PUBLICATIONS

The results of the annual Census of Industry are published by the Dominion Bureau of Statistics in a series of industry reports which are released each year as the compilations are completed. Reports for industries classified to the **Leather Products** Major Group are listed below, along with current and annual publications of related interest. Similar reports are issued for other industries. A complete catalogue of publications of the Bureau is available on request from the Information Services Division, Dominion Bureau of Statistics, Ottawa, or from the Queen's Printer, Ottawa.

A — Annual

M — Monthly

Catalogue number	Title	Price
33-201	Leather Products Industry — General Review (A)25

33-203	Leather Footwear and Leather Boot and Shoe Findings Industries (A)50
33-204	Leather Glove and Mitten Industry (A)50
33-205	Miscellaneous Leather Products and the Leather Baking Industries (A)50
<hr/>		
33-206	Rubber Products Industry (A)50
33-001	Statistics of Hides, Skins and Leather (M)	per year 1.00
33-002	Production of Leather Footwear (M)	per year 2.00
33-003	Consumption, Production and Inventories of Rubber (M)	per year 2.00
31-001	Inventories, Shipments and Orders in Manufacturing Industries (M)	per year 4.00
31-201	General Review of the Manufacturing Industries (A)	2.00
65-004	Trade of Canada — Exports (M)	per year 7.50
65-007	Trade of Canada — Imports (M)	per year 7.50

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Information Services Division, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

EXPLANATORY NOTES

This report is one in a series of about 130 publications which present the results of the 1958 Census of Manufactures. Most reports in this series refer to specific industries, but there are summary reports for Canada and the provinces and for major industry groups. An annual Census of Manufactures has been carried out by the Dominion Bureau of Statistics since 1916.

Industry statistics given in these reports refer to number of establishments, employees, salaries and wages, cost of materials, supplies, fuel and electricity, gross value of shipments, inventories and value added by manufacturing. Details of materials used and products shipped are also given. Descriptions of the principal industry statistics, with special reference to 1958, are as follows:

Period Covered

Firms are asked to submit figures for the calendar year, if at all possible, and most reports are on this basis. Financial year reports for periods differing from the calendar year are accepted in instances where the firms find it impossible to supply calendar year data from accounting records. However the data on employees, salaries and wages are requested on a calendar year basis in all cases.

Establishment

Data for the annual census is collected on an establishment basis. A firm with more than one plant is required to file a report for each plant. In most cases an establishment is a complete factory. Sometimes, however, a plant is divided into two or more establishments when it carries out operations classifiable to different industries and when separate accounting records are available. Usually the statistics for an establishment relate only to the manufacturing activities. Other activities such as construction at the plant by its own employees, wholesale or retail activities carried on at the plant location, etc., are not included. Plants engaged solely in **repair** work (except in the case of furniture, shipbuilding, boat building, aircraft and railway rolling stock industries) are not included but plants occupied in assembling parts into complete units are included.

Employees

Administrative and office employees include all executives and supervisory officials such as presidents, vice-presidents, secretaries, treasurers, etc., together with managers, professional and technical employees, superintendents and factory supervisors above the working foremen level and clerical employees. Working owners and partners are also included in this category.

Production and related workers include all other factory workmen whether paid on a monthly, weekly, hourly or piece-work basis. Working foremen doing work similar to that of the employees they supervise are included, as are maintenance, warehousing and delivery staffs. Employees on new construction work, in retail or wholesale operations, on outside piece work etc., are not included.

Production workers are reported by months, an average for the year being obtained by summing the monthly figures and dividing by twelve. This procedure is followed even though the plant did not operate in all months. Figures on employment refer to calendar years whether or not some establishments reported other data on a financial year basis.

Salaries and Wages

Salaries and wages refer to gross earnings of the employees described above, including salaries, wages, commissions, bonuses, the value of room and board where provided, deductions for income tax and social services such as sickness and unemployment insurance, pensions, etc., as well as any other allowances forming part of the employees' wages. Payments for overtime are included.

Salaries refer to amounts paid to administrative and office employees. Withdrawals by working owners or partners for normal living expenses for self and family are included but not their withdrawals for income tax. Wages refer to the amounts paid to production and related workers as defined above. Data on earnings refer to the calendar year whether or not some establishments reported other data on a financial year basis.

Cost of Fuel and Electricity

Figures for fuel refer to amounts actually used, (including fuel used in cars and trucks), not to purchases unless the quantities are the same. Values refer to the laid-down cost at the works, including freight, duty, etc.

Materials and Supplies Used

Figures represent quantities and laid-down cost values, at the works, of materials and supplies actually used during the year whether purchased from others or received as transfers from other plants of the reporting company. Amounts paid to other manufacturers for work done on materials owned by the reporting company are included. Returnable containers or any other items charged to capital account are not included. Fuels are not included. Goods bought from others or received as transfers from other plants of reporting companies

for resale without further processing are not included. Maintenance and repair supplies not chargeable to capital account are included.

Factory Shipments

Factory shipments refer to shipments of goods made from own materials either in the reporting plant or by other manufacturers on the basis of a charge to the reporting plant for work done. All products and by-products shipped from the establishment are included whether for domestic use, export, or for government departments. Transfer shipments to sales outlets, distributing warehouses or to other manufacturing units of the reporting firm are included. Goods bought or received as transfers and resold without further processing are not included. Values are computed on f.o.b. plant or plant warehouse basis, and do not include sales tax or excise duties. Values of containers not returnable are included. Amounts received in payment for work done on materials owned by others are included.

In a few industries such as shipbuilding, aircraft, etc., where work on principal products extend over a relatively long period, the value of production is recorded rather than the value of shipments. For those industries production is computed from the value of deliveries of complete units during the year plus the value of work done during the year on unfinished units less the value of work done in previous years on finished units delivered in the year under review.

Inventories

Values represent the book values of manufacturing inventories owned and held at the reporting plant. Figures include inventories held in warehouses or selling outlets which have been included with plant operations for purposes of reporting shipments.

Value Added by Manufacturing

Figures are computed from value of shipments plus or minus changes in inventories of finished

goods and goods in process less cost of materials, fuel and electricity. This figure is sometimes referred to as net production.¹

Standard Industrial Classification

The Standard Industrial Classification Manual, prepared by the Dominion Bureau of Statistics, provides for 135 three-digit industries in the manufacturing sector, arranged in 17 major groups. Reporting establishments are classified or allotted to specific industries on the basis of the value of principal products made or shipped.

Short Forms

Prior to 1949 all manufacturing firms, regardless of size, were required to complete a standard form annually covering all census details, but for later years an effort was made to ease the reporting burden for smaller firms which usually do not maintain regular records in the required detail. A modified or short form was introduced in 1949 asking for the total value of shipments only, or in industries with a large number of small firms, for total value of shipments and quantities and values of a few principal products. Using the ratio of value of shipments in the current year to value of shipments in the base year, 1948, estimates of other census data were made for each plant for inclusion in the regular compilations. In general, the cut-off point for short forms was set at \$50,000 gross value of shipments annually, but there were lower cut-offs for a number of industries in which the small firms accounted for a larger share of total shipments. About 40 per cent of the total number of establishments reported on the modified or short form. They accounted for less than 3 per cent of the total value. In 1958, to establish a new base year, the small firms were again asked to report data on employees, salaries and wages, and other principal statistics together with some detail on material and products.

¹ To arrive at the National Accounts concept of "gross domestic product at factor cost", it would be necessary to subtract also the cost of office supplies used, advertising, insurance and other goods and services obtained from other businesses. Data on these inputs are not collected on the annual Census of Manufactures. Value added figures for "The primary industries and construction" are published in D.B.S. publication 61-202, *Survey of Production*.

SYMBOLS

The interpretation of the symbols used in the tables throughout this publication is as follows:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.

THE MISCELLANEOUS LEATHER PRODUCTS

1958

In 1958 the Miscellaneous Leather Products Industry reported shipments amounting to \$28,756,654 f.o.b. plant, 1.2 per cent more than the comparable 1957 total of \$28,410,852. When account is taken of the combined decrease of \$75,797 in the goods in process and finished goods inventories during the year, the estimated value of production was \$28,680,857 or 0.6 per cent greater than the corresponding 1957 value of \$28,506,961.

The number of establishments dropped from 212 in 1957 to 196 in 1958. Salary and wage payments also declined, being \$10,080,970 in 1957 and 4.5 per cent lower at \$9,629,975 in the year under review. The total cost of materials used by the industry in 1958, \$13,421,863, was 4.8 per cent higher than the 1957 figure of \$12,806,321.

The total value f.o.b. plant of shipments of hand luggage, the leading product of the industry, was \$6,011,658, or 7.3 per cent higher than the comparable 1957 total of \$5,600,000. A detailed breakdown of factory shipments of the industry's products may be found in Table 3.

The industry is centred mainly in Quebec, with 99 plants, and in Ontario, with 74. Of the total value of shipments, 46.4 per cent originated in Ontario; 45.2 per cent in Quebec; and the remaining 8.4 per cent in the six other provinces in which production was reported.

Table 12 gives details of power installations for this industry for 1958, representing the results of a special survey made every five years.

1958	196	3,871	9,629,975	210,479	13,421,863	15,048,515	28,756,654

¹ For the years 1921-23 cost of fuel only is shown.

² Figures for "Value added by manufacture" are obtained by subtracting cost of materials used and cost of fuel and electricity from value of production. In 1952 and 1953 value of shipments was used since the value of production could not be ascertained. In 1954 and 1955 value of production was computed by using the value of shipments plus or minus the increase or decrease in finished goods inventory. For 1956 and later years, the change in "Goods in process" inventory was also taken into account.

³ Figures for 1952 and later years represent value of factory shipments.

¹ The opening inventory for 1958 does not necessarily agree with the closing inventory for 1957 because of changes in the composition of the industry, such as the addition of new establishments, the disappearance of old ones or the transfer of establishments between industries for statistical purposes. The figure for value added in 1957 does not need to be altered because of such changes in the composition of the industry.

November	1,493	1,846					
December	1,392	1,651					
Average²					1,491	1,783	3,274

¹ The number of production workers by months was generally collected only for establishments reporting value of shipments of \$15,000 and over. For smaller establishments, only the number employed during the last pay period of May, 1958, was collected.

² The average for establishments generally reporting shipments of less than \$15,000 was estimated by using average annual earnings data from the large establishments in conjunction with reported payrolls for the small establishments.

TABLE 12. Power Installation, 1958

Type of equipment	Driving generators	Not driving generators
	horsepower	
Electric motors (one-quarter horsepower and over)	—	3,988

Travelgard Limited	1424 Charles St., Vancouver 6

THE LEATHER BELTING INDUSTRIES

1958

Firms classified in this industry are those whose chief item of manufacture is transmission belting of leather. The industry in 1958 reported shipments worth \$1,138,717 f.o.b. plant, \$27,571 or 2.4 per cent lower than the 1957 total of \$1,166,288. As in previous years, the industry was confined to Quebec and Ontario, with 6 plants in the former and 7 in the latter during 1958.

There were 13 plants in operation in the industry in 1958, as against 11 in the preceding year. The number of employees declined to 141 from 148 in 1957, but the total salary and wage payments rose

by 2.9 per cent to \$493,851 in 1958 from \$479,934 the previous year. The total cost of materials and supplies used in 1958, at \$533,348, was only fractionally below the 1957 figure of \$533,764.

The value of the 1958 shipments of the two chief products, belting and straps, was \$636,745 and \$138,454, respectively, compared to \$689,278 and \$156,389 in 1957.

Imports and exports of leather belting are shown in Tables 14 and 15 of the Miscellaneous Leather Products section of this publication.

TABLE 1. Principal Statistics, Calendar Years 1917-55

Year	Estab- lish- ments	Em- ployees	Salaries and wages	Cost of fuel and electri- city used ¹	Cost at plant of materials used	Value added by manufacture	Gross selling value of products ²
