ANNUAL INDUSTRY REPORT  
IRON AND STEEL AND THEIR PRODUCTS GROUP  
THE FARM IMPLEMENTS AND MACHINERY INDUSTRY, 1938

Production by establishments in the farm implements and machinery industry was 12 per cent greater in value in 1938 than in 1937 and 33 per cent higher than in 1936. Actual values for these years were as follows: \$21,299,185 in 1938, \$18,961,394 in 1937 and \$15,957,460 in 1936.

Imports of agricultural machinery increased to \$20,319,626 in 1938 from \$17,233,658 in 1937, a gain of 18 per cent. The value of farm tractors and parts rose to \$14,826,580 from \$13,487,264 while other farm equipment advanced to \$5,493,046 from \$3,746,394.

Exports and re-exports of farm implements were appraised at \$7,871,931 in 1938, a decline of 21 per cent from the \$10,000,033 reported for 1937.

Thirty-eight factories were included in the farm implements industry in 1938, there being 27 works in Ontario, 5 in Quebec, 4 in Manitoba and 1 each in Alberta and Prince Edward Island. The works in Ontario accounted for 96 per cent of the total output.

This industry employed an average of 6,458 workers during the year. The 1,100 salaried employees received \$1,680,663 and the 5,358 wage-earners were paid \$5,829,043. The total of \$7,509,706 for salaries and wages was 2 per cent higher than the amount distributed for this purpose in 1937.

Capital employed in manufacturing operations amounted to \$63,761,644, including \$16,995,238 as the value of land, buildings and factory equipment, \$21,003,667 as the inventory value of materials and products on hand and \$25,759,739 as operating capital. The value of buildings, etc., was one million dollars higher than in 1937 and operating capital was up \$2.4 millions, but inventories declined \$0.6 million.

Sales of farm implements and equipment in Canada were valued at \$36,336,056 (at wholesale prices to dealers) in 1938 or about 18 per cent more than in 1937 when the corresponding value was \$30,775,198. Sales of the various implements are given in detail in a separate report which has been issued by the Bureau.

(x) The value of production for this industry includes some goods such as stoves, road machinery, etc., which cannot be classed as farm implements but, on the other hand, some farm machinery was produced as secondary products by concerns in other industrial groups. It is estimated that these values counterbalance each other.

(xx) No account is taken of changes in factory stocks from year to year.
