years 1939-1949 with monthly averages for each year and showing percentage of reclaim to all rubber consumed. Consumption of Reclaim, in total only, by end product classification is given in Table 12 by months, July 1949 to July 1950. Of the $2,380,586$ pounds consumed in July 1950, 83,384 poumd s were consumed in the form of dispersi ans and 2,297, 202 pounds as other than dispersions. For sumary data on Reclaim, Synthetic, and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Table 11. - Consumption of Reclaim Rubber in Total, and by Monthly Averages, 1939-1949, showine also percentages of Reclaim to All Rubber Consumed.

Table 12. - Corsumption of Kecleim Kubber in L'otal, by End Products, and by Months, July 1849 to July 1950, showing also percentage of Reclaim to All Rubber Consumed.

| Year and Month | Reclaim |  |  | Used in the | karuf"acture of - |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
