ANNUAL INDUSTRY BULLETIN
IRON AND STEEL AND THEIR PRODUCTS GROUP
THE FARM IMPLEMENTS AND MACHINERY INDUSTRY, 1937.

Manufacturers of farm implements in Canada reported an increase in production amounting to 19 per cent in 1937 compared with 1936, the factory values being \$18,961,394 and \$15,957,460 respectively. The 1937 value was the highest for the industry since 1930 but it was still less than one-half of the 1929 total of \$40,659,479.

Imports of agricultural machinery increased to \$17,233,658 in 1937 from \$9,373,876 in 1936, a gain of 84 per cent. Farm tractors and parts alone rose to \$13,487,264 from \$6,507,788, while other farm equipment advanced to \$3,746,394 from \$2,866,088.

Exports and re exports of farm implements were valued at \$10,000,033 in 1937 or 65 per cent more than in 1936 when the total was \$6,068,155.

Thirty-seven factories were included in the farm implements industry in 1937, there being 26 works in Ontario, 5 in Quebec, 4 in Manitoba, 1 in Alberta and 1 in Prince Edward Island. The works in Ontario accounted for 96 per cent of the total output.

The industry employed an average of 6,446 workers in 1937, compared with 5,508 in 1936. The 917 salaried employees were paid \$1,538,918 during the year and the 5,529 wage-earners were paid \$5,811,125. The total of \$7,350,043 for salaries and wages was 22 per cent higher than the amount distributed for this purpose in 1936.

Capital employed in manufacturing operations amounted to \$60,927,315 at the end of 1937, including \$15,974,029 as the value of land, buildings and factory equipment, \$21,636,169 as the inventory value of materials and products on hand, and \$23,317,117 as operating capital. Inventories were 4.4 millions higher than in 1936 and operating capital was up \$2.1 million while the value of building, etc., was lower by \$1.7 millions.

In 1937 the Internal Trade Branch of the Dominion Bureau of Statistics made a special survey of sales of farm implements and equipment in Canada and reports that domestic sales, at wholesale prices to dealers, totalled \$30,465,153 or 58 per cent more than in 1936 when the corresponding value was \$19,343,871. The sales of the various implements are given in detail in a special report which may be obtained from the Bureau upon application with remittance of the charge of twenty-five cents.

(x) The value of production for this industry includes some goods such as stoves, road machinery, etc., which cannot be classed as farm implements but, on the other hand, some farm machinery was produced as secondary products by concerns in other industrial groups. It is estimated that these values counterbalance each other.

(xx) No account is taken of changes in factory stocks from year to year.
