OCT 211850

DOMINION BUREAU OF STATISTICS
Industry and Merchandising Division
OTTAWA

Vol. 4. No. 8.

CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER
AUGUST. 1950

The statistics made available monthly in this report are considered only to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synthetic and reclaim, whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales of rubber by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in August, 1950 as compared with July, 1950, shows a decrease in natural of $1,224,451$ pounds, an increase in synthetic. of 591,551 pounds, and a decrease in reclaim of 196,059 pounds, the total decrease being 828,959 pounds. Considering the situation in terms of end product use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, decreased by $2,066,249$ pounds, consumption in rubber footwear incressed by 415,951 pounds, in wire and cable increased by 215,586 pounds, and in other products increased by 605,753 pounds, making the total decrease of 828,959 pounds mentioned above.

## CONSUMFTION, PRODUCTION AND INVENTORIES OF RUBBER

## Section A, Summary Lata.

This section includes summary data on natural, synthetic and reclaim rubber showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classifications, wherever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1. - Summary Statement of all Rubber Stocks, Domestic Prociuction, Domestic Consumption showing Monthly Averages, 1939-1949, and Actua. Monthly totals, January 1949 - August 1950.

Weights are given in Long Tons (2,240 pounds)

# - 5 - <br> CONSUMPTIGN, PROLUCTION AND INVENTORIES OF RUBBER 

Section B, Natural Rubber
The July 1950 and August 1950 consumption of Natural Rubber, showing crude rubber and natural latex separately, and arranged according to end products classifications is shown in Tables 6 (a) and 6 (b)。

Summary Data, by months August 194 : to August 1950, are shown in Table 5, and 1939 - 1949 yearly totals, monthly averages and percentages of natural rubber to all rubber consumed, are given in Table 4。 Crude rubber and natural latex do not appear separately in sumnary tables, but are combined under the heading "Natural". For summary data on Synthetic, Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Table 4. - Consumption of Natural Rubber in Total, showing Monthly Averages 1939-1949 and percentages of Natural to.All Rubber Consumed,

| Year | Total | Monthly <br> Average | Percentage to all Rubber |

## CONGUMRTION, PRODUCTION AND INVENTORIES OF RUBBER

## Section C, Synthetic Rubber

The July 1950 and August 1950 consumption of Synthetic Rubber is shown by types and by end products classification, in Table 10 。

Summary data, by months, are shown in Tables 8 and 9, while 1943-1949 yearly totals and monthly averages are given in Table 7 . For sumnary data on Synthetic and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1 .

Table 7. - Consumption of Synthetic Rubber in Total, showing Monthly Averages, 1943-1949, and Percentages of Synthetic Rubber to All Rubber Consumed.

## Section D, Reclaim Rubber

Table 11 gives the consumption of Reclaim in total for the years 1939-1949 with monthly averages for each year and showing percentage of reclaim to all rubber consumed. Consumption of Reclaim, in total only, by end product classification is given in Table 12 by months, August 1949 to August 1950. Of the 2,184,527 pounds consumed in August 1950, 112,883 pounds were consumed in the form of dispersions and 2,071,644 pounds as other than dispersions. For sumnary data on Reclaim, Synthetic, and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Table 1l. - Consumption of Reclaim Rubber in Total, and by Monthly Averages, 1939-1949, showing al so percentages of Reclaim to All Rubter Consumed

| Year | Total | Monthly Average | Percentage to All Rubber |
| :---: | :---: | :---: | :---: |
|  | Pounds | Pounds |  |
| 1939 | 16,826,880 | 1,402,240 | 19.2 |
| 1940 | 18, 25,6,640 | 1,571,720: | 18.6 |
| 1941 | 21,208,320 | 1,767,360 | 15.1 |
