THE BOAT BUILDING INDUSTRY

1954

This industry comprises establishments engaged wholly, or chiefly, in the manufacture of small vessels and pleasure craft, such as rowboats, canoes, sailboats, motor-boats, etc. Factory shipments in 1954 were valued at \$9,292,424, an increase of 9.8 per cent over the 1953 total of \$8,463,531.

The 200 plants which reported in this group were distributed across Canada, as follows: 62 in Ontario; 59 in British Columbia; 37 in Nova Scotia; 33 in Quebec; 5 in Manitoba; 3 in New Brunswick and 1 in Saskatchewan.

The total number of employees in 1954 was 1,572 and salaries and wages for the year amounted

to \$3,923,909. Materials used in manufacturing cost \$3,758,724, and fuel and electricity costs totalled \$143,392.

Note: Figures for value added by manufacture shown in Table 1, prior to 1952, were obtained by subtracting the cost of materials used, including fuel and electricity, from the value of production. In 1952, the gross value of production was replaced by value of factory shipments, f.o.b. plant. As no information on inventory change is available for 1952 and 1953, value added figures for these years were obtained by subtracting from the value of shipments the cost of materials, fuel and electricity. In 1954, information on the value of year-end inventory holdings at plant and plant warehouses was collected as part of the annual Census of Industry and information thus made available was taken into account in calculating the value added figure for 1954.
