CONSUMPION, FRODUCTION AND INVENTORIRS OF RUBBER
JTove, 1953

The statistics made available monthly in this report are considered to represent clearly and accurately (a) the new domestic production of synthetio and reclais rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, aynthetic and reclaim, whether forelgn or domestic, by broad end product use groupings, together with inventories, recelpta and sales by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-inport data (as compiled by the Bxternal Trade Branch, D. B. S.) over a period of months.

Consumption of rubber in June, 1953 as compared with May, 1953 shows an increase in natural of 258,794 pound $s$, an increase in synthetic of 592,739 pounds, and an increase in reclaim of 207,573 pounds, the totel increase being 1,059,106 pounds. Considering the situation in terms of end products use, it may be noted that the consumption of all rubber in the production of tires and tube日, including tire repair materials, increased by 721,996 pounds, consumption in rubber footweer increased by 138,447 pounds, in wire and cable increased by 79,710 pounds and in other products incressed by 118,953 pounds, making the total increase of $1,059,106$ pounds mentioned above.

Prepared in General Manufactures Section.

## CONSUMPTION, PRODUCIION AND INVENTORIES OF RUBBER

Section A. Summary Data

This section includes sumary data on natural, synthetic and reclain rubber showing stocks, domestic production and domestic consumption. For more detalled data of consumption by specific types and by end products classification, whereever possible, see Section B, Natural Rubber; Section C. Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1. - Sumary Statement of all Rubber Stocks, Domestic Production and Domestic Consumption Showing Monthly Averages, 1939-1952, and Actual Monthly Totals, January to June 1953.

Weights are given in long Tons (2,240 pounds)

## CONSUMPIION, FRODUCTION AND INV FNIORIES OF RUBBER

Section B, Natural Rubbor

The June 1953 consumption of Natural Rubber, showing crude rubber and natural latex separately and arranged according to end products classification, is shown in Table 5. Summary data, by months, June 1952 to June 1953 are shown in Table 6. For sumary data on Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table l.

## Section D. Reclaim Rubber

Table 10 gives the consumption of Reclaim in total only, by end product classiIfication June 1952 to June 1953. Of the 2,952,772 pounds consumed in June 1953, 82,015 pounds were consumed in the form of dispersions and 2,870,757 pounds as other than dispersions. For summary data on Reclaim and other rubber stocks, domestic production and domestic consumption expressed in long tons, see Table 1.

Table 10 - Consumption of Reclaim Rubber in Total by Fnd Products June 1952 to June 1953, Showing also Percentages of Reclaim to all Rubber Consumed.

|  | Reclaim |  | Used in the Manufacture of |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Percentage of all Rubber | Tires and Tubes | Wire and Cable | Footwear | Other products |
