ANNUAL INDUSTRY REPORT

IRON AND STEEL AND THEIR PRODUCTS GROUP

THE AUTOMOBILE INDUSTRY IN CANADA, 1940

MANUFACTURING - Final statistics for 1940 show that automobile production in Canada numbered 223,013 units worth \$174,735,961 at factory selling prices, an increase of 43.5 per cent in number and 76.2 per cent in value over the 155,426 units at \$99,173,916 in 1939. Passenger car output advanced slightly to 109,911 units at \$83,544,445 from 108,369 units at \$71,101,204 in 1939, while the number of commercial and military vehicles jumped to 113,102 units at \$91,191,516 from 47,057 units at \$28,072,712.

Including the value of the repair parts and other products made in automobile factories, the total for the industry reached a new high of \$189,807,555 in 1940 against \$107,463,351 in 1939, an improvement of 76.6 per cent. The previous record was established in 1929 at \$177,315,593.

Of the 109,911 passenger cars, 75,318 had 6-cylinder engines and 34,593 were equipped with 8-cylinder engines. Of the 113,102 trucks, 123 had 4-cylinder engines, 46,656 had 6-cylinder engines and 66,323 had 8-cylinder engines. Included in the year's total were 94,633 passenger cars and 53,169 trucks made for sale in Canada, and 15,278 passenger cars and 59,933 trucks which were intended for export.

Passenger car output included 877 convertible roadsters, 88 convertible touring sedans, 13,826 coupes, 30,420 two-door sedans, 57,453 four-door sedans and 7,247 chassis. Commercial vehicle output included 31,432 special units, 18,722 trucks with a carrying capacity of 3/4 tons or less, 15,453 from 1 ton to less than 1 1/2 tons, 8,676 from 1 1/2 to less than 2 tons, 26,949 from 2 tons to less than 2 1/2 tons, 11,584 from 2 1/2 to less than 3 1/2 tons, 161 of 3 1/2 tons or over and 125 buses or chassis for buses.

The six companies which manufactured or assembled automobiles in Canada during 1940 operated 10 factories, of which 5 were located in Ontario, 2 in British Columbia and 1 in each of Quebec, Manitoba and Saskatchewan. They employed a working capital of \$78,816,499 and gave employment to a monthly average of 16,798 persons to whom \$31,110,945 were paid in salaries and wages. Their expenditures for fuel and electricity amounted to \$1,162,206 and the cost of materials used in manufacturing or assembling was \$128,833,690.

AUTOMOBILE PARTS - Complete data on the Canadian production of automobile parts and supplies are not recorded in the annual Census of Industry, but some figures are available and these have been assembled for 1938 and 1939 as shown in Table 22. Output values of \$78,035,618 for 1939 and \$80,569,346 for 1938 include bodies, tires, batteries, springs, bumpers, wheels, radiators, engines, spark plugs, etc., but do not include lacquer, lumber, upholstery cloth and other such materials, for which there are no separate records of the amounts made for the automobile industry. Similar information for 1940 is not available at the time of printing this report.

APPARENT CONSUMPTION OF AUTOMOBILES - Approximate consumption of motor cars in Canada in any year may be calculated by deducting the number of cars exported from the sum of production and imports. In 1940, production totalled 223,013 and imports 17,019 making an available supply of 240,032 units, but 84,347 were exported, leaving 155,685 for the Canadian market. Corresponding consumption figures for other years were as follows: 114,987 in 1939; 123,331 in 1938 and 161,389 in 1937.

CARS WITHDRAWN FROM USE - An estimate of the number of cars scrapped or withdrawn from use during 1940 may be made by adding the apparent consumption to the number registered in the previous year and deducting current year registrations. In 1939 a total of 1,426,923 cars were registered in Canada, and in 1940 the apparent consumption was 155,685, making a possible total of 1,582,608 cars available for use, but as registrations were reported at only 1,487,450, it would appear that about 95,158 cars were withdrawn from use in 1940. In 1939 the corresponding figure was 70,844 and in 1938 it was 49,151.

It does not necessarily follow from this calculation that the numbers indicated were actually scrapped or permanently withdrawn from use. Some cars may have remained idle and unlicensed during the year

Automobiles

although fit for further use, and no account has been taken of changes in dealers' stocks of unlicensed new and used cars.

IMPORTS - Imports of motor vehicles and parts advanced to \$63,018,851 in 1940 from \$40,982,122 in 1939. A breakdown of the totals shows that passenger cars declined to 15,386 at \$12,961,619 from 16,585 at \$13,724,752 in 1939, while for trucks the number was lower but the declared value higher at 1,633 units worth \$2,476,863 compared with 1,699 worth \$1,949.018, in the previous year. The value of imported parts advanced to \$47,580,369 in 1940 from \$25,308,352 in 1939.

EXPORTS - Exports of motor vehicles and parts increased in value to \$64,595,642 in 1940 from \$25,542,708 in 1939. Included in the totals for 1940 were 18,145 passenger cars at \$7,191,226; 66,047 trucks at \$47,114,836 and parts at \$10,289,580. In 1939 the foreign shipments by Canadian producers included 38,548 passenger cars at \$14,394,483, 19,955 trucks at \$8,156,528 and parts at \$2,991,697.

NEW MOTOR VEHICLE SALES - Exclusive of deliveries to the government for war purposes, there were 130,552 new motor vehicles sold at retail for \$148,845,278 in Canada in 1940, up 14 per cent in number and 18 per cent in value over 1939 when 114,747 units were retailed for \$125,967,521. In only one of the preceding eight years for which figures are available did sales exceed the 1940 totals. In 1937 there were 144,441 units sold for \$149,170,527. Included in the 1940 totals are 101,789 new passenger models which sold for \$114,928,833, up 13 per cent in number and 18 per cent in value from the 90,054 units which retailed for \$97,131,128 in the preceding year. There were also 28,763 new commercial vehicles sold for \$33,916,445 in 1940, up 17 per cent in number and 18 per cent in value over corresponding figures for 1939.

Gains in the annual totals for 1940 over 1939 are due to marked increases in the first half of the year rather than to a continuous upward trend throughout the period under review. The number of new motor vehicles sold in the first six months of 1940 exceeded by 27 per cent the number sold in the corresponding period of 1939; passenger models increased 28 per cent while commercial model sales were up by 25 per cent. On the other hand, sales of new passenger and commercial models combined were 6 per cent lower in the second half of 1940 compared with 1939, passenger models declining by 10 per cent while commercial models were up by 6 per cent.

The market for commercial vehicles in 1940 was strengthened by demand arising from the increased industrial and commercial activity of the country. Purchases of passenger models were stimulated by increased purchasing power in consumers' hands due to higher incomes. Higher prices for passenger cars resulting from new taxation schedules introduced in the latter part of June and revised upwards in December was a factor acting in the opposite direction.

Gains over 1939 were most impressive in the early months of the year, increases for new passenger car models ranging as high as 73 per cent in February, 1940, over February, 1939. These marked gains must be regarded in the light of conditions prevailing in the earlier period, sales for the first part of 1939 standing materially below the level of previous years. Sales of passenger models in April were 8 per cent higher than in April, 1939, May sales were up 16 per cent while a wave of buying in anticipation of price increases following the introduction of the June budget resulted in a 46 per cent increase in sales over June of 1939. Decreases ranging from 15 per cent to 28 per cent were recorded in the following four months while sales in November and December were equal to or slightly above the level of corresponding months in 1939.

Annual results on a regional basis for passenger and commercial vehicles combined reveal gains in all regions for which separate details are compiled excepting the province of Alberta where sales were practically unchanged. Increases in passenger car sales for other regions ranged from 9 per cent in Quebec to 17 per cent in Ontario. Saskatchewan sales gained 16 per cent; the Maritime Provinces, 13 per cent; British Columbia, 11 per cent; and Manitoba 10 per cent. In the commercial vehicle field Saskatchewan was in the lead with an increase of 57 per cent in number of units sold compared with the preceding year. Sales in the Maritime Provinces and Manitoba were up 28 per cent; British Columbia sales were up 11 per cent, Quebec, 9 per cent, and Ontario, 8 per cent.

USED VEHICLE SALES - Complete statistics covering the sale of used motor vehicles are available only for the year 1937 as the result of a special survey taken for that year and for which details were secured direct from all the retail distributors of motor vehicles in the country. Returns from a large sample of dealers are secured annually and from these statements it is possible to compute fairly accurate estimates of the number and selling value of all used models sold during recent years. Results of the survey for 1939 show that 254,740 used vehicles were sold for \$87,033,000 in that year, practically unchanged in

Automobiles

number and value from the 251,065 used vehicles which retailed for \$87,238,000 in 1938. These figures relate to used models in both the passenger and commercial fields and are the most accurate estimates available for these years. Results of the complete survey for 1937 show that 271,162 used models were sold for \$87,605,733.

Saskatchewan was the only province to register an appreciable change in the market for used vehicles between 1938 and 1939, an increase of 36 per cent in number of vehicles being recorded. Separate compilations for the four largest cities in Canada show increases in number of used vehicle sales in 1939 over 1938 amounting to 10 per cent in Vancouver, 6 per cent in Winnipeg, and 2 per cent in Toronto. Montreal sales declined by 1 per cent.

Returns from the sample of individual dealers reporting for 1940 will not be complete until later in the year. Reports from 274 retail firms indicate that there was a 10 per cent increase in the number of used vehicles sold in 1940 compared with 1939 while the value of sales increased by 18 per cent. The 274 firms sold 48,169 used vehicles for \$17,363,298 in 1939 and 53,041 used vehicles for \$20,397,439 in 1940.

MOTOR VEHICLE FINANCING - The trend in financing of new motor vehicles in 1940 paralleled that in sales, pronounced increases in the first part of the year being modified by declines or more moderate gains in later months. There were 42,982 new motor vehicles whose purchases were financed by finance companies for \$33,473,397 in 1940, up 15 per cent in number and 20 per cent in amount of financing over 1939. Combined figures for Manitoba and Saskatchewan were up 39 per cent in number and 46 per cent in amount of financing in 1940 over the preceding year. The Maritime Provinces came second with a gain of 23 per cent in number of units financed followed by Ontario at 17 per cent, Quebec, 8 per cent; and British Columbia, 1 per cent. The number of new vehicles whose purchases were financed in Alberta declined by 4 per cent.

Financing by finance companies is also important in the used vehicle field. There were 133,596 used motor vehicles whose purchases were financed in 1940 to the amount of \$41,762,396, up 15 per cent in number and 20 per cent in value over the preceding year. Increases were recorded in all months of the year under review compared with 1939. A major gain of 32 per cent in February corresponded with large increases in both sales and financing of new vehicles. An outstanding feature of the results for used vehicles was the pronounced gain in September when the number of units financed exceeded by 35 per cent the number in September, 1939. Results on a geographical basis for used vehicle financing show fairly uniform gains of from 18 to 20 per cent for the Maritime Provinces, for Ontario and for the combined figures of Manitoba and Saskatchewan. Increases for Quebec, Alberta and British Columbia were also uniform, deviating within narrow limits of 8 per cent.

MOTOR VEHICLE REGISTRATIONS - The number of motor vehicle licenses issued in 1940 was 1,500,829 compared with 1,439,245 in 1939 and 1,394,853 in 1938. The gain in 1940 amounted to 4.2 per cent over 1939 which in turn was 3.2 per cent over the total for 1938. Registrations in 1940 were the highest on record.

Automobiles were registered for the first time in Canada in 1904 and Ontario was the only province recorded as having issued licenses in that year. New Brunswick began registering cars in 1905, Quebec, Saskatchewan and Alberta in 1906, British Columbia in 1907, Manitoba and Nova Scotia in 1908, the Yukon in 1914, and Prince Edward Island in 1938.

Every province in Canada reported a greater number of permits than in 1939. The percentage gains were: Ontario, 3.1; Quebec, 5.6; British Columbia, 4.9; Saskatchewan, 6.7; Alberta, 6.0; Manitoba, 2.3; New Brunswick, 2.3; Nova Scotia, 9.2; the Yukon 10.5 and Prince Edward Island, 0.4 per cent.

Passenger car licenses in 1940 numbered 1,234,637; trucks, 247,858; motor cycles, 13,379; motor buses, 2,958, and ambulances, hearses, etc., 1,997.

REVENUES - Revenues obtained by Provincial Governments through motor vehicle licenses, operators' permits, etc., in 1940 amounted to \$29,300,720 and through gasoline tax to \$56,179,173 against \$27,961,132 and \$51,954,360 respectively, in 1939.

The tax rate on gasoline in 1940 was 10 cents per gallon in Prince Edward Island, Nova Scotia and New Brunswick, 7 cents in Manitoba, Saskatchewan, Alberta and British Columbia, and 8 cents in Ontario and Quebec.

TOURIST TRAFFIC - Statistics of tourist entries compiled by the Canadian Immigration Branch indicate that for the first half of the year the movement of visitors to Canada compared favourably with 1939. The total tourist entries in 1940 from January to June were 5,768,432 persons as compared with 5,886,648 in 1939. However, in July there was a decided falling off, only 1,818,000 visitors arriving as compared

Automobiles

with 3,070,174 in 1939. In August there was an improvement, the numbers rising to 2,232,459 as against 3,012,083 in 1939. For the remainder of the year, though in no month was the level up to that of 1939, the falling off was a smaller percentage. For the year as a whole, there were 13,592,429 tourist entries as compared with 16,578,119 in 1939. The decline over the year was 2,985,690 persons. To this total decline the first half of the year contributed 118,216 and the last half 2,867,474. In the latter figure, July accounts for 1,252,173, and August 779,624.

DEATHS DUE TO MOTOR VEHICLE ACCIDENTS - Deaths from motor vehicle accidents in Canada during the year 1940, numbered 1,709 as against 1,584 in 1939 and 1,545 in 1938. The death rate from this cause was 15.0 per 100,000 population as compared with 14.0 in 1939 and 13.8 in 1938. The number of deaths and the death rate in 1940 were the highest during the period 1926-40 for which figures for all provinces of Canada have been compiled by the Bureau.

The deaths from motor vehicle accidents by provinces in 1940 were as follows, with the figures for 1939 in parentheses: Prince Edward Island, 10 (7); Nova Scotia, 104 (84); New Brunswick, 81 (92); Quebec, 434 (390); Ontario, 746 (682); Manitoba, 87 (63); Saskatchewan, 59 (65); Alberta, 72 (81); British Columbia, 116 (120); thus five provinces showed a greater number of deaths in 1940 than in the preceding year, and four provinces a smaller number.

Saskatchewan had the lowest provincial death rate from motor vehicle accidents in 1940, namely 6.2 per 100,000 population and Alberta stood next with a rate of 9.0. The highest provincial rate was 19.8 in Ontario followed by Nova Scotia with a rate of 18.6.

The definition of motor vehicle accidents includes all accidents in which a motor vehicle was involved.

1940	109,911	83,544,445	113,102	91,191,516	223,013	174,735,961

(1) Production figures include all vehicles for military use, except universal carriers.

(2) Prior to 1925 all chassis included with passenger cars; subsequently the division between passenger and truck chassis has been made.

(3) Selling value represents the wholesale value or the amount of money received by manufacturers from their dealers or distributors; taxes, dealers' commissions, etc., are not included.

Table 2 - HISTORICAL SUMMARY OF THE AUTOMOBILE MANUFACTURING INDUSTRY, 1920 - 1940.

Per cent change 1940 from 1939		+ 32.5	+ 16.4	+ 51.2	+ 41.9	+ 79.8	+ 76.6

(1) Includes assembly plants.
(2) Duty drawback has been deducted.

(3) Includes value of parts, etc., made in auto factories.

NOTE-Profits or losses cannot be calculated from above figures as data are not available for general expense items such as interest, rent, depreciation, taxes, insurance, advertising, etc.

Table 3 - CAPITAL EMPLOYED IN THE AUTOMOBILE MANUFACTURING INDUSTRY, 1929 - 1940

Year	Present value of land, build- ings, machinery and tools	Inventory value of materials on hand, stocks in process, supplies on hand and finished products on hand	Operating capital (cash, accounts and bills receiv- able, prepaid expenses, etc.)	TOTAL CAPITAL EMPLOYED
1929	51,108,033	20.156.604	27,113,664	98,378,301
1930	51,985,366	13,927,033	24,759,279	90,671,678
1931	28,668,312	9,337,257	21,632,488	59,638,057
1932	23,406,717	7,763,934	18,471,126	49,641,777
1933	19,654,240	6,720,495	13,625,824	40,000,559
1934	14,924,275	8,652,766	10,943,897	34,520,938
1935	14,399,147	9,321,517	17,044,884	40,765,548
1936	14,438,913	11,687,644	20,370,702	46,497,259
1937	22,085,641	15,971,835	19,938,766	57,996,242
1938	24,099,805	14,915,155	20,783,290	59,798,250
1939	23,439,657	14,344,480	21,686,849	59,470,986
1940	25,855,700	25,074,081	27,886,718	78,816,499

(1) Prior to 1931 the value was taken as the cost of lands, buildings, etc.; since that year the present value, or the cost less reasonable depreciation, has been taken.

Table 20 -

MANUFACTURERS(x) OF AUTOMOBILES IN CANADA, 1940

Name of Company

Chrysler Corporation of Canada, Limited Ford Motor Company of Canada, Limited

General Motors of Canada, Limited Hayes Manufacturing Co. Ltd. International Harvester Co. of Canada, Limited White Company Limited

Location of Plant

Windsor, Ont.
Windsor, Ont., with assembling plants at Toronto, Ont.,
Winnipeg, Man., and Burnaby, B.C.
Oshawa, Ont., and Regina, Sask.
Vancouver, B.C.
Chatham, Ont.
Montreal, P.Q.

(x) Includes assembling plants.

(1) First 8 months only.

(2) First 6 months only for Greater Reich.

(3) Revised.

(4) In addition, 200 Diesel engines equipped on truck chassis, 80 of which were American and 20 locally manufectured.

(5) September 1, 1939 to December 31, 1940 - Not including distinctly military vehicles.

C - SALES OF NEW MOTOR VEHICLES AND FINANCING OF SALES OF NEW AND USED VEHICLES

NOTE - The retail value of sales used is the price paid by an individual purchaser at the Canadian point of manufacture and includes sales and excise taxes, charges for standard accessories, dealer's commission, etc. Freight charges from Canadian point of manufacture to point of delivery have been excluded. Duty is included in the retail value of imported cars.

1938	1,545	6	75	58	413	677	80	49	77	110
1939	1,584	7	84	92	390	682	63	65	81	100
1940	1,709	10	104	81	434	746	87	59	72	116

⁽¹⁾ Not including Yukon and the Northwest Territories.

⁽x) Prior to July 1, 1939, Canadian automobiles leaving Canada for a period of 24 hours or less, and returning through the same Customs port, did not require a permit and were not included in the statistics of Canadian cars leaving Canada for touring purposes. Since the above date such cars have been included. Hence, the figures of Canadian cars touring outwards dering the latter half of 1939 are not exactly compareble with those for previous periods.
