AUTOMOBILE STATISTICS FOR CANADA

JULY, 1932.

Production of 7,472 automobiles in Canada during July showed a gain of 5 per cent over the 7,112 cars made in the previous month and exceeded by 77 per cent the 4,220 cars made in July of a year ago. The increase over June was wholly accounted for by the continued improvement of foreign markets as the number of cars made for export advanced to 2,699 from 1,233. This gain was sufficient to more than offset the decline from the previous month of 1,106 in the number of cars made for sale in Canada. Compared by types of cars the July figures show that passenger cars advanced to 6,773 from 6,308 while the production of trucks was lower at 699 as against 804 in June.

Customs' records for July show that 114 cars were imported into Canada and 1,540 exported during the same period. On only three occasions in recent years have the monthly import figures been lower while the export figures were the highest reported for any month since May, 1931.

Of the July output 4,773 cars were made for sale in Canada, leaving a balance of 2,699 cars intended for export. The apparent consumption of automobiles in Canada during the month, as determined by adding the 4,773 cars made for sale in Canada to the 114 cars imported, amounted to 4,887 cars. For the year to date the apparent consumption totalled 42,939 cars and during the first seven months of 1931 to 68,350 cars.
