1. Explanatory Notes

"Explanatory Notes" on selected statistical terms may be found on the inside back cover of this publication. These notes are based on the detailed "Concepts and Definitions" which are available free of charge from the Manufacturing and Primary Industries Division of Statistics Canada.

2. Deletion of Establishments without Employees

With relatively few exceptions, establishments which in previous censuses did not report payment of salaries and wages (and, by inference, had no employment) were not surveyed in the 1975 Census of Manufactures. Although this involved deleting a total of some 1,400 establishments, they accounted for only 0.03% of the shipments of all manufacturing industries in 1974. Except for the number of establishments, the effect of this change on historical comparability of census data for most industries is either non-existent or only marginal. For industries in which there is an appreciable effect, however, details are provided in the introductory text of the relevant 1975 reports in this series.

3. Effect of Small-Establishment Reporting on Fuel and Electricity Statistics

Users should note that information on the cost of fuel and electricity is not collected separately for small establishments but is included in "cost of materials and supplies", beginning with 1970. Although this does not affect the calculation of "value added", it does underestimate the value of fuel and electricity, especially in those industries and provinces where small establishments account for a significant proportion of the total. This may affect the statistics in Table 1, the lower employment size groups in Table 2, and Table 4, which applies to large establishments only.

4. Changes in Data on Working Owners and Partners, and Withdrawals

Questions on the number of working owners and partners were dropped from the short form (for small establishments) in 1970. A study of past data showed that, for each establishment reporting withdrawals, it would be sufficiently accurate to impute one working owner for each establishment classified as an "individual ownership" and two working owners or partners for each establishment classified as a "partnership". (By definition, working owners and partners do not exist in the other types of business organization). Due to difficulties in collecting consistent, reliable information on withdrawals, this question was deleted from both the long and short forms in 1975 (the data themselves were last published for 1973). Beginning with 1975, the imputation of numbers of working owners and partners for short-form respondents has been made solely on the basis of type of organization. This change results in an apparent increase in the number of working owners and partners as, in the past, not every establishment classified as an individual ownership or a partnership reported withdrawals every year. Numbers of working owners and partners for long-form respondents (sent to large establishments) have been taken as reported for all years.

5. Value of Production

Users interested in obtaining the value of production (manufacturing activity) can do so by adding cost of materials and supplies used (manufacturing activity), cost of fuel and electricity, and value added (manufacturing activity).

1. Notes explicatives

On trouvera au recto de la couverture arrière de la présente publication l'explication de certains termes statistiques. Ces explications se fondent sur les "Concepts et définitions" détaillés que l'on peut se procurer gratuitement à la Division des industries manufacturières et primaires de Statistique Canada.

2. Suppression des établissements sans salariés

À quelques exceptions près, les établissements qui n'ont pas déclaré de traitements ni de salaires aux recensements précédents (donc aucun salarié), n'ont pas été pris en compte au recensement des manufactures de 1975. Ces 1,400 établissements hors de l'enquête ne sont cependant intervenus que pour 0.03 % des livraisons de toutes les industries manufacturières en 1974. Sauf pour ce qui est du nombre d'établissements, les répercussions de cette modification sur la comparabilité chronologique des données du recensement sont nulles ou minimales pour la plupart des industries. Toutefois, pour chaque industrie touchée par cette modification, on a pris soin d'inclure des détails supplémentaires dans l'introduction du bulletin approprié de 1975.

3. Répercussions des déclarations des petits établissements sur les statistiques du combustible et de l'électricité

Le lecteur remarquera que les renseignements concernant le coût du combustible et de l'électricité ne sont pas recueillis à part auprès des petits établissements mais inclus, depuis 1970, dans le "coût des matières et fournitures". Bien que cette pratique n'influe pas sur le calcul de la "valeur ajoutée", elle entraîne une sous-estimation de la valeur du combustible et de l'électricité dans les industries et les provinces où les petits établissements en consomment une part importante. Elle peut également modifier les statistiques du tableau 1, celles des petits groupes de salariés figurant au tableau 2 et les données au tableau 4, qui ne visent que les grands établissements.

4. Modifications aux données sur les propriétaires et associés actifs, et retraits

À partir de 1970, les questions relatives aux propriétaires et associés actifs ont été supprimées de la formule abrégée (destinée aux petits établissements). En revoyant les données antérieures, nous avons constaté que, dans le cas des établissements déclarant des retraits, il suffirait d'imputer un propriétaire actif à chaque établissement "à propriétaire unique" et deux propriétaires ou associés actifs à chaque "société en nom collectif". (Par définition, les propriétaires et associés actifs n'existent pas dans les autres genres d'entreprise). Étant donné qu'il est difficile de recueillir des renseignements uniformes et fiables sur les retraits, cette question a été supprimée en 1975 des questionnaires longs et abrégés (les données ont été publiées pour la dernière fois en 1973). À partir de 1975, le nombre de propriétaires et d'associés actifs, dans le cas des enquêtés sur la formule abrégée, est imputé uniquement selon la forme juridique. Cette modification se traduit par une augmentation apparente du nombre de propriétaires et d'associés actifs puisque, dans le passé, les établissements "à propriétaire unique" et ceux classés comme "société en nom collectif" n'ont pas tous déclaré des retraits chaque année. Pour les enquêtés utilisant la formule longue (envoyée aux grands établissements), le nombre de propriétaires et d'associés actifs est égal au chiffre indiqué chaque année.

5. Valeur de la production

Le lecteur qui désire connaître la valeur de la production (activité manufacturière), n'a qu'à additionner le coût des matières et fournitures utilisées (activité manufacturière), le coût du combustible et de l'électricité, et la valeur ajoutée (activité manufacturière).

1975

For statistical purposes this industry covers establishments primarily engaged in producing machine parts and equipment, other than complete machines, for the trade. It also includes machine shops providing custom and repair services.

The cost of materials and supplies, fuel and electricity, etc. (inputs), used in the production of goods of own manufacture, increased by \$6.1 million (or 6.4%).

Value of shipments and other revenue of the Machine Shops industry in 1975 totalled \$320.6 million an increase of \$29.4 million (or 10.0%) compared to 1974.

Some of the products manufactured and reported by firms classified to this industry were tools and dies, rebuilt engines, motor vehicle and aircraft parts, sawmill machinery, conveyors, mining machinery and petroleum field equipment. Custom machining and repair services accounted for approximately 56.8% of the shipments of establishments which provided detailed production figures in 1975.

Aux fins de la statistique, cette branche d'activité comprend les établissements qui s'occupent principalement de la fabrication pour le commerce d'éléments et de pièces détachés de machines et d'appareils, mais non les machines complètes. Cette industrie comprend aussi les ateliers qui font la réparation à façon.

Le coût des matières et des fournitures, du combustible et de l'électricité (entrées), utilisées pour la production des marchandises de propre fabrication, a augmenté de \$6.1 millions (ou 6.4 %).

La valeur des livraisons et les autres recettes des Ateliers d'Usinage a atteint en 1975, \$320.6 millions, soit une augmentation de \$29.4 millions (ou 10.0 %) par rapport à 1974.

Quelques-uns des produits manufacturés et déclarés par les établissements classifiés dans cette industrie étaient des outils et des matrices, des moteurs reconditionnés, des pièces de véhicule automobile et d'aéronefs, des machines de scieries, des convoyeurs, des machines d'extraction minière, de matériel de forage de puits de pétrole. L'usinage à façon et les services de réparations représentaient environ 56.8 % des livraisons des établissements qui ont rapporté en détail les chiffres de leur production en 1975.

Lead, antimonial - Plomb antimonisé	1	1	1	-	-	1
Nickel	2	2	15	8	7	48
Nickel alloys (Inconel, monel, nickel-silver, etc.) - Alliages de nickel (inconel, monel, nickel-argent, etc.)	12	11	76	9	8	52
Tin - Étain	--	--	1	2	2	11
Titanium-bar - Barres de titane	4	4	14	5	5	26
Zinc:						
Ingots and slabs - Lingots et brames	3	3	2	4	4	4
Other forms - Autres formes	--	--	1	5	5	13
Other non-ferrous metals - Autres métaux non ferreux	18	16	37			

TABLE 5. MATERIALS AND SUPPLIES USED - MANUFACTURING ACTIVITY, 1974 AND 1975 - Concluded

TABLEAU 5. MATERIÈRES ET FOURNITURES UTILISÉES - ACTIVITÉ MANUFACTURIÈRE, 1974 ET 1975 - à suivre

	1974			1975		
	Quantity - Quantité		Cost - Coût	Quantity - Quantité		Cost - Coût
	short tons - tonnes courtes	metric tonnes - tonnes métriques	thousands of dollars - milliers de dollars	short tons - tonnes courtes	metric tonnes - tonnes métriques	thousands of dollars - milliers de dollars
Foundry coke (used in cupola) - Coke métallurgique (utilisé dans le cublot)	240	218	14	160	145	10
Foundry sand (including core and moulding sands) - Sables de fonderie (y compris sables à noyaux et de moulage)	67	61	3	6	5	--
Plumbago and graphite - Plombagine et graphite	1	1	1	--	--	--
Sulphuric acid, 100% - Acide sulfurique, 100 %	91	83	53	15	14	6
Core oil - Huile à noyaux	3	14	2	2	9	3
Lumber - Bois de construction	253	597	53	231	545	49
Paints and varnishes - Peinture et vernis	105	105
Refractories - Matières réfractaires	15	8
All other - Tous autres	51,502	48,095
Containers and other packaging materials and supplies used - Conteneurs et autres matières et fournitures d'emballage utilisés:						
Corrugated boxes and cartons - Boîtes et cartons en carton ondulé	318	322
Folding and set-up boxes, paperboard - Boîtes pliantes et montées en carton	104	130
Lumber - Bois de construction	47	77
Skids and pallets - Palettes et traîneaux	31	15
Steel strapping - Bandes métalliques	19	18
Wooden boxes, crates, barrels and kegs - Boîtes, caisses, barils et bârilllets en bois	60	49
All other - Tous autres	86	151
Operating, maintenance and repair supplies used (excluding fuel) - Fournitures d'exploitation, d'entretien et de réparation utilisées (sauf le combustible)	7,489	8,004
Amount paid out to others for work done on materials owned by establishments - Montant versé à d'autres pour travail exécuté sur des matières appartenant aux établissements	3,544	4,552
Small establishments not reporting detail - Petits établissements ne déclarant pas en détail	9,786	21,171
Total	94,572	100,867

TABLE 6. SHIPMENTS OF GOODS OF OWN MANUFACTURE, 1974 AND 1975

TABLEAU 6. LIVRAISONS DE PRODUITS DE PROPRE FABRICATION, 1974 ET 1975

	1974		1975	
	Quantity	Value	Quantity	Value
	Quantité number — nombre	Valeur thousands of dollars — milliers de dollars	Quantité number — nombre	Valeur thousands of dollars — milliers de dollars
Large establishments reporting detail — Grands établissements déclarant en détail:				
Products — Produits:				
Automatic screw machine products — Produits de fileteuse automatique	394	..	542
Dies (metal working) — Matrices (travail des métaux)	953	..	732
Jigs and fixtures — Gabarits et pièces fixes	693	..	583
Moulds — Moules	643	..	453
Tools (metal working) — Outils (travail des métaux)	674	..	848
Machinery — Machines:				
Conveyors — Convoyeurs	1,038	..	651
Mining machinery and equipment — Machines et matériel d'extraction minière	2,002	..	3,199
Petroleum field equipment — Matériel de forage de puits de pétrole	1,537	..	1,228
Sawmill machinery — Machines de scieries	1,106	..	1,333
Other machinery, n.c.s. — Autres machines, n.c.a.	10,877	..	11,465
Engines rebuilt — Moteurs reconstruits:				
Automotive, diesel — Automobiles, diesel	3,088	..	736
Automotive, gasoline — Automobiles, essence	27,201	..	28,031
Other, diesel — Autres, diesel	305	—	—
Other, gasoline — Autres, essence	938	..	1,088
Other products — Autres produits:				
Aircraft parts — Pièces d'aéronef	1,524	..	1,206
Parts for chainsaws — Pièces pour scies à chaîne	6	—	—
Stampings — Pièces embouties	364	..	352
All other products — Tous autres produits	52,058	..	54,868
Amount received in payment for work done on materials and products owned by others — Montant reçu en paiement de travail exécuté sur des matières et produits appartenant à d'autres				
	..	138,997	..	138,713
Less adjustment for value of sales taxes, excise duties and outward transportation charges which could not be deducted from individual commodity items described above — Moins rectification pour tenir compte de la valeur des taxes de vente, des droits d'accise et des frais de transport vers l'extérieur qui n'ont pu être déduits de chacun des produits décrits ci-dessus

* CLASSIFIED TO THIS INDUSTRY FOR THE FIRST TIME
CLASSIFIE A CETTE INDUSTRIE POUR LA PREMIERE FOIS

EXPLANATORY NOTES

The following abbreviated notes deal only with salient points or selected inclusions or exclusions which might not be self-evident. Detailed "Concepts and Definitions" are available on request; see "Notes to Users".

Establishment — Smallest operating unit capable of reporting certain specified input and output data; usually a plant or mill.

Large Establishments

Cost of materials and supplies, fuel and electricity — Generally, consumption of purchased items only, at laid-down cost. Includes inter-company and intracompany transfers, contract work by others, fuel used by vehicles.

Value of shipments of goods of own manufacture — Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In reports on the fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown for these industries. Integrated smelters' work on own ore is valued at imputed charge to mine.

Value added — Net output as measured by gross output less purchased commodity inputs used and contract work by others.

- (a) **Value added, manufacturing activity:** Value of shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.
- (b) **Value added, total activity:** Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevant commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues include depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends, interest.

Employees, salaries and wages — Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use: beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

Inventories — Book value of owned inventory held in Canada, including goods in transit and on consignment.

Small Establishments

For establishments filing "short forms", beginning with 1970 data, "cost of materials, supplies and services" includes all purchased services and fuel and electricity; and "total revenue excluding interest and dividends received" is used for both shipments of goods of own manufacture and gross output, total activity. Value added is calculated using these figures and net change in total inventory, and is thus identical for manufacturing and total activity. Numbers of employees are imputed from reported salaries and wages.

Head offices, sales offices and auxiliary units — Included in the individual industry of the company's largest activity. (The allocation of some such units to the major industry group level was discontinued with the 1970 data).

NOTES EXPLICATIVES

Les notes succinctes ci-après s'arrêtent uniquement aux points saillants et à certaines extensions ou restrictions pouvant nécessiter une explication. Sur simple demande, on pourra obtenir les "Concepts et définitions" détaillées; se reporter aux "Notes au lecteur".

Établissement — Plus petite unité exploitante en mesure de fournir certaines données sur ses facteurs de production (entrées) et sur sa production (sorties); en général: usine ou fabrique.

Grands établissements

Coût des matières et fournitures, du combustible et de l'électricité — De manière générale, concerne uniquement la consommation de produits achetés, au prix franc. Comprend les transferts entre filiales et établissements d'une société, les travaux exécutés par d'autres aux termes d'un contrat et la consommation de carburant, par les véhicules.

Valeur des livraisons de produits de propre fabrication — Concerne les produits fabriqués par l'établissement enquêté, ou pour son compte, à partir de matières lui appartenant, déduction faite des rabais, des retours de marchandises, des remises, des taxes de ventes, des taxes et des droits d'accise, des emballages consignés, des frais de livraisons payés à des transporteurs publics ou sous contrat (mais non des frais de livraisons de l'établissement même). Comprend les recettes de réparations et de contrats, les transferts à d'autres unités enquêtées de la même firme, les exportations, la valeur comptable des produits donnés en location par l'établissement. Les livraisons sans vente en consignation au Canada sont prises en compte dans les stocks. Dans les publications sur l'industrie de la fabrication d'éléments de charpente métallique, les fabricants d'aéronefs et de pièces, l'industrie de matériel ferroviaire roulant ainsi que l'industrie de la construction et de la réparation de navires, la valeur de la production remplace celle des livraisons; dans la présente publication, on présente la valeur des livraisons pour ces industries. Pour établir la valeur du travail effectué par une fonderie intégrée sur du minerai qui lui appartient, on calcule le coût qu'il faudrait imputer à la mine.

Valeur ajoutée — Sortie nette, soit sortie brute moins consommation de biens achetés et travaux exécutés par d'autres sous contrat.

a) **Valeur ajoutée, activité manufacturière:** valeur des livraisons de produits de propre fabrication, plus variation nette des stocks de produits en cours et de produits finis, moins coût des matières et des fournitures utilisées, du combustible et de l'électricité.

b) **Valeur ajoutée, activité totale:** comprend (1) la valeur ajoutée par l'activité manufacturière et (2) la valeur ajoutée par l'activité non manufacturière. Cette dernière s'obtient en soustrayant les entrées de marchandises des recettes ou des sorties provenant de l'activité non manufacturière, après avoir soustrait de ces entrées la variation des stocks de produits achetés pour la revente. Les recettes provenant de l'activité non manufacturière comprennent les éléments d'actif amortissable produits par la main-d'œuvre de l'établissement pour son usage propre, les recettes de location de produits, etc., mais non les recettes hors-exploitation, comme les loyers d'immeubles, les dividendes, les intérêts.

Salariés, traitements et salaires — Les traitements et salaires sont pris en compte avant les retenues au titre de l'impôt sur le revenu et des avantages sociaux des employés; ils comprennent les heures-hommes payées (heures normales, supplémentaires et congés payés) ainsi que les gratifications, commissions, etc. versées aux salariés. Les travailleurs de la production et assimilés classés dans l'activité non manufacturière comprennent les bûcherons, les ouvriers de la construction pour le compte de l'établissement, etc., lorsqu'ils ont été déclarés séparément; à partir du recensement de 1970, les ouvriers à la pièce de l'extérieur, autrefois classés dans certaines industries, ne sont plus compris dans la statistique de l'emploi et leur rémunération a été prise en compte au titre des travaux sous contrat exécutés par des tiers. Les employés à la vente et à la distribution comprennent tout le personnel imputé aux frais de vente, certains chauffeurs, etc.

Stocks — Valeur comptable des stocks détenus en toute propriété au Canada, y compris les marchandises en transit ou en consignation.

Petits établissements

Pour les établissements qui remplissent une "formule abrégée", "le coût des matières, fournitures et services" comprend, à partir des données de 1970, tous les services achetés et le combustible et l'électricité; et le "total des recettes, sauf sous forme d'intérêts et de dividendes" vaut à la fois pour les livraisons de marchandises de propre fabrication et pour la production brute de l'activité totale. La valeur ajoutée est calculée à partir de ces chiffres et de la variation nette des stocks et est donc identique pour l'activité manufacturière et pour l'activité totale. Le nombre de salariés est déterminé à partir des rémunérations déclarées.

Sièges sociaux, bureaux de vente et unités auxiliaires — Classés avec l'industrie qui représente l'activité principale de la société. (Le classement de certaines de ces unités au niveau des groupes a cessé à partir des données de 1970.)
