DOMINION BUREAU OF STATISTICS
OTTAWA - CANADA

Peblished by A utherily of the Ri, How. C. D. Howe, Minisler of Trade and Commerce

Vol. 9, No. 7, July 1955
Price: \$2.00 per year.

## CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

The statistics made available monthly in this report are considered to represent clearly and accurately (a) the new domestic production of synthetic and reclaim rubber, and the inventories of firms reporting production and (b) the total consumption of all types of rubber, natural, synthetic and reclaim whether foreign or domestic, by broad end product use groupings, together with inventories, recelpts and sales by consuming manufacturers in all industries. The addition of the two inventories gives the total stocks held by industry.

It is regretted that comparable export-import data cannot be secured each month, and that, therefore, the total available supply is not accurately known. However, the data given in (b) do ultimately account for the total consumption of rubber in Canada, and should be capable of being correlated With new production and export-import data (as compiled by the External Trade Branch, D.B.S.) over a period of months.

Consumption of rubber in July 1955 as compared with June 1955 shows a decrease in natural of $2,419,726$ pounds, a decrease in synthetic of $2,453,188$ pounds and a decrease in reclaim of 991,530 pounds, the total being a decrease of $5,864,444$ pounds. Considering the situation in terms of end products use, it may be noted that the consumption of all rubber in the production of tires and tubes, including tire repair materials, decreased by $2,867,824$ pounds, consumption in rubber footwear decreased by 883,915 pounds, in wire and cable decreased by 313,290 pounds and in other products decreased by $1,799,415$ pounds, making the total decrease of $5,864,444$ pounds mentioned above.

Prepared in Textiles and Miscellaneous Products Section, Industry and Merchandising Division.

## CONSUMPTION, PRODUCTION AND INVENLORIES OF RUBBER

## Section A. Summary Data

This section includes sumary data on natural, synthetic and reclaim rubber showing stocks, domestic production and domestic consumption. For more detailed data of consumption by specific types and by end products classification, wherever possible, see Section B, Natural Rubber; Section C, Synthetic Rubber; and Section D, Reclaim Rubber.

Table 1 - Summary Statement of all Rubber Stocks, Domestic Production and Domestic Consumption Showing Month1y Averages, 1939-1954 and Actual Month1y Totals, January to July 1955.

Weights are given in long tons ( 2,240 pounds)

|  |  | Stocks, End of Period |  |  | Domestic Production |  | Consumption |  |  |

## CONSUMPTION, PRODUCTION AND INVENTORIES OF RUBBER

## Section B. Natural Rubber

The July 1955 consumption of Natural Rubber, showing crude rubber and natural latex separately and arranged according to end products classification, is shown in Table 5. Summary data, by months July 1954 to July 1955 are shown in Table 6. For summary data on Natural and other rubber stocks, domestic production and domestic consumption, expressed in long tons, see Table 1 .

## Section D. Reclaim Rubber

Table 10 gives the consumption of Reclaim Rubber in total only, by end products classification July 1954 to July 1955. Of the 2,342,039 pounds consumed in July 1955, 15,403 pounds were consumed in the form of dispersions and $2,326,636$ pounds as other than dispersions. For sumary data on Reclaim and other rubber stocks, domestic production and domestic consumption expressed in long tons, see Table 1.

Table 10 - Consumption of Reclaim Rubber in Total by End Products July 1954 to July 1955, showing also Percentage of Reclaim to all Rubber Consumed.
