CONSUMPTION, PRODUCTION AND INVGNTORTBS OF RUBBERR
JULY. 1953

The statistics made available monthly in this report are considered to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synthetic and reclaim, whether foreign or domestic, by broad end product use groupings, together with inventories, receipts and sales by consuming manufactures in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately knom. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated with new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in July, 1953 as compared with June, 1953 shows a decrease in natural of $1,133,735$ pounds, a decrease in synthetic of $1,453,113$ pounds and a decrease in reclair of 572,166 pounds, the total decrease being 3,159,014 pounds. Considering the situation in terms of end products use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, decreased by $1,422,780$ pounds, consumption in rubber footwear decreased by 369,760 pounds, in wire and cable decressed by 303,556 pounds and in other products decreased by $1,062,918$ pounds, maiking the total decresse of $3,159,014$ pounds mentioned above.

Prepared in General Manufactures Section.

## Section A. Sumpary Data

This section includes summary data on natural, synthetic and reclaim rubber showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classification, whereever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1. - Summary Statement of all Rubber Stocks, Domestic Production and Domestic Consumption Showing Monthly Averages, 1939-1952, and Actual Monthly Totals, January to July 1953.

Weights are given in long Tons (2,240 pounds)

|  | Stocks, End of Period |  |  | Domestic Production |  | Consumption |  |  |

## CONSUMPTION. PRODUCTION AND INVENTORIES OF RUBBER

## Section B. Natural Rubber

The July 1953 consumption of Natural Rubber, showing crude rubber and natural latex separately and arranged according to end products classification, is shown in Table 5. Summary data, by months, July 1952 to July 1953 are shown in Table 6. For sumnary data on Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table l.

## Table 5 - Consumption of Natural Rubber, by Types and by End Product Classification, July 1953.

Table 6 - Consumption of Natural Rubber in Total, by End Products, July 1952 to July 1953, showing also Percentage of Natural to all Rubber Consumed.

|  | Natural |  | Used in the Manufacture of |  |  |  |

## Section De Reclaim Rubber

Table 10 gives the consumption of Reclaim in total only, by end product classification July 1952 to July 1953. Of the $2,380,606$ pounds consumed in July 1953, 54, $=$ 447 pounds were consumed in the form of dispersions and $2,326,159$ pounds as other than dispersions. For summary data on Reclaim and other rubber stocks, domestic production and domestic consumption expressed in long tons, see Table 1.

Table 10 - Consumption of Reclaim Rubber in Total by End Products July 1952 to July 1953, Showing also Percentages of Reclaim to all Rubber Consumed.
