# Published by Authority of the Rt. Hon. C. D. Howe, Minister of Trade and Commerce 

$$
\text { JULY, } 1952
$$

The statistics made available monthly in this report are considered to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synchetic and reclaim, whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales of rubber by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-iuport data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in July, 1952, as compared with June, 1952, shows a decrease in natural of 878,524 pounds, a decrease in synthetic of $1,107,078$ pounds, and a decrease in reclaim of 298,801 pounds, the total decrease being $2,284,403$ pounds. Considering the situation in terms of end products use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, decreased by $1,003,581$ pounds, consumption in rubber footwear decreased by 408,409 pounds, in wire and cable decreased by 219,045 pounds and in other products decreased by 653,368 pounds, making the total decrease of $2,234,403$ pounds mentioned above.

Prepared in General Manufactures Section.

## CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER <br> Section A. Summary Data

This section includes summary data on natural, synthetic and reclaim rubber showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classification, wherever possible, see Section B, Natural Rubier; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1. - Surmary Statement of all Rubber Stocks, Domestic Production and Domestic Consumption Showing Monthly Averages, 1939-1951, and Actual Monthly Totals, July 1951 to July 1952.

## CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER <br> Section Be Natural Rubber

The July 1952 consumption of Natural Rubber, showing crude rubber and natural latex separately and arranged according to end products classification, is shown in Table 5. Summary data, by months, July 1951 to July 1952 are shown in Table 6. For summary data on Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

## Section D. Reclaim Rubber

Table 10 gives the consumption of Reclaim in total only, by end product classification, July 1951 to July 1952. Of the 2,094,685 pounds consumed in July 1952, 69,760 pounds were consumed in the form of dispersions and 2,024,925 pounds as other than dispersions. For summary data on Reclaim and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Table 10 - Consumption of Reclaim Rubber in Total by End Products, July 1951 to July 1952, Showing also Percentages of Reclaim to all Rubber Consumed.
