CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

November, 1952

The statistics made available monthly in this report are considered to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synthetic and reclaim, whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales of rubber by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada. and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in November, 1952 as compared with October, 1952 shows an increase in natural of 302,085 pounds, an increase in synthetic of 555,493 pounds, and a decrease in reclaim of 93,045 pounds, the total increase being 764,533 pounds. Considering the situation in terms of end products use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, increased by 600,241 pounds, consumption in rubber footwear decreased by 178,155 pounds, in wire and cable increased by 114,536 pounds and in other products increased by 227,911 pounds, making the total increase of 764,533 pounds mentioned above.

Prepared in General Manufactures Section

Section A. Summary Data

This section includes summary data on natural, synthetic and reclaim rubber showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classification, where-ever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1. - Summary Statement of all Rubber Stocks, Domestic Production and Domestic Consumption Showing Monthly Averages, 1939-1951, and Actual Monthly Totals, November 1951 to November 1952.

Weights are given in long Tons (2,240 pounds)

Section B. Natural Rubber

The November 1952 consumption of Natural Rubber, showing crude rubber and natural latex separately and arranged according to end products classification, is shown in Table 5. Summary data, by months, November 1951 to November 1952 are shown in Table 6. For summary data on Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Section D. Reclaim Rubber

Table 10 gives the consumption of Reclaim in total only, by end product classification, November 1951 to November 1952. Of the 2,731,519 pounds consumed in November 1952, 103,487 pounds were consumed in the form of dispersions and 2,628,032 as other than dispersions. For summary data on Reclaim and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Table 10 - Consumption of Reclaim Rubber in Total by End Products, November 1951 to November 1952, Showing also Percentages of Reclaim to all Rubber Consumed.

	Rec.	laim	Use	d in the	Manufactur	e of
	Total	Percentage of all Rubber	Tires and Tubes	Wire and Cable	Foot- wear	Other Pro- ducts
	000's pounds	Per Cent	000's pounds	000's pounds	000's pounds	000 s
