THE BOAT BUILDING INDUSTRY

1956

This industry comprises establishments engaged wholly or chiefly in the manufacture of small vessels and pleasure craft, such as rowboats, canoes, sailboats, motor-boats, etc. Factory shipments in 1956 were valued at \$11,507,160, an increase of 12.1 per cent over the 1955 total of \$10,267,548.

The 197 plants which reported in this group were distributed across Canada as follows: 63 in Ontario; 59 in British Columbia; 35 in Nova Scotia; 33 in Quebec; 6 in Manitoba; 2 in New Brunswick and 1 in Alberta.

The total number of employees in 1956 was 1,711 and salaries and wages for the year amounted to \$4,758,317. Materials used in manufacturing cost

\$5,049,849 and fuel and electricity costs totalled \$180,689.

Note: Figures for value added by manufacture, shown in Table 1, prior to 1952 were obtained by subtracting the cost of materials used, including fuel and electricity, from the value of production. In 1952 the gross value of production was replaced by value of factory shipments f.o.b. plant. As no information on inventory change is available for 1952 and 1953, value added figures for these years were obtained by subtracting from the value of shipments the cost of materials, fuel and electricity. In 1954 and later years information on the value of year-end inventory holdings at plant and plant warehouses was collected as part of the annual Census of Industry and information thus made available was taken into account in calculating the value added figures.

1. (a) Book value of all manufacturing inventories owned and held at plant and plant warehouses.

(b) Beginning with 1954, information on the value of year-end inventory holdings at plant and plant warehouses is being collected as part of the annual Census of Industry. These data were formerly collected by a separate survey. The summarized results for the Boat Building Industry for the Year under review are shown in the above table.

(c) The opening inventory for 1956 does not necessarily agree with the closing inventory for 1955, because of the addition of new plants, the transfer of plants to other industries and plants going out of business, etc. However, the value added figures for the previous year have not been recalculated to allow for the changes mentioned above.
