CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBERNOVEMBER, 1953

The statistics made available monthly in this report are considered to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synthetic and reclaim, whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in November 1953 as compared with October 1953 shows an increase in natural of 83,822 pounds, an increase in synthetic of 229,922 pounds and a decrease in reclaim of 46,613 pounds, the total increase being 267,131 pounds. Considering the situation in terms of end products use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, increased by 329,388 pounds, consumption in rubber footwear decreased by 365,113 pounds, in wire and cable increased by 83,385 pounds and in other products increased by 219,471 pounds, making the total increase of 267,131 pounds mentioned above.

CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

Section A. Summary Data

This section includes summary data on natural, synthetic and reclaim rubber showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classification, where-ever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Section B. Natural Rubber

The November 1953 consumption of Natural Rubber, showing crude rubber and natural latex separately and arranged according to end products classification, is shown in Table 5. Summary data, by months, November 1952 to November 1953 are shown in Table 6. For summary data on Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1.

Table 10 gives the consumption of Reclaim in total only, by end product classification November 1952 to November 1953. Of the 2,636,028 pounds consumed in November 1953, 71,243 pounds were consumed in the form of dispersions and 2,564,785 pounds as other than dispersions. For summary data on Reclaim and other rubber stocks, domestic production and domestic consumption expressed in long tons, see Table 1.
