## NOVEMBER, 1932.

Production of automobiles in Canada at 2,204 cars in November was 25 per cent less than the 2,923 cars made in the previous month which in turn was 25 per cent greater than the 2,342 cars of September. The decline from October was general to all types of cars, passenger cars dropping to 1,669 from 2,361 and trucks to 535 from 562.

Of the November output only 484 cars were made for sale in this country, the balance of 1,720 being for export. The number of cars manufactured for use in Canada in November was the lowest for any month during the year to date, while the number made for export was exceeded only during July and October.

The apparent consumption of cars in Canada during November, as determined by adding the 484 cars made for sale in Canada to the 40 imported, amounted to 524 cars. During October, 1932, the apparent consumption, thus computed, was 740 cars and in November, 1931, it totalled 970 cars.
